SELECTMEN'S REPORT.

In conformity with the usual custom, the Selectmen beg leave to submit to you their Annual Report for the year ending Dec. 31, 1884.

Highways.

Amount appropriated by the town,	$9,000 00
" " for sidewalks,	500 00
Additional amount appropriated in August,	3,000 00
Received for labor, gravel, stone, etc.,	1,743 92
	$14,243 92
Expended,	$14,361 71

Total number of loads of stone and gravel used upon streets and sidewalks, which have been distributed as follows: —

Arlington Ave.,	1,795 loads	Pine Street,	62 loads
Academy Street,	8 "	Pond Lane,	25 "
Appleton Street,	141 "	Park Ave.,	174 "
Bow Street,	3,231 "	Pleasant Street,	107 "
Broadway,	188 "	River Street,	28 "
Chestnut Street,	236 "	Summer Street,	254 "
Florence Ave.,	6 "	Spring Valley,	56 "
Grove Street,	14 "	Spring Lane,	80 "
Lake Street,	317 "	Teel Street,	297 "
Lowell Street,	8 "	Westminster Ave.,	307 "
Mt. Vernon Street,	8 "	Warren Street,	2 "
Mill Street,	30 "	Water Street,	10 "
Mystic Street,	756 "	Winter Street,	23 "
Oak Street,	55 "		
Total,			8,218 loads

Arlington Avenue.

Quite an extensive alteration and improvement have been made on this street at Alewife Brook, by widening the same, together with the bridge, to conform with the width of the street as laid out by the County Commissioners some years since. A heavy retaining wall was laid on the southerly side, and a fifteen-inch drain pipe one hundred feet in length put in, which takes all the water from that side of the street directly into the brook. The bridge has been widened, being built of hard pine and covered with stone and gravel; one half the expense of which is to be borne by the city of Cambridge. A section of the street near the estate of Walter Russell has been repaired by crowning with stone and gravel. That portion of the street at the Willows (so called) has been repicked and crowned with stone and gravel. There are several sections upon this street which very much need crowning with stone, some of the most needed being in the vicinity of Teel Street; from Medford Street to a point near Tufts Street; a short section near Academy Street; another near Brattle Street; and a section near Park Avenue; and that portion from the estate of Sandy Bowles to Lexington line. That portion of the street near the old brick schoolhouse (so called) is very narrow and should be widened to conform to the width of the street on either side. By the rebuilding of Bow Street, we have been enabled to dispose of the water coming from Appleton Street and Appleton Court by laying a culvert across the avenue and putting in a twelve-inch drain pipe underground to the brook on Bow Street. We think the great trouble experienced in the past has been entirely remedied.

Appleton Street.

A portion of this street has been gravelled west of Park Avenue. Other portions will need attention the ensuing season.

Bow Street.

During the past season an order was received from the County Commissioners to straighten and widen this street from the avenue to Winchester line; that portion from the avenue to the Boston and Lowell Railroad to be completed the present season, the balance before Jan. 1, 1886. The first portion has been built to their acceptance. The street thus far has been quite an expensive one, consequent upon the large amount of retaining walls which had to be built, the removing of buildings, and the building of the bridge and abutments. There was used upon the street 3,231 loads of material exclusive of the 354 perch of stone used in the retaining walls and bridge abutments; 217 perch of stone in addition have been laid in retaining walls north of the railroad. The bridge is built of hard pine timber and covered with tar, stone, and gravel. The land damage has been paid by the county, and the commissioners have awarded the town the sum of $575, to be paid from the county treasury whenever the street is completed to their acceptance to the Winchester line. The amount expended upon this street thus far has been $2,897.66. We would suggest that the name of this street from the avenue to the railroad be changed from Bow to Forest Street, and that the portion of the original street not now in use be discontinued.

Beacon Street.

The gutters have been cleared and sidewalk raised.

Chestnut Street.

The retaining wall on the north side of this street has been relaid and newly railed, also the entire length has been gravelled. A cesspool and water grate has been put in.

Dudley Street.

The entire length of this street should be coated with gravel.

Eastern Avenue.

Some portions of this street need gravelling.

Grove Street.

Much trouble is experienced upon this street by the large amount of water coming from the main avenue. To remedy this, we would suggest the laying of a drain from the avenue to the brook near the saw factory, thus not only relieving the trouble on this street, but also relieving a more serious trouble upon the avenue, as the grates and culverts are inadequate to take all the water that comes from the hills at times, and frequently much of it has to pass down to Mill Street before it reaches an outlet.

Highland Avenue.

This street has become very flat and rough, and much needs regravelling.

Hillside Avenue.

This street, recently accepted by the town, will need considerable of an outlay the ensuing season.

Lake Street.

That portion of this street from the main avenue to the railroad should be crowned with stone and gravel early in the spring.

North Union Street.

The section near Decatur Street very much needs repairs.

Mt. Vernon Street

Needs repairs the entire length, which can be done at no very great expense, by clearing the gutters and coating with gravel.

Mystic Street.

The hill near the residence of George Winn has been repaired with gravel, and a section of the hill near Mr. Huffmaster's has been crowned with stone and gravel. The remaining portion to Winchester line should be repaired in like manner the ensuing season.

Park Avenue

Is in very fair condition, but will need some gravelling the ensuing season. The concrete gutters and crossings have been partially repaired. The sidewalk between Florence Avenue and the Hawley House should be graded, and some additional gutter should be laid.

Park Street.

The gutters have been cleared and sidewalks repaired.

Pleasant Street.

But little has been done on this street the past season, except at its junction with the avenue. At this point quite

an improvement has been made by removing the water grate near the hay scales farther up the street, and the building of a catch-basin, and conducting the water from thence to the cesspool near the bank building by a twelve-inch drain pipe, and thus enabling us to properly grade the street at this point. The grades of the street in many places need to be reduced in order to properly dispose of the surface water, which at times is very troublesome. Some portion of the street should be attended to the ensuing season.

River Street.

A street much travelled, and needs some attention. Some method should be adopted for disposing of the water at its junction with Warren Street. By the putting in of a culvert with proper catch-basins and grates across Broadway, across the square near the drinking fountain, and then crossing Warren Street, we think all the surface water in that locality, which is a great nuisance, could be taken down River Street to the river.

Spring Valley and Spring Lane.

These have been repaired the past season.

Summer Street

Has been repaired near the Almshouse, and at its junction with Mystic. The concrete crossing near Fowle's Mill has been relaid, which was heretofore quite dangerous.

Teel Street.

This street, accepted by the town at its March meeting, has been graded and put in good condition. The surface water in this locality has been provided for by laying a ten

and twelve inch drain pipe through the land of Henderson Brothers to a point emptying into Alewife Brook.

Wollaston Avenue

Has been considerably washed the past season and needs some repairs. A sidewalk should be graded at least on one side of the street. Gutters should also be paved.

Walnut Street.

Some portions of this street need gravelling.

Westminster Street.

A portion of this street has recently been accepted by the town to the width of fifty feet, and sidewalks have been graded. A retaining wall has been laid adjoining the land of Mrs. Freeman. This street is now in good condition.

Bridges and Culverts.

As has been before stated, the bridge at Alewife Brook has been widened. The Medford Street bridge has been re-planked, and a new bridge built on Bow Street. Four new culverts have been put in, and several taken up and repaired. Twelve grates have been set, and nine catch-basins have been put in.

Watering Streets.

The same routes have been watered as the year previous.

Guide or Sign Boards.

Fifteen boards have been put up, nine of which were at private ways. Some method should be adopted to detect and punish persons who maliciously deface and destroy these boards.

Railings.

Railings have been built on Bow and Chestnut Streets, and on the Avenue near the brook, and have been repaired in other places. Railings should be put on Lowell Street, near the residence of John Brady.

Stone Crusher and Stone.

Soon after commencing to crush stone last spring, the crusher which had become much worn was broken, and was not considered worth repairing. An appropriation of $800 was granted by the town at its meeting in August, and after an investigation of the merits of different machines it was decided to purchase the Marsden crusher, which has been put in and satisfactorily tested. We have on hand, and piled in the yard, a large amount of stone ready for crushing.

Gravel.

Early in the spring we commenced procuring gravel, for use on the streets, upon a street formerly laid out by the Arlington Land Company, which was given to us by the owners of the land through which it passed. We have found it an excellent quality of gravel, and have utilized over four thousand loads, thus saving the gravel in our own bank, and also opening a way of easy access to the town land.

Teams and Tools.

Two horses, having become quite old and unfit for service, have been sold. These ought to be replaced. One new two-horse cart and one pair of double harnesses have been added, so that the actual value of teams and tools is equal to that of a year ago.

Almshouse.

Mr. George W. Austin and wife, as warden and matron, have fully maintained their former good reputation.

The buildings, furniture, and fixtures are in as good condition as last year, natural wear excepted.

Amount of appropriation by the town,	$1,600 00
Received for board and products sold,	503 18
	$2,103 18
Expended for supplies, repairs, etc.,	2,088 85
Whole number of inmates for the year,	9
Present number,	5
Number of tramps fed and lodged,	373

No deaths have occurred during the year, and the general health of the inmates has been good.

Outside Poor.

Appropriation by the town,	$2,000 00
From poor widows' fund,	360 00
	$2,360 00
Expended,	2,352 00

There have been, the past year, five persons at insane asylums, supported wholly by the town. The last of December one of them died.

Street Lamps.

There have been five new street lamps erected this year, two gas and three gasoline. One (gas) on Linwood Street,

and one (gas) on the Avenue, at head of street leading to railroad station. This one was paid for by the town. Three gasoline on Brattle Street. The gasoline lamps have been lighted and kept in repair by the Globe Gas Light Company. The gas lamps have been under the charge of Mr. J. H. Fermoyle.

Coal.

Mr. David Richards, being the lowest bidder, was awarded the contract to furnish coal, at the price of $5.45 per ton, and fifty-five cents extra for Lehigh.

Cemeteries.

The cemeteries, for the past year, have been under the care of Mr. John B. Hartwell, who has performed his work faithfully. There was an appropriation of $500 made last spring by the town for the purpose of "introducing water, setting out trees, and laying out paths." The water was introduced and three stand-pipes erected, but before we could proceed to lay out paths it was found necessary to restake a large portion of the lots; the expense attending this work was so great that we were unable to do any more than to put in the water and restake the lots.

We would recommend that a certain amount of the proceeds from the sale of lots each year be expended, under the direction of the committee, in improving the cemeteries.

Highland Hose House.

The unexpended balance of appropriation last year was reappropriated. A bell was put in, cellar bottom cemented, and trough for washing hose built. For further details of expenditures we refer you to the Treasurer's report.

Town Debt.

There has been $5,000 of the town debt paid this year, and there will be $21,000 falling due April 9, 1885, to be provided for.

Town House.

We would call your attention to the shabby condition of the town hall. Both the exterior and interior need a thorough repairing, and, as a matter of economy, should be attended to at once.

We would suggest taking the rear of the room recently occupied by the Library, fitting it up as a waiting-room to the hall above, and connecting them by a flight of stairs. It is very evident that such a room is much needed.

Licenses.

The town having by a large majority voted to grant licenses, we have issued three first-class, one second-class, two third-class, one fifth-class, and two apothecaries' licenses.

The amount received,	$1,402 00
Deducting one fourth paid to State, leaves	1,051 50

Police.

On the first day of January the police force consisted of Eugene Mead as chief, Patrick J. Shean and Garret Barry as patrolmen. At a meeting of your board in March, the same gentlemen were reappointed. Subsequently Mr. M. J. O'Brien was appointed; and during the summer a vacancy occurring, — by the death of Mr. Shean, — Mr. O'Brien was appointed to fill his place. The following is the report of the Chief of Police: —

To the Honorable Board of Selectmen:

Gentlemen, — I herewith submit to you the annual report of this department for the year ending Dec. 31, 1884.

Whole number of arrests during the year: Males, 111; Females, 6; Total, 117.

Assaults,	25	Vagrants,	4
Disturbing the peace,	11	Violation of liquor law,	5
Liquor seizures,	4	Violation of By-Laws,	13
Drunkenness,	37	Bestial,	1
Assault on officer,	1	Keeping unlicensed dog,	1
Malicious mischief,	3	Trespass,	3
Cruelty to animals,	3	Insane,	2
Larceny,	3		
Bastardy,	1		117

Ten search warrants for liquor have been sworn out, but liquor was found in only three cases; two of these were in private houses, and the liquor could not be held for want of evidence of a sale. The other case was fined one hundred dollars and costs. In one case of violating the liquor law, one witness swore to five sales in one day, but notwithstanding this, the judge decided against us. One beer wagon was seized, and the two men with it were arrested; they were each fined in the lower court fifty dollars and costs.

Four lost children have been found and returned home.

All fires except that of the old pest-house have been attended by one or more officers.

The sending of extra officers to Spy Pond Grove has been done without extra expense to the town.

On July 1, M. J. O'Brien was appointed as regular officer, and, after the death of P. J. Shean, was appointed to take

his place. I would suggest that a third officer be appointed for night duty for the better protection of Pleasant, Academy, and Russell Streets.

Three hundred and sixty-three tramps have been sent to the almshouse for lodging, and sixty-three have been lodged at the station.

Respectfully submitted,

EUGENE MEAD,
Chief of Police.

Fire Department.

The condition and details of the Fire Department will be found in Chief Engineer Gott's report, to which we refer you.

Mr. Samuel E. Kimball resigned as selectman, etc., July 1. At town meetings held Aug. 4 and 20, articles were put in the warrants to see if the town would fill the vacancy occasioned by his resignation, but the town at each meeting voted not to do so.

For a more detailed account of the receipts and expenditures of the year, we would refer you to Treasurer's report.

Respectfully submitted,

GEORGE D. TUFTS,
JACOB F. HOBBS, } *Selectmen of Arlington.*

ARLINGTON, Dec. 31, 1884.

REPORT OF THE TRUSTEE

OF THE

"SOLDIERS' MEMORIAL FUND."

The Trustee of the "Soldiers' Memorial Fund" makes the following report for the year ending Dec. 31, 1884: —

At the town meeting held March 5, 1883, under Article XXV., of the warrant, "To see if the town will accept in trust the 'Soldiers' Monument Fund,' so called, elect a trustee or trustees for the management of the same, or take any other action thereon," the following resolutions were unanimously adopted, to wit: —

Resolved, That the town accept the "Soldiers' Monument Fund," so called, the same to be held by the town in trust, to be appropriated and expended by said town at such time and in such manner as at a legal town meeting it shall determine, to and for the erection of a monument, or providing other suitable memorial in honor of the patriotism of those citizens of said town who lost their lives in military service in the war of the Rebellion.

Resolved, That the town treasurer for the time being, and his successor in office be, and hereby is appointed and elected as trustee for the care and management of said fund.

Resolved, That said fund shall be kept as a separate fund to be known as the "Soldiers' Memorial Fund," and said trustee is hereby instructed to report in writing annually at the March meeting the amount of said fund, and the manner of its investment.

In accordance with the foregoing resolutions the fund was transferred to the town treasurer on the twenty-seventh day of March, 1883. It consisted of deposits in the Arlington Five Cents Savings Bank, as follows :—

Jan. 13, 1866, deposit,	$130 00
March 2, 1867, "	506 25
July 6, 1867, "	51 12
Making a total of deposits,	$687 37

Which, together with the accumulated interest, amounted at the time of the transfer to $1,655.62. The fund is still deposited in the Arlington Five Cents Savings Bank, and, with interest added to Jan. 1, 1885, amounts to seventeen hundred and ninety-two dollars and four cents ($1,792.04). This is the second annual report made to the town.

Respectfully submitted,

B. DELMONT LOCKE,

Trustee, ex officio, of Soldiers' Memorial Fund.

WATER COMMISSIONERS' REPORT.

In accordance with previous custom and requirement, we herewith present our annual report. For a detailed account of what has been done the past year, and the condition of the finances, we refer you to the report of the Treasurer, Registrar, and Superintendent, accompanying this.

The supply at the reservoir has been ample through the season, and we think the quality of the water is improved. We think that the reservoir should be enclosed by a suitable fence, and recommend that at the next annual meeting the town make an appropriation for the same; and believing that the consumer should pay a fair and equitable sum for the use of water, we would again recommend the adoption of a schedule of water rates that was prepared by a special committee, and has once been presented, repeating, that by such a change, the consumer would pay no more than is charged in other towns, and the proposed change would be but a slight increase to each one, but in the aggregate, an increase in income, thereby reducing the amount to be raised by taxation to pay interest on the debt. And believing that the water revenue should be used only for running expenses and interest on the debt, we would recommend an appropriation for the purpose of extending the main pipe, where, in the judgment of the commissioners, it shall be for the interest of the town to do so.

In order that the land on the side of the reservoir, on the

line of Lowell Street, might be improved and graded, we have leased it to Mr. Winship, with the agreement that, at the expiration of three years, it shall be graded and sown to grass.

Uses for which water is supplied, as reported by the Registrar : —

Families	supplied,	484

Respectfully submitted,

HENRY MOTT,
WARREN A. PEIRCE,
Water Commissioners.

ARLINGTON, Dec. 31, 1884.

REPORT OF SUPERINTENDENT OF THE WATER WORKS.

ARLINGTON WATER WORKS DEPARTMENT,
Dec. 31, 1884.

TO THE BOARD OF WATER COMMISSIONERS:

Gentlemen, — I herewith submit my report as Superintendent for the financial year ending this day.

CONSTRUCTION

There has been an extension of 189 feet of four-inch cement-lined pipe laid in Dudley Street at a cost of $127.35, which now yields to the town an income of $20 per annum. Also in the street recently accepted by the town (called Jason Street) we have laid 306 feet of four-inch pipe at a cost of $237.51, including the cost of one four-inch gate which also gives to the town an income of $50 per annum. That portion of the pipe (54 feet) crossing Arlington Avenue is of cast iron, the balance being cement lined, which was made to order.

SERVICES.

Thirty-two services have been added to the construction during the year, at a cost of $389.67, or at an average of about $12.20 each. Five leaks have occurred in services, which have been repaired. A few of the takers for irrigation purposes have been cut off, they having supplied them-

selves with water otherwise. A large number of services have been shut off and let on, caused by change of tenants and to make repairs. While there has been something of a loss sustained by some of the farmers supplying themselves, there are so many new takers which have been and are being added, we have every reason to believe that the general receipts will soon be as large, if not larger, than heretofore. Thirty-six services have been dug up and the corporations cleared from rust. Twenty-seven wooden service boxes have been taken up and iron ones substituted.

HYDRANTS.

The hydrants have received their usual attention. Ten have required repairs. A few others are in poor condition, and I would suggest that two new ones be purchased, in order that some of the old ones can be taken up and properly repaired.

GATES.

Fourteen have been dug up and newly packed, and eight iron gate boxes have been put in. I would suggest that a new gate be purchased and put in near the Arlington House, in order that in making repairs in that locality we should not be obliged to close the gate near the Town Hall, and thus shut off a good portion of the centre of the town. By thus doing, water would be allowed to pass down Medford Street and supply the lower part of the town.

GENERAL REPAIRS.

Thirty-nine leaks have occurred on the different mains, nine of which have been repaired by the use of clamps, eight

by putting in new lengths of pipe, and the balance by winding. Eight of these were new breaks, the others being where they had been repaired years before. The rip-rap around the reservoir has been cleared of weeds, the boxing in the rear of the new filter has been raised and graded to high-water mark, and some repairs made about the gate house. For detailed account of expenditures for labor, supplies,etc., you are respectfully referred to the report of the Treasurer and Water Registrar. Stock and tools on hand you will find in annexed schedule.

Schedule of stock, material, and tools on hand Dec. 31, 1884: —

119 feet 1¼ inch pipe.
75 " 1 " "
40 " 2 " "
Lot of oakum.
Lot of second-hand pipe.
Lot of old iron and pipe.
Lot winding rope.
14 feet 10 inch pipe.
14 " 8 " "
7 " 6 " "
7 " 4 " "
6 " 12 " "
3 four inch plugs.
Lot rubber gaskets.
1 Gem meter.
1 Continental meter.
Lot of couplings, caps, elbows, ties, and unions.
1 second-hand hydrant.
3 1¼ inch corporations (complete).

4 S. & W. cocks.
2 one inch corporations (complete).
2 centre rods.
1 frost case.
Lot cast-iron clamps.
Rubber packing.
2½ barrels cement.
Oil and can.
6 service boxes.
5 gate boxes.
7 cap fastenings.
7 sheet-iron sleeves.
1 iron branch.
4 monkey wrenches.
1 Stillson wrench.
1 cap wrench.
2 hydrant wrenches.
3 chisels.
1 trowel.
2 pairs pipe tongs.
3 files.
1 hatchet.
Set calking irons.
2 punches.
2 sets stuffing boxes and drills.
Soldering irons and furnace.
1 ladder.
2 lanterns.
1 tool box.
Die plate and dies.
1 pipe cutter.

7 gate wrenches.
1 centre-rod wrench.
1 pair tongs.
2 sleeve wrenches.
2 pails.
1 screw-driver.
1 pair winding sticks.
1 ratchet.
Set drills and frame.
1 bench vice.
1 copper box.

Very respectfully submitted,

GEO. W. AUSTIN,
Superintendent.

WATER WORKS — TREASURER'S REPORT.

RECEIPTS.

Balance of cash on hand, Dec. 31, 1883,		$1,257 65
Amount received during the year 1884, viz.: —		
For water rates for 1884,	$8,611 46	
From town, for use of street hydrants for 1884,	1,000 00	
Also for water for drinking fountains,	200 00	
		9,811 46
Amount received of Faneuil Hall National Bank, interest on deposits,	$92 42	
Received of town, interest on loans,	53 49	
		145 91
Received for wood sold, at meadows,	$48 00	
Received of F. Alderman, for pasturing at meadows,	100 00	148 00
Received of town, appropriation for interest on water scrip,	$6,500 00	
Amounts carried forward,	$6,500 00	$11,363 02

Amount brought forward,		$6,500 00	$11,363 02
Amount received of town, as follows: —			
June 25, loan of Jan. 31,	$2,500 00		
June 25, loan of Feb. 27,	1,000 00		
		3,500 00	
Borrowed Dec. 31, of the town, on demand,		1,400 00	
			11,400 00
			$22,763 02

EXPENDITURES.

Running Expenses.

Paid Braman, Dow & Co., for piping and tools,	$193 46	
Davis & Farnum Mfg. Co., for service and gate boxes and iron pipe,	155 77	
Summers & Hunt, 3 way corporations, etc.,	67 50	
Scrannage Bros. & Cook, cap fastenings for service boxes,	14 72	
J. H. & T. Cunningham, stop and waste cocks, etc.	22 23	
George D. Tufts, white lead,	7 82	
Amount carried forward,	$461 50	

Amount brought forward,	$461	50
Paid Warren A. Peirce, 36 casks of cement,	87	50
Wm. H. Wood & Co., lumber for filter,	55	22
James Baston, labor repairing filter,	7	50
Russell & Cotton, mason work,	7	05
A. Lawrence, enamel cloth,	4	20
W. L. Clark & Co., enamel cloth,		20
Chapman Valve Mfg. Co., water gate,	12	35
City of Somerville, 9 clamps,	9	62
Medford Water Board, labor and materials used in laying and repairing pipes,	206	27
Highway Department, labor on repairs and putting in service pipes,	897	67
R. W. Shattuck, labor and materials,	253	25
M. F. Whiton & Co., manila bale rope,	13	98
Sylvester Stickney, keys and rings,	2	65
Farrar, Simpson & Co., plumbers' solder,	5	91
W. T. Wood & Co., machine work,		95
Amount carried forward,	$2,025	82

Amount brought forward,	$2,025 82	
Paid Charles Gott, wrenches, etc.,	9 85	
A. Needham, expressing,	9 75	
Brooks & Co., "	15	
M. Patterson, expressing,	1 25	
L. C. Tyler, repairing rubber mittens,	25	
Middlesex Townsman, advertising,	1 50	
C. S. Parker, printing and advertising,	16 70	
D. F. Jones & Co., printing,	14 00	
Town of Lexington, tax for 1884,	9 54	
Geo. W. Austin, services as superintendent for 12 months,	100 00	
John H. Hardy, legal services in Kenison and Cosgrove cases, etc.,	48 75	
Hardy, Elder and Proctor, legal services in Kenison and Cosgrove cases,	30 00	
	*$2,267 56	
Deduct amount received of Cemetery Department, for labor and materials, laying pipe, $210 07		
Amounts carried forward, $210 07	$2,267 56	

* Include l in this amount is the cost of laying pipes in Dudley Street, $127 35

From which are now derived yearly water rates, $20.

Also laying pipes at Jason Street, 237 51

From which are now derived, yearly water rates, $50.

B. DELMONT LOCKE, *Treasurer.*

ARLINGTON, Dec. 31, 1884.

Sections 15 and 16 of Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely: —

DWELLING-HOUSES.

Occupied by one family, for the first faucet,	$5 00
For each additional faucet, to be used by the same family,	2 00
Where a house is occupied by more than one family, and less than four, one faucet only being used for each family,	4 00
Where a house is occupied by four or more families, and but one faucet is used by all, for each family,	3 50
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional water-closet,	3 00
For hopper water-closets, special rates will be made.	
Where bath-tubs or water-closets are used by more than one family, for each family,	4 00
Where two faucets are used, one for hot and one for cold water, both emptying into one basin, but one charge will be made for both. *Provided*, that in no case shall the	

charge for the use of water by a private family, exclusive of hose and stable, be more than	$25 00

BOARDING-HOUSES.

For the first faucet,	10 00
Each additional faucet,	2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

STORES, OFFICES, WAREHOUSES, ETC., NOT INCLUDING MANUFACTORIES OR WORKSHOPS.

First faucet,	$5 00
When two or more tenants are supplied from the same faucet, each,	4 00
Water-closet used by occupants of one tenement only,	5 00
When used by occupants of more than one tenement, for each tenant,	4 00
For each additional faucet or water-closet, half of above rates will be charged.	

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water,	$5 to 25

HOTELS.

For each bed for boarders and lodgers,	$3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

PUBLIC BATHS.

For one tub in public bath-house,	$10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water-closet,	3 00

STABLES.

Private stables.	For the first horse,	$5 00
"	For each additional horse,	4 00
"	For one cow,	2 00
"	For each additional cow,	1 00
Livery, club, and boarding stables.	For each horse,	3 00
Car and omnibus stables.	For each horse,	2 00
Truck and cart stables.	For each horse,	2 00
Provided, that in no case shall any stable be charged less than		5 00

The rates for stables include water for washing carriages without hose.

HOSE.

For hose of not over three eighths inch orifice, used for washing windows, sprinkling streets (and the use of the same shall be limited to one hour per day), not less than	$3 00

STEAM BOILERS.

For each boiler in use not over twelve hours a day, for each horse-power,	$6 00

BUILDING PURPOSES.

For each cask of lime or cement, 6 cents.

HYDRANTS.

Hydrants set by the town at the rate of $28 each, allowing one hydrant to each 200 inhabitants.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners; and the rates fixed in the foregoing tariff may be varied by the Water Commissioners whenever in particular cases, in their judgment, the interests of the town shall require.

AUDITORS' REPORT.

The undersigned hereby certify that they have audited the books and accounts of B. DELMONT LOCKE, as Treasurer and Collector of the town of Arlington, also as Treasurer for the Arlington Water Works, for the year 1884, and find the same correct, with vouchers for all payments, and the balances of cash as stated by him.

DAVID P. GREEN,
A. WILLARD DAMON. } *Auditors.*

ARLINGTON, Jan. 22, 1885.

REPORT OF CHIEF ENGINEER.

To the Board of Selectmen of Arlington:

Gentlemen, — In accordance with custom and the rules of the town, I would respectfully submit my annual report for the year ending Dec. 31, 1884.

MEMBERSHIP.

The membership remains the same as that of last year, viz.: Thirty-seven men, and two substitutes to each Hose Company, and four to Hook and Ladder Company. The latter receive no recompense and fill vacancies as they occur. We find it difficult to keep the companies up with men who live in the vicinity of the department buildings.

FIRES.

We have had no serious fires during the year, and have answered seventeen calls, one of which was in Somerville. The losses from fire have been slight, and the citizens can certainly congratulate themselves on the slight losses and few fires, and may the future record of the town read as clear. The department has responded promptly to all alarms, and performed good service at all times, and I think will compare favorably with any in this vicinity with the conveniences here.

HOSE.

The hose of the department is in good condition, with the exception of some old leather. Three hundred feet of cotton hose have been purchased during the year, and in my opinion a certain amount should be purchased each year.

INCREASED FACILITIES.

I would call your attention to the unprotected condition of the upper and lower portions of the town, but, owing to the high rate of taxes, refrain from making any recommendations at this time.

BUILDINGS AND APPARATUS.

The lower story of William Penn House has been partially painted, and the upper story will require some repairs this year. The Highland House has received a bell for alarms, and a brick tank for washing hose, with minor repairs, and is now in good condition. The Hook and Ladder truck has been thoroughly repaired and painted. Hose 3 requires to be painted during the coming year.

APPROPRIATION.

I would recommend the sum of $2,500 to meet the expenses for the ensuing year.

PERSONAL RECOGNITION.

Feeling deeply grateful to your board, my engineers, and members of the department, I remain,

Very respectfully,

CHARLES GOTT,
Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

At the beginning of 1884 the Library still occupied the room in the Town House to which it was removed in 1873. During these years the number of books had steadily increased, and the space allotted to them had rapidly filled up. In 1880 the Trustees state in their report that "little room remains for further additions," and of course, as time went on, the difficulty became greater. It is safe to say that by the end of 1883 books could no longer be properly arranged, while the work of the Librarian and her assistants could be done only under most unfavorable circumstances. A few figures will best show the growth of the Library. In 1873 there were 3,362 volumes, in 1883 there were 8,565.

A similar change had taken place in the use of the Library; 15,597 volumes were given out in 1873; in 1883 the number was 26,199. How many different persons took out books in 1873 cannot be exactly stated, but the number could hardly have been much, if any, over a thousand. Ten years later, there were 2,090. The waiting-room, at first large enough, was often, of late years, uncomfortably crowded. In fact the library room was in every way outgrown.

Another disadvantage was the lack of a reading-room.

This matter is spoken of at some length in another part of this report. It is sufficient to say here that the Trustees had often recommended the establishment of a reading-room, and several committees on the subject had been at different times appointed by the town. Probably all practicable ways of enlarging the library room in the Town House were many times considered, but the general feeling was, that such a change, necessarily involving the removal of the post-office or the crowding together of the town offices, would only annoy the public, without much benefiting the Library.

In the latter part of 1883 the plan for removing the Library to Swan's Hall was laid before the Trustees, and received from them careful attention. It was reported to the town by the Reading-room Committee, consisting of the selectmen and Trustees, at the last annual meeting, and the town voted with substantial unanimity that it should be carried out.

By the provisions of the lease entered into according to the vote of the town, the hall is hired for five years from July 1, 1884, at an annual rent of four hundred dollars. At the end of the term the town has the right to renew the lease, if it chooses, for five years more, at the same rent. Such ante-rooms as are not needed may be sublet, and, in fact, two of them are now so occupied.

The removal took place in the early part of July. The usual examination was made at the same time, so that the public might not be put to unnecessary inconvenience. Indeed, the work was pushed forward so rapidly that books were given out as soon as they would have been if the Library had not been moved.

The hall was found so well adapted to its new purposes that few changes have been made. It has been divided, by

low partitions, into three rooms. The first of these is furnished with a table and settees and serves as a waiting-room. Next comes the reading-room. Along its sides are cases in which will be kept books of reference and the bound volumes of magazines. On the two large tables in the centre of the room the newer periodicals will be placed. These two rooms together occupy the eastern part of the hall. The rest of the space is taken up by the book-room. Here are the book-cases, and here is done cataloguing, repairing, and the many kinds of work necessary to the proper carrying on of a library so much used as ours.

The experience of the past half-year has confirmed the Trustees in their opinion that the town acted wisely in making the change. While space is gained in the Town House, which may be used in such ways as are deemed best, the Library is placed where it has ample room for growth, and in a hall, in most respects, as convenient and attractive as if originally designed for the purpose.

As above stated, the Trustees and others interested in the Library have felt that without a reading-room it could not perform an important part of its duty to the community. It may be well to mention shortly some of the reasons for this belief.

In the first place, there are many books which are not meant to be read through, but to be consulted for information on special points. Such books are cyclopædias, dictionaries of biography, and the like. If these are to be used to any extent, experience shows that they must be kept where readers can examine them easily. Otherwise they will ordinarily remain idle upon the shelves, for very few persons are willing to carry home a bulky volume in order to search it for some-

thing which, at best, forms but a small part of its contents, and which very possibly does not appear in it at all.

Again, a reading-room is necessary in cases where it is desired to look at several books on the same subject. An example will make this clear: Suppose a boy in one of our schools is studying the history of the War of the Revolution. He comes to the account of the treason of Arnold. He wishes to find out more than the school books give about that very striking and interesting event. The Library has, perhaps, a dozen books of history or biography which will help him. Obviously, he ought to have the chance to look over them all, so as to see which one is best suited to his needs. In this way he not only gets the special help which he is seeking, but also makes the acquaintance of several wholesome books, some of which he may be glad to read afterwards. But if, as was particularly the case in the old room, the Library furnishes him with no place where he can examine the books, he has to take out some one volume at a venture. It may or may not serve his immediate purpose; in any case he has lost the good which always comes from comparison and selection among several accounts of the same thing.

Papers and magazines — daily, weekly, or monthly — cannot be used to any extent unless within the Library. If these have to be taken out like books, but few persons have a chance to see them while they are new. As this class of reading matter is both good in itself, and, perhaps, more universally popular than any other, the Library ought to make it generally accessible, — a result which can be reached only by means of a reading-room.

Apart from these special needs which a reading-room sup-

plies, it is in many ways a convenience to readers; and anything which makes a library more attractive, at the same time makes it more widely used.

For various reasons it was thought best not to open the reading-room formally until the last part of December. The use that was made of it even before that time showed clearly how much it has added to the advantages of the Library.

Work upon the card catalogue, the beginning of which is mentioned in the last report, has been continued during the present year. To understand fully the plan of this catalogue and to appreciate the skill and labor involved in making it, one should visit the Library and examine the part already finished. Its purpose is to enable those who consult it to find readily whether the Library contains any particular book, or what books or parts of books it contains by any given author, or on any given subject. Its two main advantages over a printed catalogue are that it is much more full than a printed catalogue can be made without great, and, in most cases, unjustifiable expense, and that it is always up to date. The completion of the card catalogue will not make the present catalogues useless. They will still serve many purposes; the card catalogue will supplement, rather than replace them.

A suitable case has already been obtained, and probably in a short time the work will be so far advanced as to allow the use of the catalogue by the public, although some time must needs elapse before the whole Library is catalogued.

The system of a weekly delivery of books at Arlington Heights has been continued during the colder months of the year, and has proved of much convenience to persons living in that part of the town. The credit of this extension of the

advantages of the Library is mainly due to Mr. E. B. Bailey, who has taken charge of the books sent. The Trustees are also under obligations to the editors of both local papers, who have shown themselves always ready to publish lists of new books and other items concerning the Library, and have given complete files of the *Advocate* and *Townsman*. A number of other gifts have been received, among which should be mentioned several of especial value and interest from Rev. E. G. Porter, of Lexington.

The Library is now a valuable collection of books. With the added facilities which the new rooms give, there is every reason to expect that its usefulness will continually increase. It furnishes every year a great deal of pleasure and benefit to our community, and well deserves the steady support that it has received from the town for nearly half a century.

JAMES P. PARMENTER,
For the Trustees.

DEC. 31, 1884.

LIBRARIAN'S STATEMENT.

LIZZIE J. NEWTON,
Librarian.

ARLINGTON, Dec. 31, 1884.

SCHOOL COMMITTEE'S REPORT.

To the Town of Arlington:

In compliance with a well-known provision of our State law, the School Committee submit their annual report.

In doing so they sincerely regret losing for a time the valued services of their faithful and efficient chairman, who after a sudden and complete physical prostration, is now believed to be rapidly regaining health and strength to resume his duties in town, and in connection with this Board. The regular monthly meetings of the Board have been uniformly well attended, and their sessions perhaps protracted with a zeal beyond discretion. Visits have been made to the schools as frequently as the demands of business would permit. The various matters needing attention have been looked after with reasonable diligence, and it is confidently hoped that our schools are now in a good and prosperous condition, with bright prospects for the future. Events have more than justified the wisdom of the town in granting, at the last annual meeting in March, an ample appropriation for the purpose of making repairs much needed and long neglected. It is certainly a matter of the first importance to provide comfortable and commodious quarters, where the children of the town may assemble without detriment to their health, and pursue their studies under the most favorable circumstances. A considerable amount of money has been ex-

pended by the prudential committee having this matter in charge, with a view to the best results and a proper economy, and it is with pleasure that we are able to report the buildings, with one exception to be noted later, in a satisfactory condition. We are confident that inspection will secure approbation. In the Crosby School new floors have been laid, in both the upper and lower rooms and entries and on the stairways. It is now no longer possible to drop a slate pencil through the floor into the cellar below. This change has added much to the comfort and appearance of the rooms. New seats and desks have been placed in the lower room. The building has been painted with two coats, both inside and out. In the Russell School nothing of importance was done, because nothing of importance needed to be done. The outlays of previous years were so judiciously managed, and the work so well and thoroughly done, that the entire building and all its appointments are in good order, and it required only thorough cleansing and the slight repairs incident to any building constantly in use. The High School building has been entirely painted over on the inside, the roof reshingled, new ventilators put in, and the partition in the lower story so moved as to make two rooms of equal size. This very desirable change meets with universal approbation, and the wonder now is that it should have been so long neglected. In connection with it, a number of small jobs were done in various parts of the building which need not be enumerated.

A report from this Committee which did not contain some remarks about warming the High School building would be fatally imperfect. We therefore announce a large and long-continued activity in this matter. A new steam-heating ap-

paratus has been put in, which it was confidently expected would give the most delightful temperature in all kinds of weather. These expectations have not been realized, and as the contract with the firm providing the apparatus stipulated that it was not to be paid for until found satisfactory, the prudential committee are waiting results. In the mean time the scholars continue to experience the usual discomfort from cold, and it is found necessary at times to discontinue the school, while in two instances serious illness has resulted from remaining too long in the building. Comment is unnecessary. In the language of a previous report, "absolute comfort can come only with a new house." It appears to have been the inclination this year, as in other years, of all concerned, to do as little as possible on this building.

The back halls and stairways cannot, it is feared, be economically heated, or with any ordinary contrivance be warmed sufficiently even for passage-ways, and the entrance halls, where outer garments and wraps are left, become at present so cold as to chill the scholars through while preparing to leave the building. It is still true, as it was in 1882, that both teachers and scholars are often compelled to retain outside wraps for from one to two hours or nearly half the whole session. This ought not so to be. The committee are convinced that there is but one effective and simple remedy for this condition of things, that is, a new and suitable building. The growth of the town, the larger number of children now being educated in our schools, the increased number of teachers employed, and the unusual size of the present junior class in the High School, all these conditions point to a time not far distant when the demand will become quite imperative for new and more commodious quarters. It seems

almost inhuman to ask scholars to remain where it is both uncomfortable and unsafe. When the new building is ready, a large fund has been set apart by wise generosity for furnishing and decorating, and making it an ornament to the town, and a refining influence upon those who may study within its walls.

The Cutter School has received new platforms and steps outside. Additional plumbing has been put in, and the ordinary repairs attended to. The furnaces especially have been overhauled and are in good order.

In the Locke School the seats and desks formerly in the east room in the lower story have been removed into the unoccupied room in the upper story, connections have been made with the furnace, and this desirable room put in satisfactory condition. A new well, supplying abundant and wholesome water, has been dug, and provided with a pump. Outbuildings have been carefully looked after and improved, and a new stone landing to the outside steps placed in position.

The operation of the new text-book law, under which towns are required to provide all scholars with books in use in the schools, and which was passed to take effect Aug. 1, 1884, has proved thus far entirely satisfactory. It is a provision quite in accordance with republican institutions. Every pupil is supplied with a book in good condition, and it is the testimony of one of our masters, that scholars exercise commendable care in keeping their books in good order, according to the rules and regulations of the Committee. The matter of providing these books has been diligently attended to by the subcommittee on text-books, to whom it was referred; and especially by the secretary, whose promptness and efficiency have done so much to make the measure successful and popular.

An account is opened by the master of each building, both with the committee from whom books are received, and with the pupils to whom they are loaned. When no longer required, all books are returned, inspected, put in order, those unfit for use replaced, and thus the supply prepared for redistribution. A detailed account of the books purchased by the Committee, under authority of this law, and now in use in the schools, will be found in a supplement to this report. In this connection it should be stated, that the books introduced during the year for supplementary reading are used with good effect. It is believed that the very best results may be secured by such additional reading matter as will practise scholars in clear, correct reading, and cultivate the higher and finer powers of thought.

The following are the names of new teachers employed during the year to fill vacancies occasioned by resignation. In the High School, Miss Laura M. Ball; in the Russell School, Miss Elizabeth B. Blake, second division, sixth class; Miss Mabel E. Blake, third primary; Miss Elizabeth L. Geer, first primary; and Miss Elizabeth A. Day, assistant in third primary, and to serve as general substitute teacher. In the Cutter School, Miss Clara A. Farwell, sixth class; and Miss Mary M. Brady, first and second primary. Of the retiring teachers, we are able to say in general that their service has been rendered with great faithfulness, and marked by a good degree of diligence and success. Pupils under their care have been promoted from grade to grade, and many of them are now in the higher classes of the Russell School, giving proof of thorough training in the lower departments.

Not intending to make invidious comparisons, it is only just to say that the schools have sustained great loss in the

removal of a teacher so admirably calculated to command the respect and love of her pupils as was Miss Louise E. Schouler, whose resignation, after twelve years of service, an unusually long term, was most reluctantly accepted. It was always a pleasure to visit her school. Miss Evelyn R. Fessenden, who taught for a number of years in the third primary, one of the most important rooms in the building, is also to be mentioned with special recognition, as peculiarly happy in her methods, and most successful in winning the love and esteem of both pupils and parents. In these rooms the visitor was always sure of finding model schools. In the High School a great loss was sustained in the removal of Miss Marie D. Elliot, a teacher of remarkable vigor and robustness of intellectual power. Having received a flattering invitation to a prominent position in the city of Washington, she left our school after one year of service.

The teachers employed to fill positions thus vacated are in general doing good work, and the Committee look forward with reasonable satisfaction, believing that the service rendered will improve from year to year as they become more familiar with the situation and the special demands of Arlington schools. There is an evident desire to learn the best methods, and a willingness to receive suggestions. The appearance of the schools, the work being done, the results secured, the relations between scholars and teachers, and the general aspect of affairs, indicate an intention to avoid routine and mechanical work, and manifest a spirit of earnest and thoughtful activity. We are thus able to congratulate the town on a full and harmonious corps of instructors, and to anticipate with considerable confidence another year of continued prosperity.

Having given some account of the buildings, the free text-books, and the corps of instructors, it now remains to observe that the work being done in our schools is generally satisfactory. Nothing, however, but personal visitation can sufficiently acquaint our citizens with what is daily going on in these buildings. We can only earnestly reiterate the invitations given in former years, saying to parents and friends, come and see for yourselves.

It is gratifying to report that one of our masters has received during the year a larger number of visits than usual, and it is earnestly hoped that this increased interest is the beginning of a more lively concern upon the part of citizens in school affairs.

During the year there has been a partial revision of the course of study in the grammar schools. After mature deliberation and full conference between the subcommittee on revision of the course of study, and the masters of the schools, a newly arranged curriculum was agreed upon, and experimentally adopted for the year. The course of study in use up to this time was most carefully prepared some years ago by experienced and successful teachers, and has well served its purpose. During these years many changes have been introduced elsewhere and approved, and it was thought that the time had arrived when some modifications might wisely be adopted. The changes made were not great, consisting for the most part in resorting to more modern methods and greater simplicity. Actual weights, coins, and measures, such as are used in the stores and warehouses, have been put into the rooms, so that the pupils can have a visible demonstration of many things that were before taken on trust. Information has come to the Committee that these

changes, and the revised course of study, are working to advantage. It is hoped that before the beginning of another year the work thus begun may be completed, and the schools supplied with a well-considered and practical course of study, embodying the latest and best results, and giving to our scholars all the advantages of the most approved educational methods.

In our graded system of schools it is of course intended and understood that each year shall provide only such an amount of assigned work as can be accomplished by the average pupil who is regular in attendance and reasonably diligent in application. What this amount of work shall be is not easily determined, and even with the most judicious apportionment much must be left to the skill and discretion of the instructor. True education is not a process of cramming the mind with facts and statistics. The result aimed at is not a certain amount of information acquired, but a disciplined mind and cultivated power of thought. The remark made to the writer of this report by one of our most experienced and successful teachers, that in order to go over the ground she was obliged to drive her scholars, "giving them no time to breathe all day long," reveals a condition of things most unfavorable to fine mental training. By such a process the energies of the mind are scattered, dissipated, and weakened. It is penny wise and pound foolish. It is a sacrifice of breadth and power to the small business of looking after and memorizing petty details, and filling the mind with useless lumber, by which its own action is embarrassed and weakened.

Closely connected with this difficulty is another concerning the test of promotion. This, as is well known, has hitherto

been by a written examination at the close of the school year, in which the pupil must have given a certain percentage of correct answers. As a criterion this test is notoriously unreliable. It was intimated in the admirable report offered last year, that the Committee might not unlikely determine to set aside the final examination, or to receive it only partially as a basis of promotion. It is the testimony of our best instructors that the test system is attended with many serious disadvantages. Scholars are thinking for weeks of successfully passing the test rather than of understanding the work done. They become nervous and excitable. In one instance mentioned to the writer, a bright boy and good scholar, on looking over the paper containing questions, was ready to cry with vexation, not because he failed to understand the principles involved, but because the problems were so stated as to mislead and perplex. This amounts to asking a pupil first to solve a puzzle, and then to show that he comprehends the principles gone over.

The attention of the town is earnestly called to the fact that a special difficulty presents itself in connection with the classical department of the High School. The amount of work required of scholars preparing for colleges and higher institutions has been steadily increased for a number of years, until now it happens in our own High School that pupils wishing to prepare for college are required to do in four years the same amount of work for which, in all other similar institutions they are allowed five. It is a matter of general surprise, and shows exceedingly effective instruction and diligent labor on the part of pupils, that former classes, under this disadvantage, have invariably passed successfully the most rigorous examinations. It is thought to be time that a

remedy for this condition of things be applied. Justice to those who are seeking preparation for admission to college demands that they be allowed as much time as is thought best and needful in other towns. It is the assertion of a former master, that this change cannot long be deferred, and that the present continuation of it is a positive detriment to pupils. One of the best scholars now in attendance has, at the earnest desire of her parents, seriously considered giving up the course, because the pressure seems greater than can longer be endured.

In speaking of the work done in our High School, it may not be out of the way to repeat once more the trite remark, that it is of vital importance, especially in a republic, that higher education be accessible to the poor as well as to the rich. Great intellectual gifts are sometimes discovered in the most unexpected places. The choicest jewels are found in humble settings. From the obscurest homes have come forth those whose names will shine with undying lustre. In this land there is no privileged class. Among those who have been raised to the highest position in our government, two especially prominent and especially honored, leading the nation through the dark days of civil war and the confusion of the earlier period of reconstruction, and whose names will ever be remembered with gratitude, — these two were born in log-cabins, of a parentage so obscure that its origin can scarcely be traced. Both these men, after early struggles, availed themselves of common schools and high schools, and in these schools obtained preparation for the honorable positions afterward filled. It is because other boys like these may be growing up in any community that we cannot afford to curtail or limit the advantages offered in our high schools.

They are peculiarly the avenues through which the humblest may rise to great distinction and usefulness.

In an address upon "The High School in its Relation to Business Life," delivered by Mr. Eustace C. Fitz, president of the Boston Board of Trade, before the Massachusetts Association of High School Teachers, last April, I find the following statements. Coming as they do from a practical business man, who is also the president of the Board of Trade, they seem worthy of special consideration. His object is to show that such training as our high schools afford is a decided advantage to young men entering upon business. Thus he says: "I should much prefer as a clerk a young man at 18 or 19, who had taken a high-school course, to the same individual at 14 or 15 on his graduation from the grammar school. I am sure he would have more mental grasp and learn with greater facility. And this preference is based upon actual experience and close observation, extended over a long term of years. The structure of a mercantile life will stand better on a broad base than on a narrow one."

Again he says: "In my judgment no young person who contemplates a business life can afford to dispense with a high-school course, provided it is within his reach. You hear business men on every hand regretting that their early opportunities for education were so limited. This is because they recognize how much more enjoyable are wealth and position when accompanied by a fair degree of mental culture."

At the conclusion of this address, the following question was asked by Mr. Bunker, of Roxbury: "I should like to ask Mr. Fitz if he considers that, in what he has said, he represents the majority of business men, or is it only the minority

who agree with the views he has expressed?" The answer by Mr. Fitz was: "I think I have expressed the opinions of a decided majority of our business men. I am sure that merchants have a high respect for intellectual power, and I notice that they usually desire to give their children all the education the latter incline to take. Within my circle of acquaintance, the cases are very rare where parents are willing to have their children stop short of a high-school course." The value of these opinions is that they are the carefully considered and deliberately expressed convictions of one who has "had actual experience and close observation, extended over a long term of years." It is to be wished that the address might have a large circulation. "In conclusion," he says, "I am convinced that our high schools are doing excellent work; that they have a grand mission before them; and that the day will never come in this Commonwealth when the people will be willing to lower the standard of instruction, or will fail to recognize the merit of the teachers."

It is becoming each year more and more apparent to the Committee, that one great need of our grammar schools is a judicious and comprehensive supervision. It must be evident to all practical men, that so large an enterprise as the system of schools in a town like Arlington cannot wisely be carried on, save under the direction of skilled and competent superintendence. If this is true of a mill where they make cloth, it is certainly true of schools where they make men and women. Such is the universal testimony of all experienced and successful masters. Without such supervision the best results cannot be secured. It may not always be necessary or wise to employ a special superintendent of schools,

but in some way this end must be accomplished. In such a town as our own, let the masters have supervisory authority over the schools in their respective buildings and districts, and probably we should secure a practical, economical, and at the same time effective administration. To do this it would of course be necessary to furnish each master with an assistant teacher, or to make some arrangement by which he could be so relieved from the care of his own room as to be able frequently to inspect other schools. This would certainly cost less than the employment of a special superintendent, and might be quite as desirable and judicious.

The upper classes in the grammar schools are reported as being in need of a large number of reference books, and the question is asked whether it might not be wise, before another year, to see what can be done in the way of starting a library for the Russell and Cutter schools, one in each building. The members of the classes to be graduated this year from the Russell and Cutter schools give promise of continuing the good record maintained in the past. It is believed they will enter the High School with honor. The spirit manifested by most of the scholars during the past year has been an excellent one. There have been few cases, if any, of extreme insubordination. It is, however, feared that there are some cases of truancy which, if continued, may require special attention.

All our schools, especially in the lower departments, have been greatly disturbed this year, during the winter months, the work being seriously interrupted, by prevailing forms of contagious disease. In some classes the interruption has been so serious as to cause apprehension that the work of the year cannot be completed. Scarlet fever and diphtheria,

two terrible diseases, have been extraordinarily prevalent. This report comes from both the Cutter and the Russell schools, and it is doubtless also true of the Locke and Crosby schools.

The change of time in opening and closing the afternoon session in the grammar schools, meeting at half past one and closing at half past three, has been found to work very satisfactorily, and may become a regular winter arrangement. After some considerable discussion, and an endeavor to ascertain the wishes of the people, it was thought best to close the school year one week earlier in June than has hitherto been the custom, thus reducing the school year to forty weeks, and making it equal in length with the school years in the towns around.

The Committee deem it unnecessary to give a detailed account of the condition of the various schools. Everything seems to be moving on smoothly and harmoniously, with but little adverse criticism. The Cutter and Locke district is believed, by the subcommittee in charge, to be in a very satisfactory condition. The manifestations of disorder and insubordination which prevailed there in former times have decidedly abated, if they have not altogether disappeared. Good results are being secured, and the promise for the future is all that could be desired.

The Crosby School speaks for itself, and we would be pleased to have friends call and observe how quiet and well ordered are all the arrangements and regulations of the various classes in that building.

The Russell School is fully justifying the anticipations entertained of its continued usefulness and prosperity at the time when it was put under the present management. We

feel confident that a visitor to that building will not fail to be, on the whole, pleased with the appearance of the scholars and teachers, and satisfied with the character of the work done. In general, the schools of Arlington compare favorably with schools of the same grade in other towns and cities, and there is especially a marked inclination to be up with the times; to adopt all that is good and approved in modern methods, and to give scholars every advantage which could be enjoyed in the most favored localities. The instruction given in music and singing continues entirely satisfactory to the subcommittee on music. Indeed, we may go further, and say that the results and the methods are more than usually successful. This department of school work is in a condition leaving little to be desired.

In view of the considerations now submitted, especially the increased number of children in the schools, the greater number of teachers needed, the growing necessity of a wider supervision of the different grades and the provisions of the free text-book law, we think it must be evident to all that the town should be prepared to vote a liberal appropriation to carry on this most important branch of the public service, and to make it more than ever tributary to the general growth and prosperity of the town. In conclusion, the Committee would say, that they have endeavored faithfully to discharge the duties of their stewardship; that they now appeal with confidence to the continued sympathy and support of their fellow-citizens, and express the abiding conviction that Arlington will in the future, as in the past, continue to stand in the front rank of those towns that favor, and in all practical ways promote, the cause of sound and useful learning.

EDWARD B. MASON,

SELECTMEN'S REPORT.

Herewith is presented the Annual Report of the Selectmen for the year ending Dec. 31, 1885:

Highways.

Amount appropriated by the town,	$11,000 00
" " for sidewalks,	500 00
Received for labor, stone, gravel, etc.,	1,340 70
	$12,840 70
Expended,	12,644 74
Balance unexpended,	$195 96

The total number of loads of stone and gravel used on the roads is 7352, and has been distributed as follows, viz.:

Arlington Av.,	1,946 loads	Hillside Av.,	421 loads
Academy Street,	26 "	Highland "	12 "
Appleton "	36 "	Lake Street,	1,999 "
Bow "	6 "	Lowell "	56 "
Broadway,	93 "	Mystic "	138 "
Brattle Street,	48 "	Medford "	8 "
Chestnut "	10 "	Mill "	78 "
Decatur "	202 "	Maple "	4 "
Forest "	480 "	Mt. Vernon Street,	353 "
Gray "	14 "	N. Union Street,	206 "
Grove "	12 "	Oak Street,	40 "

Park Av.,	218 loads	Summer Street,	26 loads
Pleasant Street,	154 "	Vine "	80 "
Park "	46 "	Walnut "	222 "
Pine "	192 "	Winter "	26 "
Pond Lane,	28 "	Westminster Av.,	94 "
River Street,	6 "	Wollaston "	72 "
Total,			7,352

Arlington Avenue.

That portion of the avenue between Water street and the residence of Fred. E. Fowle, Esq., and a section near Teel street, have been thoroughly repaired by crowning with fine crushed stone and gravel.

It will be unnecessary for us, at this time, to call your attention to the other portions of the avenue; that repairs are needed thereon is apparent to all.

That portion near Lexington line, and a short section near Park avenue, have never been macadamized, and require immediate attention.

Academy Street.

A catch-basin has been put in, and drain pipe laid through land of and into pond of M. N. Rice, Esq., which has partially remedied the trouble heretofore experienced, but it is not yet quite satisfactory. So much water coming from different directions to this one point, we think, requires another or larger catch-basin. That part of the street opposite the property of John H. Hardy and W. T. Foster, Esqs., needs attention very much, as all water coming from Gray street and surrounding hills has to run to this point, and there is no outlet for it except as it overflows the sidewalk. We think if the town could arrange with Mr. Foster to lay a drain

pipe through his land of sufficient size to dispose of the water in this locality, it would prove a judicious investment.

Appleton Street.

This street, from the main avenue to Claremont avenue, has been repaired by use of road machine in clearing gutters and cutting down the shoulders of the street, and is in very good condition. Some portions of the street have no sidewalks, and a part of the street should be graded the ensuing season.

Broadway

Needs some repairs near the line of Somerville. The passageway from the street through Alewife brook should be fenced up.

Claremont Avenue.

Sidewalks are very much needed on one side of the street, the entire length, and in some portions on both sides. The crossings or gutters at the junction of Appleton street and Wollaston avenue should be concreted or paved.

Decatur Street.

That portion near North Union street has been repaired the past season, and the remainder should be attended to the ensuing year.

Eastern Avenue.

A sidewalk has been graded, and gutters cleared, from Park avenue to the top of the hill near Highland avenue. Some gravel will be needed on the hill this season.

Gray Street.

This street, accepted by the town at its March meeting, will need some outlay, as in its construction no gutters were formed, and the water has to find its way nearly the entire length through the middle of the street. Some repairs have been made near Academy street the past season.

Grove Street.

We can only reiterate what we said in our last report. Much trouble is experienced upon this street by the large amount of water coming from the main avenue. We can conceive no way to remedy this except by laying a drain pipe from the avenue to the brook near the saw factory, of sufficient size to receive the water from this street which collects in the hollow adjoining lands of J. Crowley and D. Hurley. By this method you would relieve the serious trouble both on the avenue near the residences of W. H. Richardson and others, and the outlets below Schouler court, which are all now inadequate at times to take all the surface water coming from the hills.

Highland Avenue.

The gutters have been cleared. Some gravel is needed upon some portions of the street.

Hillside Avenue.

That portion of the street and sidewalks between Florence and Oakland avenues has been thoroughly built the past season. This was the worst part of the street to be built, as it is springy and the loam and stones had not been removed. Other portions of the street might be completed in the Spring.

Jason Street,

Accepted by the town last Spring, needs crowning with gravel, as so much loam was used in its construction that heavy teams cut it up badly in wet weather. A sidewalk has been graded upon one side of the street to the new house of Mr. A. L. Teel.

Lake Street

Has been thoroughly repaired from the main avenue to the R. R. crossing, with stone and gravel. The remainder of the street is in very bad condition, and we recommend that it be treated in the same manner to the Belmont line.

Lowell Street

Needs some crowning with stone and gravel near the Lexington line.

Mt. Vernon Street.

The gutters have been cleared and the street regravelled the entire length, and it is in excellent condition.

Mystic Street.

As reported last year, the hill on New Mystic (so called) needs to be repaired with stone and gravel. A section opposite the Niles estate needs to be repicked and rolled. As that portion of Old Mystic (so called) from the estate occupied by C. W. Bastine to the foot of the hill is seldom used, we would suggest that it would be well for the town to discontinue the same.

North Union Street

Has been repaired near Decatur street by raising the hollow with gravel. Gravel is needed on it near Broadway.

Prospect Street.

A street at the Heights, recently accepted by the town, has been rough graded, and will require some repairs.

Pond Lane.

Much trouble has been experienced heretofore on this street by the overflow of the water-grate at the junction with the main avenue. A second catch-basin and water-grate have been put in the past season, which we think will prevent further difficulty.

Park Avenue.

Considerable repairs will be needed upon this street the ensuing season.

Pleasant Street.

Quite extended improvements are needed upon this street. A system of drainage for the surface water on some portions should be devised, which, we think, can be easily done without damage to any of the abutters, by slightly reducing the grades; the street could then be put in excellent condition, at a reasonable expense, by the use of fine crushed stone and gravel.

Pine Street.

This street, which has so many times been referred to the Selectmen, has been repaired, the past season, by blasting

out the ledge on the hill near its junction with Summer street, and by building a bank wall, and raising the street about two feet in the hollow beyond. It is now in very good condition.

River Street.

This street needs repairs its entire length, and the construction of a sidewalk at least on one side, in order to render it passable during the winter season, for children who attend school at the centre and those living in that vicinity.

Spring Valley

Will require repairs the ensuing season.

Walnut Street.

The gutters have been cleared and the street regravelled the entire length, and it is now in good condition. A catch-basin has been put in at the foot of the street, and a drain laid from thence through land at the Highland Hose House to the brook, thus relieving the gutters on the avenue which had to receive the water before.

Wollaston Avenue.

A sidewalk should be constructed at least on one side of the street. Some portion has been graded the past season and the washouts upon the street have been repaired.

Westminster Avenue.

A short piece of sidewalk is needed near the residence of Wm. J. Quinn.

Watering Streets.

The same routes have been watered as last year. Calls have been made to water Mystic and other streets, but as we have no more carts than will cover the present routes, the cost of building new ones, together with erecting stand-pipes, did not warrant undertaking any more watering the past season.

Bridges, Culverts and Catch-basins.

The River street bridge has been replanked this season. Eight water-grates have been set, and six blind wells or catch-basins have been put in. Drain pipe has been laid across Broadway and Warren streets, taking the water from that locality into the gutter on River street.

Guide or Sign Boards.

Seven new boards have been put up the past year. Several are in poor condition, and some have been torn down and destroyed by malicious persons, and will need to be replaced the ensuing year.

Railings.

Railings have been put up on Lowell street, near the residence of John Brady, and a section on Mystic street. Several railings in different parts of the town will require repairs soon.

Stone Crusher and Stone.

The crusher is in good condition, except that a new belt will soon be required. The building should be shingled on one side at least the coming year. We have quite a quantity of stone piled in the yard, ready for crushing, which has been

taken from the gravel banks. More will be required than we now have on hand.

Teams and Tools.

The tools are in as good condition, natural wear excepted, as last year. Three new horses have been purchased; the carts, harnesses, etc., are in good condition and well cared for, so that the actual value of teams and tools is fully equal to that of last year.

Almshouse.

As in former years the almshouse has been under the charge of Mr. and Mrs. Geo. W. Austin, who have given perfect satisfaction in the management of the same.

The buildings, furniture and fixtures are in good condition although some repairs are needed both on the exterior and interior of the house and stables.

Amount of appropriation by the town,	$1,600 00
Received for board and products sold,	418 98
	$2,018 98
Expended for supplies, repairs, etc.,	1,872 03
Balance unexpended,	$146 95

Whole number of inmates for the year,	10
Present number,	6
Number of tramps fed and lodged,	309

Outside Poor.

Appropriation by the town,	$2,000 00
From income from poor widows' fund,	460 00
	$2,460 00
Expended,	2,458 64

Street Lamps.

A contract was made for one year, from May 1, 1885, with the Wheeler Reflector Co., to furnish light for the lamps previously lighted by the Globe Gaslight Co., and they have thus far given satisfaction. Eight new lamps, lighted by this company, and two new gas lamps have been added.

The Arlington Gaslight Co. now furnish gas for 85 lamps, and the Wheeler Reflector Co. light 122 lamps.

The lamps are under the charge of Mr. James H. Fermoyle.

Coal.

As usual, letters were issued requesting bids for supplying the town with coal. Mr. Warren A. Peirce being the lowest bidder, to him was awarded the contract; price, $4.90 per ton.

Cemeteries.

At the annual meeting in March last, a committee was chosen to have in charge the Cemeteries, and to their report we would refer you.

At this meeting, also, an appropriation of $125 was asked for, and granted, for the purpose of building a stone wall between the cemetery on Pleasant street and the estate of Nathan Robbins, Esq., the same to be expended under the direction of the Selectmen, but upon investigation it was found to be entirely insufficient. Mr. Robbins, with his usual liberality, came forward and built the wall at his own expense, with the exception of the capping, which was put on by the town at a cost of $135.90.

Town Debt.

$21,000 of the town debt has been paid this year.
$5000 falls due June 1, 1886.

Town House.

Last year your attention was called to the condition of the town house. We regret exceedingly that we are unable to speak of its improvements.

During the past year a careful examination has been made of the exterior, more especially the tower or cupola, and, in our opinion, the roof can never be made tight while the tower remains at its present height. The resistance to the force of the wind is so great as to cause a swaying motion, thereby opening many crevices through which the snow and rain can easily find their way; and while such is the condition of the roof and tower, it would be folly to attempt any extended repairs on the interior.

To obviate this difficulty, in the opinion of your board, no other way remains but to reduce the height of the tower down to the balustrade; the remainder can then be made tight. That there are, or will be, objections to this, we have no doubt,—as in so doing the architectural beauty of the roof would be somewhat marred,—but whether it would be more hideous to look upon than the present condition of the interior is a question. On some portions of the exterior the mastic has already begun to cleave from the brick-work, more especially on the east side; and had the building been oiled, as thought of, the result would have been a still larger falling off of the mastic. To make a thorough and complete job of it, the loose places should be cleaned off and repaired and then thoroughly paint the whole.

We would call your attention to some of the needed repairs on the interior of the hall; the ceiling should be

whitened, the walls tinted, new carpet for rostrum, and new floor laid.

In that portion of the basement used as the "Lock-up," the cells should be re-arranged; there is but one that can be used at all times, the hot-air pipe from the furnace passing through the other renders it almost impossible to remain there. The space now occupied by two cells would be sufficient for four if they were made to open into the large room instead of into the corridor, as at present.

We have thus endeavored to give in detail what many of you were fully aware of, what is actually necessary to be done to the building, as a matter of economy, leaving it with the town to do as they think best.

Police.

The force consisted on the first of January, 1885, of Eugene Mead as chief, Garret Barry and M. J. O'Brien as patrolmen. These gentlemen were re-appointed at a meeting of the Selectmen in March, and in April Mr. Wm. O. Austin was appointed as a regular officer; and in consideration of the large territory which they have to cover, we would say that the force as now constituted have performed their duties in a very satisfactory manner. For particulars of this department we refer you to the Chief's Report, as follows:

To the Honorable Board of Selectmen:

GENTLEMEN—I herewith submit to you the Annual Report of this department for the year ending Dec. 31, 1885:

Whole number of arrests during the year, 95. Males, 86; females, 9.

Breaking and entering,	1	Drunkenness,	38
Disobedient child,	1	Disturbing the peace,	13
Larceny,	10	Assaults,	13

Malicious mischief,	1	Keeping liquor for sale,	1
Bastardy,	2	" " nuisance,	3
Cruelty to animals,	2	Exposure of person,	1
Insane,	1	Wilful trespass,	5
Vagrants,	2		—
Illegal transportation of liquor,	1		95

In the cases of liquor nuisance, one was fined seventy-five dollars and costs, another one hundred dollars and four months in the House of Correction, the other was placed on file, and a fine of one hundred dollars imposed, for keeping for sale. Quite a number of complaints for assaults, etc., have been investigated where no arrests were made.

Five lost children have been found, cared for, and returned to their homes.

April 1st Wm. O. Austin was appointed as a regular officer, making three officers for night duty, which enables us to give the town much better protection than we otherwise could.

Three hundred and two tramps have been sent to the almshouse for lodging, and thirty-four have been lodged at the station.

EUGENE MEAD,
Chief of Police.

Fire Department.

We refer you to the Report of the Chief Engineer.

The Treasurer's Report will show a detailed account of the receipts and expenditures during the year.

Respectfully submitted,

GEORGE D. TUFTS,
JAMES A. MARDEN,
CHARLES T. SCANNELL,
Selectmen of Arlington.

TREASURER'S REPORT.

Amount deposited in Arlington Five Cents Savings Bank, as a High School Fund,	245 03	
deposited in Arlington Five Cents Savings Bank,	380 00	
		$992 58

Investment.

Town of Hopkinton's Note dated March 10, 1884, payable in 20 years, interest at 4 per cent., $19,000 at par,	$19,000 00	
City of Boston Gold Water Bonds, due Oct. 1, 1905, interest at 5 per cent., $5000, at 109,	5,450 00	
Deposited in Arlington Five Cents Savings Bank,	550 00	
		$25,000 00
High School Fund Income, deposited in Arlington Five Cents Savings Bank, with interest to Jan. 1, 1886,		$6,443 92

Respectfully submitted,

NATHAN ROBBINS,
WILLIAM G. PECK,
DAVID P. GREEN,
HENRY SWAN,
JOHN P. WYMAN,
B. DELMONT LOCKE, *ex officio*,

Trustees of Pratt Fund.

ARLINGTON, Dec. 31, 1885.

REPORT OF THE TRUSTEE

OF THE

"SOLDIERS' MEMORIAL FUND."

The Trustee of the "Soldiers' Memorial Fund" presents to the town the following, third annual Report:

No change has been made in the fund. It is still deposited in the Arlington Five Cents Savings Bank, and, with interest added to Jan. 1, 1886, amounts to eighteen hundred and sixty-five dollars and thirty-nine cents.

Respectfully submitted,

B. DELMONT LOCKE,

Trustee ex officio of Soldiers' Memorial Fund.

ARLINGTON, Dec. 31, 1885.

REPORT

OF THE

TRUSTEES OF THE ROBBINS FUND.

The Trustees of the "Robbins Fund" submit the following Report:

At the town meeting held Nov. 3, 1885, action was taken upon the following article in the warrant: "Article Seventh; To hear and act upon the report of the Committee appointed to consider the subject of the gift of Mrs. Eli Robbins to the Town of Arlington, of five thousand dollars, the income from which is to be used for the care of certain lots in the cemetery, and to adopt measures for the management and disposition of said fund."

Judge Wm. E. Parmenter made the following report for the committee; to wit:

To the Town of Arlington:

The committee heretofore appointed to take into consideration the subject of the gift of Mrs. Eli Robbins to the town, and to make recommendations thereon, report—

That the sum of five thousand dollars has been placed in

the hands of the Town Treasurer by Mrs. Robbins. She has also placed in his hands an additional sum of three hundred dollars to be regarded as one year's income from said sum, from which she desires that a bill due to Mr. Hartwell may be paid.

The committee recommend that the principal sum be established as a fund, to be lodged in the hands of Trustees for management and investment, and to that end they herewith report a plan for the organization of a Board of Trustees.

The committee further recommend that the said sum of three hundred dollars be at once applied by the town to the purposes for which the gift was made.

They therefore submit the subjoined motion for the action of the town :

First, That the gift to the Town by Mrs. Eli Robbins, following the wish of her late husband, of the sum of five thousand dollars, for the purpose of keeping in order certain family lots, and also the avenues and paths in Mount Pleasant Cemetery, shall be held by the town for such purposes, and shall constitute a separate fund, to be styled the Robbins Fund; which said fund shall be managed and invested by a Board of Trustees. Said Board shall consist of three citizens of the town, and the town treasurer for the time being. Said three citizen Trustees shall at first be selected by the town at the meeting held on the third day of November, 1885,—one for a term to end at the annual meeting which shall be held in March, 1887; one for a term to end at the annual meeting which shall be held in March, 1888; and one for a term to end at the annual meeting in March, 1889.

The town shall, at said annual town meeting, which shall be held in March, 1887, and at the annual meeting in March in each year thereafter, elect by ballot one member

of said Board for the term of three years; and at any meeting shall, by ballot, fill any vacancy in said Board which may exist by reason of the death, resignation, or removal from town of any Trustee, for the remainder of the term so made vacant.

The income from said fund shall be received and held by the Town Treasurer, to be expended under the direction of the town for the following purposes, namely:

To keep in order for all time the lot of Kimball Farmer, the father of Mrs. Eli Robbins; the lot of Nathan Robbins, the father of Mr. Eli Robbins, and the lot of Joshua Robbins, the brother of Mr. Eli Robbins,—all said lots being in Mount Pleasant Cemetery; then to expend such portion of said income as shall remain, to keep in order the avenues and paths in said Cemetery.

Said Trustees shall make a report of their doings to the town at the annual meeting in March in each year.

Second, That the sum of three hundred dollars be expended, under the direction of the Cemetery Committee—1st, to discharge the bill due to Mr. Hartwell; 2d, to defray the cost of whatever things it may be necessary to do in carrying out the purposes of the gift.

WILLIAM G. PECK,
HENRY SWAN,
WM. E. PARMENTER, } *Committee.*

It was voted that the foregoing report be accepted, and adopted. The following Trustees were elected by the town, namely: William G. Peck for the term expiring in March, 1889; Henry Swan, for the term expiring in March, 1888; Richard L. Hodgdon for the term expiring in March, 1887.

The sum of fifty-three hundred dollars has been received by the Trustees, and deposited in the Arlington Five Cents Savings Bank. The sum of three hundred dollars was

afterwards withdrawn from said Bank and paid to the town treasurer, in accordance with the vote of the town heretofore mentioned.

The fund remains deposited in the Arlington Five Cents Savings Bank, and, with interest to January 1, 1886, amounts to five thousand and fifty-three dollars.

WILLIAM G. PECK,
HENRY SWAN,
RICHARD L. HODGDON,
B. DELMONT LOCKE, *ex officio*,
} *Trustees of Robbins Fund.*

ARLINGTON, Dec. 31, 1885.

REPORT OF WATER COMMISSIONERS.

The Water Commissioners respectfully submit their Annual Report:

At the annual meeting in March, the commissioners were obliged to ask for a larger appropriation for interest on the Water Scrip than for the last three years, as, instead of having an unexpended balance as there had been for several years past, the treasurer was obliged to borrow $1400 to carry along the necessary running expenses and interest account, and the town appropriated $10,000 for deficiency on interest account and $800 for new main pipes, to be laid, where, in the judgment of the commissioners, the income from the water rates would warrant the expenditure, and also to relay main pipe on Arlington avenue near Medford street, and to connect the mains on Mystic with Medford street through Chestnut street.

The past year has proved conclusively that our present filtering capacity is insufficient, as during the summer and fall, when large quantities of water are used, the filters would not supply the demands, and therefore we were obliged to let the water on from the reservoir, and we now feel that some other means must soon be adopted to purify the water in sufficient quantities for the wants of the town. One way

would be, to clear out the present reservoir, another would be, to increase our present filtering capacity, making it about six feet deeper and enlarging the same. Your board have experimented, by driving pipes on the easterly side, and think that by digging a series of wells to the depth of fifteen feet we would get pure water in large quantities, which would be another way; but to utilize this plan we would have to lay about one-half mile of new main pipe, connecting with the present main at or near Bow street, and relaying pipe on Arlington avenue. For several years, in fact every year since the pipe was lowered near Medford street, there has been a large outlay, probably more than enough to relay the same. As it could not be repaired so as to make a permanent thing, the commissioners of last year recommended that the main for about 150 feet be relaid. We have relaid it at a cost of $433.14, using cast iron instead of cement pipes, placing a 12-inch gate at the head of Medford street, so that, in making repairs, we should not be obliged to shut off the water from the easterly part of the town.

Chestnut Street.

We have laid 282 feet of new 4-inch iron pipe, connecting Medford with Mystic streets, thereby disposing of a dead end, and also increasing the supply of water at the easterly part of the town, where the main pipe is shut off near the central part of the town, in making repairs.

Mount Vernon Street.

We have laid 404 feet 1½-inch iron pipe, replacing a three-fourth inch pipe which was insufficient, as there was a call for an increased supply, and we think that the present pipe will

supply the demand in the future. The cost was $150.62, Mr. Paul paying twenty dollars toward the expenditure.

Jason Street.

At the November meeting the town appropriated $600 to extend the pipes on Jason street, as recommended by your board. As it was a difficult piece of work to estimate accurately, we have exceeded the appropriation, which was unavoidable, as it was impossible to make an exact estimate before digging, on account of the ledge, and we felt that we were justified in taking the small amount necessary to complete the work, from the regular appropriation. We have laid in this street 558 feet of 4-inch cast iron pipe, and placed a hydrant at the usual distance, at a cost of $718.93. The income derived from the extension will be about $60 a year, and probably in the near future more will be added, so that although it was an expensive piece of work, it is a good paying investment for the town.

New Services.

There have been 42 new services added this year, it being a larger number than any year since the water was first introduced, at a cost of $516.60, or $12.30 for each.

Repairs.

Every hydrant and gate in town has been thoroughly tried and repaired, where it was needed. About the usual number of leaks have occurred, which, in most cases, have been repaired by using clamps instead of winding the joints.

Superintendence.

Your commissioners believing, as the works are yearly increasing, that the time had come when it would be for the best interests of the town to employ some person who could give his entire time in looking after the general work necessary for keeping the works in repair, and, as we could not have the services of Mr. Austin without considerable increase in his salary, we made an arrangement with Mr. Sylvester Stickney whereby he would teach some capable person about the management of the works, and at the same time superintending, himself, for one year. After Mr. Johnson had served about six months he resigned and Mr. Thomas Roden has been appointed to fill the vacancy, Mr. Stickney agreeing to the same arrangement, so that next year we feel confident that Mr. Roden will have learned so that with some assistance he can take charge, and thus the work can be carried on more economically for the town than any other way.

Last year your commissioners deemed it advisable to enclose the reservoir by a suitable fence, but as the town was obliged to raise an unusually large appropriation, they decided not to ask for the money at that time, but your board still think it is for the interest of the town that a fence of some kind be built, as, if there is none, sooner or later the town will be obliged to settle claims in consequence of a defective highway. We would recommend an appropriation for this purpose, and also for extending the main pipes, where, in the judgment of the board, it shall be for the interest of the town to do so. We would also call the attention of the citizens to the necessity of strictly conforming to the rules, thereby relieving the commissioners of the very unpleasant and expensive duty of employing officers to look

after water-takers who illegally use the water, for by conforming to the hours established we are able to supply more water than by allowing every body the use of the water at the same time. For detailed statement of income and expenditures, we refer you to the Report of the Treasurer, herewith submitted.

Water Closets.

When the water was first introduced privileges were allowed the citizens as inducements to take the water, which in our judgment should be discontinued. One of these privileges was to allow the waste water pipes to be connected with the water-closets and vaults, thereby relieving them of the necessity of paying for the use of water for such purposes ; so that now nearly every body building new houses makes them in this manner, thereby paying only six dollars when others using the same amount of water pay eleven dollars or more, which may be fair for those who pay the former, but unjust to those who pay the latter amount; and we would call the attention of the citizens to this matter as it has assumed such large proportions that we deemed it advisable to bring it before the town to take action thereon. Although the Water Commissioners have power to change the tariff in particular cases where in their judgment the interests of the town shall require it, we in this particular case know that many would claim the act as an arbitrary assumption of authority and we therefore bring this to your notice in our report, and ask the town to take action on the same at the annual meeting.

B. DELMONT LOCKE, *Treasurer.*

ARLINGTON, Dec. 31, 1885.

Extracts from Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely:

DWELLING HOUSES.

Occupied by one family, for the first faucet,	$6 00
For each additional faucet, to be used by the same family,	2 00
Where a house is occupied by more than one family, one faucet only being used for all, for each family,	4 00
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional water-closet,	3 00
For hopper water-closets,	8 00
Where bath-tubs or water-closets are used by more than one family, for each family,	4 00
Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both. *Provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than	25 00

BOARDING HOUSES.

For the first faucet,	10 00

Each additional faucet,	$2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

STORES, OCCUPIED AS OFFICE, SHOP, OR SIMILAR PURPOSE.

First faucet,	$6 to $20 00
For each additional faucet,	2 50
For water-closet or urinal,	6 00

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water,	$6 to $25 00

HOTELS.

For each bed for boarders and lodgers,	3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

PUBLIC BATHS.

For one tub in public bath-house,	10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water-closet,	3 00

STABLES.

Private Stables.	For the first horse,	5 00
"	For each additional horse,	3 00

Private Stables. For one cow,	$2 00
" For each additional cow,	1 00
Livery, Club and Boarding Stables. For each horse,	3 00
Car and Omnibus Stables. For each horse,	2 00
Truck and Cart Stables. For each horse,	2 00
Provided, that in no case shall any stable be charged less than	5 00

The rates for stables include water for washing carriages without hose; when hose is used, $3.00 additional.

HOSE.

For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets, and watering gardens (and the use of the same shall be limited to two hours per day), not less than	$3 00

STEAM BOILERS.

For each boiler in use not over twelve hours a day, for each horse-power,	6 00

BUILDING PURPOSES.

For each cask of lime or cement,	6 cents

ORNAMENTAL FOUNTAINS.

Ordinarily used three hours a day for a period of not more than 4 months a year:

For a jet of 1-16 of an inch,	$3 00
" " 1-8 "	5 00
" " 1-4 "	8 00

To be cut off at discretion of the Superintendent.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners, and the rates fixed in the foregoing tariff may be varied by the Water Commissioners, whenever in particular cases in their judgment the interests of the town shall require.

AUDITORS' REPORT.

The undersigned hereby certify that they have audited the books and accounts of B. DELMONT LOCKE, as Treasurer and Collector of the Town of Arlington, also as Treasurer for the Arlington Water Works, for the year 1885, and find the same correct, with vouchers for all payments, and the balances of cash as stated by him.

DAVID P. GREEN,
A. WILLARD DAMON, } *Auditors.*

ARLINGTON, Jan. 21, 1886.

ANNUAL REPORT

OF THE

CHIEF ENGINEER OF THE ARLINGTON FIRE DEPARTMENT.

To the Board of Selectmen of Arlington:

GENTLEMEN— I herewith submit my Annual Report of the Fire Department for the year ending Dec. 31, 1885:

FIRES.

The department has been called out for fires but three times during the year, and the loss of property from the above fires aggregates less than three hundred dollars, which is a very pleasing showing, while adjoining cities and towns have suffered severe losses. But we must not lose sight of the importance of being fully prepared and equipped for large conflagrations, to which we are alike subject with other towns.

The hose of the department is in good condition, and none has been purchased this year. If apparatus should be placed at the lower part of the town, hose would have to be purchased for that station.

INCREASED FACILITIES.

I would call your attention to the fact, that the horse now used by the Wm. Penn Hose Co. is liable at any time to become unfit for service, and that the Hook and Ladder Co. is also without a horse, and depending upon Mr. Needham for one for their use, which is hired of him for five dollars a fire, he assuming all liability from damage to the horse, with no guarantee to have one at hand for all calls. As we are now situated this branch of the department is very uncertain, and subject to failures in responding promptly to alarms of fire. At the same time we do not feel justified in recommending the purchase of a horse and assuming his maintenance, with no prospect of its being able to earn more than sixty or seventy dollars a year in labor, as is the case of the one now belonging to the department.

The buildings are in the same condition as represented in my report of last year, and there have been no expenditures of money, either on buildings or apparatus this year, and there have been no extra expenses to meet. In this respect it has been an exceptional year, and we cannot reasonably expect a repetition of the same in the year to follow.

I would recommend an appropriation of $2500 to meet the expenses of the department for the ensuing year.

In conclusion, I desire to express my thanks to your Honorable Board, and my assistants, for yours and their generous support, and to the members of the department for their promptness in responding to all calls.

Respectfully submitted,

CHARLES GOTT,

Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

The business of the Public Library, since it became comfortably established in its new quarters, has gone on so pleasantly and harmoniously, that a report of it for the past year might almost be summed up in two words—uniform prosperity. In light, space, and agreeable surroundings, the present situation is all that could be desired; while, contrary to the usual experience in such cases, the necessary additional expense has been less than was anticipated. By sub-letting ante-rooms, we have now reduced our nominal rent of $400 to an actual expenditure by the town of $270; and the introduction of a stove, as a substitute for the furnace, in the fall and spring months, has reduced the expenses of fuel and janitorship, while adding greatly to the comfort and cheer of the Library and Reading Room.

The Reading Room has proved a pleasant place of resort for young people, and many older persons make use of it, especially in the afternoon. Its advantages need only to become more generally known, to make it still more popu-

lar, and greatly to increase the list of evening visitors. Besides the Boston and New York dailies, there are always to be seen on its tables the latest magazines—Harper's, The Century, Nineteenth Century, North American Review, Atlantic, Popular Science, St. Nicholas, etc.; the current weeklies—Harper's, the Nation, the London Illustrated News, and, among others, the Scientific American, from the pages of which, with their profuse illustrations, any person interested in practical improvements and mechanical arts, can always derive an hour's instruction and entertainment. The Congressional Record is now sent to us regularly, and though it cannot be recommended as very light reading, it will be found useful to those who care for the details of Congressional proceedings. Then there are the books of reference, and indeed a whole library, close at hand. Visits are cordially invited from those who are not already frequenters of these pleasant rooms.

J. T. TROWBRIDGE,

For the Trustees.

ARLINGTON, Jan., 1886.

LIZZIE J. NEWTON,

Librarian.

ARLINGTON, Dec. 31, 1885.

SCHOOL COMMITTEE'S REPORT.

The School Committee herewith respectfully submit their Annual Report:

Believing that our Town Treasurer's report contains, under the heading of "Schools," much and valuable information for tax-payers generally and for all persons who have at heart the prosperity and welfare of our public schools, we respectfully suggest to such interested parties a careful perusal of the treasurer's figures as the best means of understanding clearly in all its details the exact manner in which we have expended our appropriation, and, moreover, because these figures clearly prove at least two things, viz.: that the appropriation for 1885 has been looked after in a careful and business like manner, there being the unusually large unexpended balance of more than $1200; and secondly, that a very large annual appropriation will always be required, varying of course from time to time as special expenditures become necessary.

In what follows we propose to refer in a general way, and as briefly as possible, to the work accomplished during the year 1885, and to the present condition of our schools, with possibly some reference to matters pertaining to the future.

A mere glance at the recommendations of previous reports,

and the appropriations asked for and made, would lead to the inference that our school property should now be in a good state of repair. The prudential committee report this to be the case, and add that our school grounds and buildings taken as a whole are now in a condition of neatness and good repair which will compare most favorably with that of very many past years. Few repairs or improvements have been made and there are few to recommend.

At the time of writing the last report, the new heating apparatus in the High School building was far from being saisfactory ; it did not heat the rooms according to contract, and consequently the contract had not been accepted and paid. The contractors soon took the necessary steps however, and made such changes and additions as were necessary, so that finally the building was fairly well heated, and the committee were satisfied and accepted the work. Early during the past fall, extra radiators were placed in the back entries as recommended.

But it was not thought to be practicable, at least for the present, to add radiators in the front entries as was also recommended, or rather suggested. The cold weather of the present winter has put the apparatus to a severe test, and we are far from being satisfied that its heating capacity warrants such a trial. For even with the aid of double windows, the furnace being carefully and properly watched day and night, on some of our coldest mornings, only the main room has been warm enough to be safely occupied by teachers and pupils at the opening of school session.

The main school-room at the High School has always required more attention as regards ventilation than any other in the building, and, in fact, than any other in all our school buildings. And since the introduction of the heating apparatus referred to, and the large increase in number of pupils, the question of ventilation has become quite an im-

portant one. New and large ventilators of the most approved pattern were introduced with the steam heat, but the complete failure of these leaves the question still in the hands of the sanitary committee, who are giving it proper attention but hesitate to recommend changes involving much expense, particularly when noting the large number of pupils already in attendance and the prospect of much larger classes n th e near future.

We are glad to report that no similar difficulties in heating or ventilating have been met with in any of our buildings.

The blackboards in all the buildings were found to need repairing and recoating. This was thoroughly done, during the summer vacation, on a large scale and it may seem at considerable expense. But teachers and school officers generally will agree with us that blackboards are a very important aid to instruction in most of the branches taught, especially in the primary and grammar grades.

The purchase of twenty new desks and seats for the High School became necessary during the summer, to provide accommodations for the seventy pupils, who, we found, expected to attend the school in September. Heretofore our maximum number had been not far from sixty, while we had not provided proper accommodations for more than fifty, this being above the average number of pupils in attendance. The twenty desks of a new and improved pattern were placed in the main room, and twenty old desks and seats were transferred to the first assistant's room, who now has twenty pupils under her immediate supervision, in addition to the class in recitation.

In the Crosby School, Miss Scanlan's room became so crowded toward the close of the year, that the addition of six desks and seats became necessary; but we were able to transfer this number from other buildings.

In the Cutter School, all the rooms were thoroughly cleaned, painted and varnished.

Other changes and repairs in the buildings, generally, were simply such as the wear and tear of common usage will always render necessary.

Last year we reported the digging of a new well on the grounds of the Locke School, in reponse to many and repeated requests of parents, whose children attend that school, for a supply of pure and cool water during the warmer months, all admitting that the cistern in the basement gave a good supply of filtered water of the best quality to be obtained, but suitable only for the cooler months.

The report adds that the well had been provided with a pump, and supplied abundant and wholesome water.

Before the end of a single year, the purchase of a new pump became necessary, abuse having placed the first beyond the reach of repair. The water obtained really appeared so abundant and wholesome, that we put the whole matter aside as a piece of work most satisfactorily done. Imagine then our surprise and regret to find early during the present fall that the water from this well appeared to be far from wholesome, since it had a most disagreeable odor which seemed to forbid its use by school children, lest trouble result and sickness on a large scale appear in the school and be attributed only to this water. After careful search and thorough cleaning of the well had shown the source of suspected contamination to be beyond our reach, we adopted what seemed the only safe course and disabled the pump, so that scholars must now content themselves with cistern water, unless the committee see fit to supply as heretofore during the warmer months, a small water tank and ice.

Before closing our report in regard to prudential affairs, it seems proper to allude to the only matters which seem likely to require in the near future more than the ordinary

expenditure of money. It is hardly necessary to refer again to the High School; its claims have been touched upon in many reports of late, and its present crowded condition has been mentioned already.

The spare room in the Locke School will soon be required for actual service, when an appropriation for desks and seats will be the chief expense.

A similar expense must soon be incurred in fitting the twelfth room in the Russell School for occupancy; — this being the only vacant room. Blackboards must also be supplied here. For more than a year two teachers have had charge together of the scholars in the third primary grade, and now, when between eighty and ninety small children crowd into one room, the division into two classes cannot well be delayed much longer. Moreover, in other grades in this school the numbers are increasing in nearly a like proportion, so that the division into two classes of some other grade may soon be necessary, when the wisdom of retaining the Adams school-house and keeping it at the disposal of the committee must be apparent to all.

The lower section of the town, however, is the one which seems to be growing most rapidly at the present time; at least so many new scholars are presenting themselves at the Crosby School, as to show us that prompt action may be required at no distant day. At present the capacity of the two rooms in this school is taxed to its utmost,—for example, in Miss Scanlan's room, where there were fifty-five desks and seats, sixty-five scholars had to be accommodated. It seems none too soon for the town to provide for the inevitable, by erecting at once, on the old grounds, a substantial school building, with at least four large rooms.

On the whole, the work accomplished in the school-rooms in all the buildings and in all grades seems to compare favorably with the work done in former years; while

the interest taken by teachers, and by pupils as well, has advanced rather than lowered our standard. In some branches the most marked improvement has been clearly seen. For example, after criticising, unfavorably, in the annual report three years ago, the work accomplished in arithmetic in the grammar schools, it is only just and proper to say that the results obtained at the annual examinations last June, convinced us that arithmetic is now well taught in both grammar schools. Credit for this should be given mainly to the grammar masters.

No better proof could be given that we were fully satisfied with last year's work than the fact that at the annual election of teachers in June, the sub-committees without exception were prepared to recommend for re-election all the teachers under their supervision. And thus the entire corps of teachers as given in the last report was re-elected, with the exception only of Miss Cora B. Ambrose, in charge of the third and fourth classes of the Cutter Grammar School. Her resignation alone stood in the way of re-election. She withdrew after two years of efficient service, the vacancy being filled by the choice of Miss Jennie Chaplin, of Georgetown, Mass., a teacher bringing training and experience to her position. Changes in our corps of teachers are detrimental to the best interests of our schools as a rule, and your committee congratulated themselves that they could begin the new school year in September, with so few changes. It seemed to insure another year of school work even more successful than the last, and thus far our anticipations are being realized.

We are sorry to announce, however, two unavoidable changes since September 1st.

No school had pleased the sub-committee in charge, more than our High School. With seventy pupils, an unusually large number, and with tried teachers, most excellent work

was being done, which was all the more gratifying, since no school had of late years caused more anxiety; but with the close of the year covered by this report, our first assistant, Miss Laura M. Ball, sent in her resignation most unexpectedly and at very short notice, after having convinced us that she was capable of filling the position with satisfaction to all. Although at a very unfavorable season of the year, we seem to be fortunate in securing a teacher of much experience to fill the vacancy, who has recently been fitting herself for just such a position, in the teacher's course at Wellesley College; Miss Anna J. Newton, of Henniker, N. H. In the Russell School, Miss E. G. D. Kennard, teacher of the second primary grade, began the year's work with apparently her usual good health; but the continued mental strain and anxiety of previous years seems to have been slowly wearing out her nervous system, and we are sorry to announce her enforced absence on account of sickness, for the remainder of the year, at least,— possibly longer. Miss Fessenden, of Cambridge, Mass., is filling the position thus made vacant, to the entire satisfaction of sub-committee.

The report of two years ago, 1883. in speaking of promotions at the end of the year, from one grade to the next above, and from the Grammar to the High School, says: "It is not unlikely that the committee will determine that, setting aside the final examination, or taking it only partly into account, the work and conduct of the pupil for the entire year will be reviewed; and regularity of attendance, faithful study, and obedience to rule will be regarded among the qualifications for promotion." Such change has at last been made, and hereafter we hope to increase very much the efficiency of the work done during several of the last weeks before promotion, by saving much time and by avoiding the former mental anxiety and strain, which was detrimental to

all concerned. At the same time, it was also voted to give pupils completing the Grammar School course to the satisfaction of masters and committee diplomas or certificates to that effect, these admitting at once to the High School course.

The lengthening of the classical course at the High School, spoken of in last year's report, could not be longer delayed, and, accepting the sub-committee's recommendation, it was voted early in the year to add one year to the Post Graduate's course in the classical department—thus taking five years in which to fit for college, instead of four, as formerly. The report referred to fully explains the necessity of such change.

During the year the committee generally, and especially the High School sub-committee, have been interviewed repeatedly by pupils and parents,—by pupils, who wish to drop certain difficult or distasteful studies, or change these for easier studies, and by parents, who have come to urge the adoption of a more practical course of study for the High School. But all have failed to suggest, as we sincerely wish they might, just what this more practical course should be. This question of a business course is an old one, often considered and taken up repeatedly in other towns as well as our own. But the majority of those who urge it apparently fail to comprehend fully the real object of a true and broad education. Last year's report well says: "True education is not a process of cramming the mind with facts and statistics. The result aimed at is not a certain amount of information acquired, but a disciplined mind and cultivated power of thought."

This whole subject is so well stated by Judge Parmenter in his report for 1872, when the committee seem to have been frequently approached in like manner, that we may be excused for repeating a portion of his statement. It would

be difficult to explain more clearly or more fairly the position of your committee at the present time, both on this question and also in regard to dropping difficult studies, so as to make the course easier.

The report says: "It is often asked if the studies of the High School may not be made more practical, and be so distributed that whether the stay of the pupil be long or short, he may occupy himself with those which shall be directly applicable to the calling which awaits him upon leaving school. And, again, whether studies which to some pupils are distasteful or difficult may not in their case be omitted, and to some extent election be allowed. These questions have troubled the school and impaired its success. The policy hitherto has been adverse to education merely special, and has favored a more liberal culture. While some studies are immediately practical, the greater part are adopted with a view to mental training, as a preparation for the higher uses of the intellectual faculties, acquirement of knowledge, and the exercise of the reason beyond the common needs of self-support and money-getting.

"While in our *curriculum* we find such a branch as book-keeping, yet it must be granted that it stands in inferior relation to the classical and modern languages, mathematics, the physical sciences and history. These studies have long been the best instruments of the best education, and the only controversy as to their use is in assigning the predominance of one over another, and unless the instruction is to become in the narrowest sense technical, there are no other known means available for the purpose. Perhaps the actual arrangement of studies may be changed for the better, and this is a subject now under inquiry and consideration by a sub-committee. The classical course admits of no change; that is adapted to the requirements for admission to college. The ordinary course may be made to some extent elective. It

may be well to substitute a modern for an ancient language, an English branch for some portion of mathematics, or make such abridgment as may suit the pupils who do not care to graduate.

"Two things should be insisted upon: one, that the time of the pupil should be fairly occupied; the other, that he shall not drop a study at pleasure. If a pupil finds his study uncongenial, or is impatient of school, or is only content to stay there if his task can be made light, or is too feeble to do the work, he can do better out of school than in. The condition of membership should be that of constant and faithful work, and be the scholars few or many, they should be such only as desire and appreciate the benefit which comes from liberal study."

These interviews with parents did finally result in much benefit for our High School, as we confidently believe. For they led to the introduction on trial of an advanced course in arithmetic, open to all pupils who choose to take it. Thomson's Commercial Arithmetic was adopted as the text-book, a book quite recently published, and the only practical work on the subject within our knowledge. This course has been added without loss of instruction in any other branch.

The school year 1885 may well be considered as making a bright landmark in the history of our public schools and in the history of temperance in our State; for since Aug. 1, 1885, the laws of our State have made the study of Physiology and Hygiene, with special reference to alcohol, stimulants, etc., as much a regular branch of study in our public schools, as the study of arithmetic or geography.

To some who were eager to see the work begun, it seemed as if the sub-committee chosen to select the text-books for the new study, and to decide how it should be taught, were making little or no progress. But when it is remembered that the publishing houses of school text-books, at once issued books by more than twenty-five different authors, and sent their agents to press the claims of each edition, it can be seen that there was danger of making a hasty choice and a poor one.

After the proper examinations had been made, Smith's Physiologies were adopted for general use, with Blaisdell's for collateral reading; the instruction to be given orally by the teachers in all grades below the third grammar grade, and the classes above to use the text-books. In the High School course, Hutchinson's Physiology and Hygiene was retained as the text-book. This plan is, of course, simply on trial, and experience will probably suggest many important changes.

There remains to be noticed in closing this report a change in connection with our own board at the close of the year, fully as important as any mentioned in connection with the schools themselves. Our faithful and efficient secretary, Mr. Charles E. Goodwin, resigned his position as a member of the school board at the close of the financial year, leaving a record of which he may well be proud, viz.: that of sixteen years of continuous service, during the latter fifteen of which he filled the position of secretary. During all this time there has never been heard any unfavorable criticism of the manner in which his work was performed, but on the contrary,

his records and accounts have always been referred to as models of neatness, convenience and accuracy.

By vote of the joint convention of the Boards of Selectmen and School Committee, held in accordance with the State law, Mr. James P. Parmenter fills the vacancy during the remainder of the official year, i. e., till March, 1886, taking up at once the duties of secretary of the board,—duties which are rendered much more difficult and arduous than formerly, by the work necessary in connection with the free text-book law.

Approved by the Committee.

WM. A. WINN,
Chairman.

ARLINGTON, Dec. 31, 1885.

Report of Committee on Cemeteries.

The Committee on Cemeteries report that the receipts have been as follows:

Town appropriation,	$500 00
Sale of lots,	270 00
Rent of pasture,	30 00
Interest from Robbins Fund,	300 00
	$1,100 00

Payments.

B. McGowan, for labor,	$372 50	
Sundry parties, for labor, trees, grass seed, manure, sods, expressage, printing, etc., as shown by the town treasurer's books,	138 27	
Parker & Wood, for lawn mower,	16 50	
Repairs to hearse house,	19 25	
Sylvester Stickney, repairs to water works, etc.,	15 32	
The town for labor and gravel,	199 97	
The town for water tax,	50 00	
	$811 81	
Less, trees, leaves and loam sold,	9 00	
		$802 81
Unexpended balance,		297 19
		$1,100 00

The committee have removed some of the surplus trees from Mt. Pleasant Cemetery and some from the street in front thereof. The trees removed were injuring the growth of neighboring trees or were dead or dying.

The bank to the wall on Medford street has been filled where necessary and the slope sodded.

The previously unconstructed driveways have had the loam removed therefrom and have been graded and gravelled, with the exception of one short cross-way.

Between sixty and seventy trees and some shrubbery and flowers have been planted.

The walks, driveways, and the grounds in both cemeteries, except private lots not in the care of the town, have been kept in good condition, and the sidewalks of the streets in front of the cemeteries have been swept and kept clean.

The committee have personally superintended all the work and believe the owners of lots and other citizens who have visited the grounds have been satisfied with their general appearance.

For several years past, there has been more or less depredation at the cemeteries by unruly persons, probably boys and children, such as the taking of flowers from the lots, the removal of lead from some of the joints of curb-stones and monuments, and in a few instances serious injury to monuments caused by pounding or throwing small stones against them. The Police have been unable to detect the culprits. The depredations, so far as the committee can learn, have been less the past year than some previous years.

It will be necessary when the weather will permit to construct a new fence on the westerly side of Mt. Pleasant Cemetery and to paint the fence on the easterly side.

A few trees that mar the grounds of the Old Cemetery on Pleasant street should be removed, and some parts of the wall upon the street should be pointed.

The committee recommend that very few, if any, more trees that will make a large growth be planted in the grounds, but that planting hereafter be confined mostly to trees of small growth, shrubbery and flowers.

As a portion of the unexpended balance of $297.19 came from the interest of the Robbins Fund and is to be used for specific purposes, the committee recommend that this sum be not covered into the town treasury or sinking fund, but that it remain subject to the call of the Committee on Cemeteries to be elected at this meeting.

R. L. Hodgdon,
S. G. Damon,
Wendell E. Richardson,

WILLIAM O. AUSTIN, MICHAEL J. O'BRIEN,

SELECTMEN'S REPORT.

The Annual Report of the Selectmen of the town, for the year ending Dec. 31, 1886, is herewith respectfully submitted:

Highways.

Amount appropriated by the town,	$9,000 00
" " for sidewalks,	500 00
" received for subscriptions for watering the streets, labor, gravel, etc.,	1,510 90
	$11,010 90
Expended,	11,101 05

Arlington Avenue.

That portion near Tufts street has been repaired by crowning with crushed stone and gravel. A portion between Milk street and the car stables, also a portion between Park avenue and the willows, have been repaired in the same manner. Other sections of the avenue will need repairing the ensuing year, especially near the Lexington line and Linwood street.

An appropriation of $1,000 was made at the annual meeting in March last, for the purpose of removing the

embankment near the "old brick school house." Surveys have been made and plans adopted for that purpose.

After many attempts an agreement was made with the abutters as to the amount of damages, but not until too late in the season to commence work. The damages have been settled and the removal can go forward in the early Spring.

Curbstones have been laid at the corner of Medford street; a very desirable improvement, and the sidewalks repaired by skim-coating with concrete.

Appleton Street.

This street has been repaired by building a sidewalk between Hillside and Claremont avenues and cutting out the sides and crowning the centre of the old part. Other repairs are needed and should be attended to the coming year. A sidewalk between Park avenue and the junction of Vine street is much needed.

Acton Street.

Accepted by the town last November, should be built this year. There is sufficient material within the limits of the street for its construction, and the expense will be for labor only.

Broadway.

A portion of this street, near Somerville line, has been repaired and sidewalks built.

Other repairs are needed between Winter street and the junction of Warren street.

Curbstones have been set from Mr. Albert Needham's to Franklin street, the abutters furnishing the stones.

Claremont Avenue.

Sidewalks have been graded on a portion of this avenue, and the remainder should be attended to this year.

Chestnut Street.

It is necessary that repairs should be made on this street the coming year. A large amount of heavy teaming is done on this street and it should be repaired principally with crushed stone.

Decatur Street.

This street has been repaired nearly its entire length, and is now in fair condition.

Forest Street.

That portion north of the railroad crossing to the foot of the hill has been completed and repairs made its entire length, so that it is now in very good condition.

Gray Street,

Recently accepted by the town has been put in good condition by using material from the gutters, and crowned with gravel taken from Pleasant street.

Hillside Avenue.

An appropriation of $800 was granted by the town at its annual meeting in March for the purpose of completing this avenue. The work has been done the past season in a very satisfactory manner at an expense of $732.96

Highland Avenue.

A large portion of this avenue needs to be re-gravelled.

Jason Street.

Owing to the construction of this street when built, being very flat and composed largely of loam, considerable material had to be used in crowning it. A sidewalk has been built on the easterly side its entire length.

Lake Street.

Some repairs will be needed on portions of this street.

Lowell Street.

That part of this street near the Lexington line should be crowned with stone and gravel; in fact, quite a large section needs thorough repairing.

Mystic Street.

A section opposite the estate of W. J. Niles has been thoroughly repaired with stone and gravel, also a section near the Winchester line, and nearly the entire length, has been patched in the worst places.

Montague Street.

A new street, accepted by the town last November, should be built early in the season.

Oak Street.

Repairs have been made where needed.

Park Avenue.

Some parts of this avenue need very much to be re-gravelled. The gutters are much worn and should be skim-coated the ensuing year.

Pleasant Street.

Quite extensive, and much needed improvements have been made on this street, between the Gray Estate and the residence of Dr. R. L. Hodgdon, bringing it to a grade, by excavating certain portions, so that the surface water from this locality is carried to Spring Valley, thence to Spy Pond. The roadbed was then properly crowned with crushed stone and gravel. The entire length of the street has been surveyed and plans made with a view of completing the same in like manner. We would recommend that the section extending from Dr. Hodgdon's residence to Arlington avenue be completed the present year. The sidewalks on this street have been thoroughly repaired with concrete.

River Street

Has been entirely rebuilt the past season by reducing to a grade and crowning with stone and gravel. Sidewalks have been constructed on both sides nearly the entire length.

Russell Street.

Quite an outlay has been made on this street in repairing and laying new gutters and sidewalks.

Spring Street.

Repairs are much needed here the ensuing year.

Summer Street.

By the use of gravel, this street has been put in good condition.

Westminster Avenue.

It will be necessary to make some repairs on this avenue near the residence of H. E. Lewis; also a short section of sidewalk should be constructed on the easterly side of the avenue. Railings should be built on the west side.

Wollaston Avenue.

Sidewalks are very much needed on this avenue, and some method should be devised for the disposal of the surface water.

Teel Street.

A street recently accepted by the town, will require some attention the coming season.

Warren Street.

A large portion of this street has been repaired the past year and is now in very good condition.

Webster Street.

The gutters have been cleaned and the street repaired with gravel.

Watering Street .

The streets have been watered the same as usual by the town teams, the abutters subscribing a portion of the expense. Two stand pipes have been placed on Mystic street, and the street watered from Arlington avenue to the residence of Mr. Isaac Huffmaster, the expense attending it being borne by the abutters.

Bridges, Culverts and Catch-basins.

Some of the old stone culverts have been taken up and repaired. Drain pipe has been laid from the drinking trough near the town house to the street sewer, taking the overflow from the trough, abating quite a nuisance in that locality.

Several new water-grates have been set.

Sign Boards.

Several street and private way signs have been erected the past season, in conformity to the law, and others will be needed the ensuing year.

Railings.

Railings have been erected on Forest and Lowell streets, also on the Main avenue near Park avenue, and Lewis' Mill, besides repairs in other parts of the town.

Stone Crusher.

The crusher is in good condition, but the building is not, and it should be repaired at once.

Having crushed considerable stone during the year past, we have not as much on hand at present as usual, and, in order to meet the requirements of another season, we may have to purchase.

Teams and Tools.

It will be necessary to purchase one new horse in the spring, to take the place of one that had become old and unfit for use, and which we were obliged to put out of the way. The tools are in their usual good condition. It would be good economy to exchange some of the old carts for new ones, rather than expend money in repairs.

Almshouse.

Mr. and Mrs. Austin having had charge of the Almshouse the past year, is a sufficient guarantee of its good management.

The buildings, furniture and fixtures are in fair condition; repairs will be needed to keep them so.

Amount appropriated by the town,	$1600 00
" received for board, and products sold,	559 20
	$2159 20
Expended for supplies, repairs, etc.,	2141 69

Whole number of inmates for the year,	14
Present number,	12
Died,	1
Number of tramps fed and lodged,	191

Outside Poor.

Appropriation by the town,	$2,500 00
Expended,	1,711 41

Street Lamps.

The contract made with the Wheeler Reflector Co. May 1, 1885, was renewed May 1, 1886, and so far as heard from, satisfaction is given.

The Arlington Gas Light Co. furnish gas for 89 lamps, and the Wheeler Reflector Co. light 136 lamps. Fourteen new lamps have been lighted by this company and four new gas lamps added.

Mr. J. H. Fermoyle has charge of the lamps.

Coal.

In accordance with our usual custom, letters were issued requesting bids for supplying the town with coal. The award was given to Mr. Warren A. Peirce, he being the lowest bidder; price, $4.65 per ton, and $5.15 for Lehigh.

Police

This department remains unchanged, Eugene Mead, Chief: Garret Barry, M. J. O'Brien and Wm. O. Austin, patrolmen. Details of this department will be found in the Chief's report, which follows.

To the Honorable Board of Selectmen:

GENTLEMEN — I respectfully submit my Report of this department for the year ending Dec. 31, 1886:

Whole number of arrests during the year, 121. Males, 117; females, 4.

Assaults,	19	Non support of wife,	1
Larceny,	4	Threatened assault,	1
Insane,	5	Drunkenness,	41
Stubborn child,	1	Disturbing the peace,	26
Violating Town B. Laws,	3	Vagrants,	3
Overdriving horse,	1	Malicious mischief,	4
Misuse of team,	1	Evading fare on R. R.	2
Keeping liquors with intent to sell,	1	Wilful trespass,	6
" liquor nuisance,	1	Idle and disorderly,	1
			—
			121

Several warrants to search for liquors have been sworn out, but in only two cases was enough found to convict.

Four lost children have been found, and returned to their homes.

One hundred and eighty five tramps have been sent to the almshouse for lodging, and twenty five have been lodged at the station.

EUGENE MEAD,
Chief of Police.

Fire Department.

By reference to the Chief Engineer's Report, the details of this department may be found.

Town House.

We feel it necessary to again call your attention to the condition of the town house.

By referring to our report of last year, will be found what, in our judgment, ought to be done. Owing to the large expense that such an alteration would make, we did not feel warranted in undertaking it without some expression from the town. With the funds now on hand for that purpose, we could lower the cupola, if thought best by the town, make the roof tight and put the interior in good condition.

New settees are needed at all events.

Respectfully submitted,

GEORGE D. TUFTS,
WARREN A. PEIRCE,
CHARLES T. SCANNELL,
Selectmen of Arlington.

ARLINGTON, Dec. 31, 1886.

REPORT OF THE TRUSTEE

OF THE

"SOLDIERS' MEMORIAL FUND."

The Trustee of the Soldiers' Memorial Fund presents the following Report:

The amount of the fund, deposited in the Arlington Five Cents Savings Bank, as reported December 31, 1885, was	$1,865 39
Add interest to December 31, 1886,	75 34
Making a total of	$1,940 73

which sum has been withdrawn from the Bank and is held by the Town Treasurer, subject to the order of the "Soldiers' Monument" Committee, in accordance with a vote of the Town passed March 10, 1885.

This closes the trust.

Respectfully submitted,

B. DELMONT LOCKE,
Trustee ex-officio of the Soldiers' Memorial Fund.

ARLINGTON, Dec. 31, 1886.

REPORT

OF THE

TRUSTEES OF THE ROBBINS FUND.

In accordance with the vote of the Town, passed Nov. 3, 1885, the Trustees of the Robbins Fund make the following "report of their doings" during the past year :

The fund of $5,000 remains deposited in the Arlington Five Cents Savings Bank. The interest on the same as follows :

From Sept. 30, 1885, to Jan. 1, 1886, .	$53 00
" Jan. 1, 1886, to Jan. 1, 1887, .	204 14
Amounting in all to	$257 14

has been paid to the Town Treasurer, to be expended under the direction of the Cemetery Committee.

Respectfully submitted.

WILLIAM G. PECK,
HENRY SWAN,
RICH. L. HODGDON,
B. DELMONT LOCKE, *ex-officio*,
} *Trustees of Robbins Fund.*

ARLINGTON, Dec. 31, 1886.

REPORT OF WATER COMMISSIONERS.

At the annual meeting in March, the town appropriated $9,000 for interest on Water Bonds and $725 additional for new main pipes and building a fence on Lowell street. After paying $600, which was borrowed on last year's account, and the extra expense of the Kenison suit, $325.89 — making $925.89 — we have a balance of $785.58 remaining in our hands: a condition of affairs upon which we think the citizens have reason to congratulate themselves; and unless some extra expense should be necessary, which we do not know of now, we can get along with less appropriation from the town than usual.

It will be seen by looking at the Treasurer's report that our income has increased $985.12 over last year's receipts, and $810.93 more than any year since the works were started, and we feel warranted in saying that our income will still further increase the coming year, making our income from water rates about $12,000, which will be nearly our full capacity with our present works, so that the town must, in the near future, consider some plan to increase our storage capacity and enlarge our main pipe; therefore we think that all new work done in the future should be done with that end in view, as the water-takers are rapidly increasing, and within a short time we must increase our facilities or some of our present sources of revenue must be cut off, as water for domestic purposes must be supplied first, so that our income with the present facilities will probably never exceed $12,000 to $13,000. It appears

to us that the town must increase its water supply to meet the demands of the rapid increase in population which has been made in the past, and which is sure to increase faster in the future; also, it will soon be necessary, in our opinion, to make arrangements for a high service, which can only be done by pumping into a stand-pipe or reservoir on the highest point of land available. As our population increases, private sources of water supply become dangerous and unfit for use and must be given up, and the citizens depend more every year on the town supply; so that we think the subject of pure water and more of it should meet your earliest consideration.

Water Closets.

Your Commissioners still think that the town should take some action in regard to the tariff for water closets, as recommended in our last annual report.

Fence on Lowell St.

At the annual meeting the town made an appropriation to build a fence on Lowell street, northerly of the storage reservoir. The contract to build the same was awarded to Mr. Edward Storer — he being the lowest bidder — for $192.75, the length being 1,280 feet; the cost of painting making a total of $264.22.

New Pipe.

We have laid new pipe on Jason street, and placed a hydrant at the proper distance, at a cost of $280.28, and it will be necessary to continue the pipe nearly the entire length of the street in the spring, as there are several new houses to be built next year. The extension from Brattle

street, for which an appropriation of $75 was made, has not been done, as we did not think it advisable on the part of the town to lay pipe on private lands without satisfactory guarantee from the owners. We, therefore, put in for Mr. Hill a new service as far as the street line, he laying the remainder at his own expense.

Repairs.

All the gates and hydrants have been tried and thoroughly repaired and are now in good condition. In some sections of the town the cement pipe is in very bad condition, especially is this the case in the easterly section of the town. The number of leaks this year has been less than usual but more costly to repair, as in a great many cases they were new leaks where the old pipe was entirely gone, which necessitated the putting in of new pipes, and in our judgment there are several places in town where it would be economy to relay the pipes, putting in iron in place of cement, instead of making constant repairs as we are now compelled to do. The iron pipe on Linwood street has for the past two years been a source of trouble as the joints were made with cement and were constantly leaking, we have repaired nearly every joint with lead.

New Services.

There have been 33 new services added this year at a cost of $399.63, or $12.11 each.

Kenison Suit.

The suit which has been pending for several years between Dr. Parker Kenison of Lexington and the town for flowage damage came to trial at the September term of the Superior Court at Lowell, and a judgment against the town of $500

was rendered, but your board, not deeming it for the best interest of the town, have appealed from the decision, and the case has been carried to the Supreme Court and we are now awaiting their decision.

Extensions.

Your board have received several applications for water on Grove street, but have not considered it expedient without the town making a special appropriation for the same, up to the present time, but now we think the income to be derived will warrant the expenditure, and would recommend that the town lay a new pipe about 600 feet, and the income at first would be about $40 and would increase in the future. As the surveyors of the highways contemplate laying a culvert through this street the expense might be somewhat lessened by doing both at the same time. We would also recommend an extension of pipes on Teel and Henderson streets.

Conclusion.

Since April 1st Mr. Thomas Roden has had charge of the work and has given entire satisfaction. We have rented a room in the basement of the Town Hall building and fitted it up for a work-shop, adding from time to time such tools as were necessary. We think the Treasurer's report will prove satisfactorily that this method is the most economical for the town. We would recommend an appropriation for the purpose of extending main pipes and placing new hydrants where in the judgment of the board it shall be for the interest of the town to do so. We trust the citizens will strictly conform to the rules as adopted by the town, thereby relieving the commissioners of unnecessary trouble and expense. For detailed statement we refer you to the Treasurer's report.

B. DELMONT LOCKE, *Treasurer.*

ARLINGTON, Dec. 31, 1886.

Extracts from Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely:

DWELLING HOUSES.

Occupied by one family, for the first faucet,	$6 00
For each additional faucet, to be used by the same family,	2 00
Where a house is occupied by more than one family, one faucet only being used for all, for each family,	4 00
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional water-closet,	3 00
For hopper water-closets,	8 00
Where bath-tubs or water-closets are used by more than one family, for each family,	4 00
Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both. *Provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than	25 00

BOARDING HOUSES.

For the first faucet,	10 00

Each additional faucet,	$2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

STORES, OCCUPIED AS OFFICE, SHOP, OR SIMILAR PURPOSE.

First faucet,	$6 to $20 00
For each additional faucet,	2 50
For water-closet or urinal,	6 00

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water,	$6 to $25 00

HOTELS.

For each bed for boarders and lodgers,	3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

PUBLIC BATHS.

For one tub in public bath-house,	10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water-closet,	3 00

STABLES.

Private Stables.	For the first horse,	5 00
"	For each additional horse,	3 00

Private Stables.	For one cow,	$2 00
"	For each additional cow,	1 00
Livery, Club and Boarding Stables.	For each horse,	3 00
Car and Omnibus Stables.	For each horse,	2 00
Truck and Cart Stables.	For each horse,	2 00
Provided, that in no case shall any stable be charged less than		5 00

The rates for stables include water for washing carriages without hose; when hose is used, $3.00 additional.

HOSE.

For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets, and watering gardens (and the use of the same shall be limited to two hours per day), not less than	$3 00

STEAM BOILERS.

For each boiler in use not over twelve hours a day, for each horse-power,	6 00

BUILDING PURPOSES.

For each cask of lime or cement,	6 cents

ORNAMENTAL FOUNTAINS.

Ordinarily used three hours a day for a period of not more than 4 months a year:

For a jet of 1-16 of an inch,	$3 00
" " 1-8 "	5 00
" " 1-4 "	8 00

To be cut off at discretion of the Superintendent.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners, and the rates fixed in the foregoing tariff may be varied by the Water Commissioners, whenever in particular cases in their judgment the interests of the town shall require.

AUDITORS' REPORT.

The undersigned hereby certify that they have audited the books and accounts of B. Delmont Locke, as Treasurer and Collector of the Town of Arlington, also as Treasurer for the Arlington Water Works, for the year 1886, and find the same correct, with vouchers for all payments, and the balances of cash as stated by him.

David P. Green,
A. Willard Damon, } *Auditors.*

Arlington, Jan. 21, 1887.

ANNUAL REPORT

OF THE

CHIEF ENGINEER OF THE ARLINGTON FIRE DEPARTMENT.

To the Selectmen of the Town of Arlington:

GENTLEMEN—In compliance with the usual custom, I herewith submit my Report of the department under my charge for the year ending Dec. 31, 1886:

There have been no serious fires during the year, and 10 alarms have been responded to by the department. The department, in all cases, responded promptly, and no fire spread beyond the building in which it originated, and our citizens should be congratulated at the small aggregate loss.

APPARATUS.

In accordance with a vote of the town at its last March meeting, a new hose-wagon has been procured and placed in the Highland House, and also one new harness; five hundred feet of new hose has also been purchased during the year.

FIRE ALARMS.

Telephone boxes have been placed in different localities in town, and connected with the Police Station, for the purpose of giving fire alarms, and have shown an improvement over the old style of alarming the town. An independent system is quite necessary for the more perfect protection of the town.

INCREASED FACILITIES.

Hose Co. No. 4 has been organized and located in the lower section of the town, and the citizens have the engine jumper for their use. The building now occupied by the company is unsuitable for the storage of the Highland Carriage, and I would suggest that a cheap, temporary building be erected for the purpose as soon as possible. I would also recommend that stalls be prepared in the Penn and Highland houses, and horses be procured for the use of the department and placed therein. In my opinion, the change would be an economical one for the town to make.

APPROPRIATION.

I would recommend that the sum of twenty-five hundred dollars be appropriated for the expenses of the department for the ensuing year.

Thanking your honorable board, my assistants, members of the department, and others, for their support during the past year,

I remain, very respectfully,

CHAS. GOTT,
Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

The Public Library, during the past year, has enjoyed the steady prosperity to which it has for some time been accustomed. At the time the Library was removed from the Town House, some apprehension was expressed lest the change to a less central position might cause such a falling-off in the number of book-borrowers as to counterbalance the manifest advantages of the new rooms. The experience of more than two years has proved this fear to be groundless, and it is safe to say that the Library has never been of more use to more persons than now.

The reading-room has become so firmly established as a part of the Library that it hardly calls for the special mention requisite in former reports. It is kept open during the hours when books are given out, and until nine o'clock every evening. Its use varies a good deal at different times, being greatest in the afternoons and Saturday evenings, and least in the evenings when the Library proper is not open. The explanation seems to be that while many persons, who have

come to the Library to draw out or return books, are glad to stay and look at the newspapers and magazines, there are few who care to come, without other motive, for the sole purpose of using the reading-room. The expense, however, of keeping the room open in the evening is so trifling — the assistant in charge being able to do necessary work in the repair of books — that the Trustees deem it inexpedient to alter in any way the present arrangement.

With the increase in the use of the Library, the question becomes more pressing whether some means cannot be found to obviate the delay often experienced in getting books. It has been suggested that the Library might be open a greater number of hours in the week. As yet, there seems to be no really strong desire on the part of the public that this should be done; and there is some doubt whether it would remedy matters. The difficulty is that there are certain hours at which many persons find it especially convenient to visit the Library, and at those hours there is necessarily considerable delay in giving out books. The delay may be lessened, as the Trustees have tried to lessen it, by employing extra assistance at such times, but the trouble probably cannot be wholly cured.

During the year more than four hundred books have been added. The Trustees have followed the same policy as in former years of choosing, so far as possible, books likely to be of lasting value. Although disappointment is sometimes caused by the failure of the Library to have some temporarily popular book upon its shelves, on the other hand it contains a comparatively small proportion of books which have lost whatever usefulness they may once have had.

The card catalogue is now approaching completion. Its preparation, involving an amount of care, intelligence and skill not easily appreciated, has necessarily taken considerable time. The use already made of it by the Librarian and

others has proved how great a help it will be to readers, and how admirably the work has been done. It is, in fact, a full index to the contents of the Library, and takes a place that no ordinary printed catalogue can fill. As soon as practicable it will be placed where it can be directly used by the public.

The last printed catalogue of the whole Library was issued in 1876. In 1881 a supplement was published. No key to the books since added has been available, except the lists of new books published from time to time in the *Arlington Advocate*. In the opinion of the Trustees, it is now time to print a catalogue of the whole Library. The card catalogue will do away with the necessity of an elaborate printed catalogue; but one of a simpler kind can be made without great expense, which will serve every ordinary purpose, and in conjunction with the card catalogue, will give to users of the Library the help which they need and ought to have.

The weekly delivery of books at the Heights has been continued. For this convenience the citizens of that part of the town are obliged mainly to Mr. Peter E. Rose, who has very kindly attended to receiving and delivering the books. The Library is indebted, as in previous years, to Mr. C. S. Parker for a gift of a file of the *Advocate*. The Librarian's Statement, annexed, gives some statistics of interest. The figures indicate how well Miss Newton has cared for the property of the town, while frequenters of the Library know her constant endeavor to make the books under her charge as serviceable as possible in the community.

JAMES P. PARMENTER,
For the Trustees.

ARLINGTON, Jan., 1887.

Unexpended balance,	174 07
	$1,306 83

The committee considered it for the interest of the town to have the general work at the cemeteries performed under duly specified contracts, this being a continuation of the course adopted the previous year. The contracts are open to the inspection of any citizen.

A new fence has been built on the westerly side of Mt. Pleasant Cemetery, and this, with the fence on the easterly boundary, has been painted. The driveways, not previously constructed, have been opened, graded and gravelled. Within the Cemetery on Pleasant Street a grassed bank has been made against the street wall.

Much annoyance has been caused by wanton, as well as by thoughtless acts of some parties at the cemeteries; therefore the committee caused a notice to appear in the local newspaper, and to be posted upon the premises, offering a reward for the detection of persons committing any vandalism within the grounds; and, at the request of the committee, the town authorities appointed Mr. McGowan a special police without pay, for duty at the cemeteries.

For the coming season it is recommended that some ornamental shrubs and flowering trees of small growth be planted, which the necessary expenses of the past year precluded.

It is respectfully suggested that citizens interested in, and owning lots, take greater care of the same, and thus add much to the good appearance of the cemeteries. Many private lots receive little or no care from the owners thereof.

It is recommended that the unexpended balance of $174.07 remain subject to the use of Cemetery Committee for 1887.

SAMUEL G. DAMON,
WENDELL E. RICHARDSON,
J. HENRY HARTWELL,
} *Committee on Cemeteries.*

SCHOOL COMMITTEE'S REPORT.

The School Committee of Arlington respectfully present the following as their Annual Report:

At the outset the Chairman takes pleasure in referring to the harmonious manner in which the board, as at present constituted, has worked together. At our meetings many important matters concerning the welfare of the schools have been brought before us, considered and decided. Some differences of opinion may have existed, but the strong desire of every member to do what was for the best interests of the schools, has prevented acrimonious or protracted debate, and the universal willingness to be convinced by good reasons, has caused the decision, in almost every case, to be unanimous. As a consequence the meetings have been generally short, and the work before us has been done without waste of time. We now can see clearly the wisdom of our predecessors on this board, in establishing and perfecting a graded system of schools in our town. Each school has its proper place and work, and wherever any cause for dissatisfaction exists, it can be traced out and remedied. The work of supervision can be so allotted among the members of the Committee as to give each his proper share of labor and responsibility, without imposing undue care upon any one.

The close of the year finds the school buildings generally in good condition. It has been the policy of the Prudential Committee for several years past, whenever repairs or alterations on or about any of the school buildings were necessary, to have the work well done, in the belief that in the end such a course would be not only more satisfactory, but less expensive to the town, than to aim simply at lessening the immediate expense by temporary make-shifts.

By this means the school property has been brought into so good a condition that, as a general thing, few repairs are called for, except in places where there is much wear, and hence a need for renewal from year to year. During the year the most important repairs have been as follows. At the High School, all the several flights of steps leading from the street to the building have been replaced, and the concrete walks newly covered, making the approaches neater and safer than they have been for some time. A storm door has been placed at the rear entrance on the north side, affording a much needed protection.

Inside the building few important changes have been made. Last year's report mentions the purchase of twenty new desks. During the present year thirty more have been added, enough to completely furnish the upper room. This was a much needed change, as previously the desks and seats had been of various shapes and sizes, and many of them were by no means suitable. It now seems probable that no further purchase of desks will be necessary for some time to come.

The heating apparatus has worked on the whole well, and as the janitor in charge has learned from experience how to manage it, in all its details, he has found himself completely and easily master of the situation, and able to heat the whole building during ordinary winter weather, with enough heating power in reserve to meet all emergencies of the coldest

weather, and so it seems likely that this vexed question of the proper method of warming this building is at last settled. The ventilation of the main room has been better than last year, and has improved as the heating apparatus has become better known, but the committee do not feel altogether satisfied, and hope to find means to improve it still more in the future.

The yard of the Russell School has been put in thoroughly good condition, about one hundred yards of new concrete having been laid, and the worn concrete in other parts of the yard properly repaired, and covered with a fresh layer. The fence has been put in order, and the steps inside the building leading to the basement, which were much worn, wholly replaced. The room occupied since April on account of the division of the third primary grade into two sections, was prepared for use, and properly furnished with desks, blackboards, etc.

The Cutter School-house was partially shingled during the summer, the completion of the work being left until next year. A new fence is being built between the land of Mr. Oliver M. Winship and the school yard, half the expense of which will have to be paid by the town.

At the Locke School no repairs of great importance have been made.

New front steps have been made at the Crosby School, and the concrete walks have been repaired.

The committee at present anticipate no serious expense for repairs for the coming year, beyond the amount requisite to meet the ordinary wear and tear, and to keep the town property in its present satisfactory state.

Turning to the work of the schools during the year, it seems hardly necessary to speak in detail of each room. The town possesses an earnest and faithful corps of teachers, devoted to their work, and carrying it on successfully. Some

changes have occurred since the date of the last report. Upon Miss Ball's resignation at the end of 1885, Miss Anna J. Newton was appointed first assistant in the High School, as mentioned in the last report. In her we have secured an admirable teacher, and it is to be hoped that the town will be able long to retain her services. At the end of June, the health of Miss Eliza A. Simmons had become so impaired that it was evident she would not be able to teach for a considerable length of time. Under these circumstances the committee voted to grant her a vacation for the school year 1886–87, and we hope to be able in our next report to state that she has returned to the work for which she has such unusual qualifications. Miss May C. Hardy, a graduate of our schools and of Smith College, has been appointed to fill this temporary vacancy.

At the Russell School several changes have occurred. Miss Georgie M. Tupper, an excellent teacher, resigned, to the regret of the committee, at the close of the summer vacation. Miss Sarah E. Deane was appointed in her place as teacher of the second division of the fifth grade, and was succeeded at the end of November by Miss Elisa A. Sargent, who now holds the position. Miss E. G. D. Kennard, the teacher of the second primary class, was unable, on account of continued ill-health, to return at the end of the summer vacation, and Miss Lucy O. Fessenden, who had filled the place during the early part of the year, withdrawing, Miss M. Carrie Lawrence, a graduate of our High School, was appointed. At the beginning of the spring term, the third primary class, which had become much too large for one room, was divided, half going into another room and making necessary the fitting up and occupation of the only remaining unoccupied room in the building. Miss Lizzie A. Day, who had previously acted as assistant, became teacher of the new school thus formed.

In the upper part of the town there were two changes at the beginning of the school year: Miss Clara A. Farwell, teacher of the sixth Cutter grammar class, being succeeded by Miss Mary J. Copeland, and Miss M. B. Farrington, of the Locke primary school, by Miss Fannie E. Taylor. Unfortunately, both these teachers have been prevented, on account of sickness, from attending constantly to their work, the employment of substitutes by the committee being necessary on three occasions, once for a period of more than a month. Such changes are sure to be detrimental to the success of any school. But we hope and believe that this will prove a merely temporary disadvantage. The committee voted in June to give to Miss Mary L. Pierce, who was known from experience to be a judicious and excellent teacher and a careful disciplinarian, the supervision of the three schools in the Locke building, with authority similar to that of the grammar masters, and to increase her salary in consideration of the added responsibility.

This step was taken in compliance with the wishes of the parents in that section of the town that the committee might do something to improve the general discipline and moral tone of the schools in the Locke building. The discipline here had suffered considerably, owing to the fact that under our graded system three schools had been thrown together in one building, and no one of the three teachers had been granted any special authority or responsibility outside her own room, and did not feel called upon to act in cases affecting pupils other than her own. This was one of the points presented as needing our early and careful attention in that section of our town, at a special hearing given promptly and willingly by the school committee soon after the writing of our last report, in response to an urgent request. This difficulty, with every other difficulty or point presented, had long been recognized by the committee, and had been discussed re-

peatedly until it was threadbare. Yet the entire matter was referred to a special sub-committee for careful investigation. They reported at a subsequent meeting, and of course admitted the importance of all the points presented, but with the exception of the change in the Locke School, just referred to, showed conclusively that no practicable remedies could be employed at once without interfering with our graded system and being detrimental to our town schools taken as a whole.

It may be well to mention that Prof. Dorchester was a member of the committee bringing the subject before us, and later served the school board on the special committee having the matter in charge.

Serious offences against discipline have been few. Such cases of truancy as have arisen have been attended to promptly by the truant officers, with the ready co-operation of parents, and settled without resort to any extreme measures, the offending scholar returning to school in each instance.

The course of study has remained substantially the same. One change at the High School deserves mention here. Every scholar, following either the regular classical or the regular English course, is now required to pursue the study of English for the full three years. We believe that whatever else be omitted, every graduate of the High School ought to have some knowledge of our language and its literature, and that any course of study should have this end in view.

In keeping our course of study abreast with the times and up to the standard requisite in fitting pupils for college, etc., a few changes in text-books are necessary almost every year; these have been mainly in substituting new and revised editions of old text-books, or in introducing entirely new manuals, and, generally, in our constant efforts to maintain the reputation of our schools as among the best in the State, new and improved adjuncts to study are examined as they appear, and

adopted when fairly tested, or when recommended with good reason by those teachers who wish to use them.

Thus, during the year, an unusually large supply of maps, charts, etc., has been purchased for the Russell School, where it was found they were much needed, and in like manner at the High School, the purchase of physical apparatus to the extent of nearly $100 worth has kept that department in a satisfactory and advanced position.

Toward the close of the year, in November, when it became necessary as usual to begin the afternoon session at half past one, on account of the early approach of darkness, it was found necessary to take some steps to overcome a growing and self-evident evil, occasioned by a large number of scholars coming from a distance, bringing their lunch, and remaining in or about the buildings, during the noon intermission, without being under the immediate supervision of any teacher or any one in authority. The danger under such circumstances to the discipline of the whole building, to good manners and good morals generally, must be self-evident to all, and needs no further comment.

The number remaining at noon had increased from year to year, till at last the crisis came in November, when so many remained in some of the buildings that some action seemed absolutely necessary in the matter.

A special meeting of the committee was called by the chairman to consider this difficulty, when the recommendation of the grammar masters was adopted and the so-called no-recess plan was given a trial during the two months of December, 1886, and January, 1887.

Under this plan the morning session closes at half past eleven o'clock or soon after, thus giving the usual recess of two hours between the morning and afternoon sessions, and clearly leaving no excuse for the further continuance of the evil to be remedied.

Both committee and teachers were pleased at the opportunity offered for trying the no-recess plan, and at the time of writing this report, the success of this plan is a surprise to all. The majority of both bodies had opposed it on theoretical grounds, but the result with us will probably be as it has been almost invariably in other towns and in cities where it has been placed on trial, viz.: the plan gives so much satisfaction to scholars, parents, and teachers as well, that it will, without doubt, be adopted permanently, at least during the cooler months of the year.

In the department of music, we are enabled to present a report of more than ordinary value, since it has rarely been our good fortune to appoint a sub-committee so well qualified for their special work; being all musicians or at least unusually well read in music, and therefore well able to give a musical opinion; viz.: Messrs. Wood, Rawson and Watson. From time to time during the year, they have given us most satisfactory reports of the work being done in their department, and of the almost wonderful results attained, invariably giving the credit for this to the musical instructor, to whom it belongs without question. Mr. W. E. Wood, chairman of the sub-committee on music, reports as follows: "Musical attainment in all the schools was never at a higher point than at the present time. Much progress has been made during the past year under the able instruction of Prof. L. B. Marshall. In place of the tendency to rote-singing which has been somewhat prominent in former years, the ability to intelligently comprehend musical notation and read really difficult exercises at sight is becoming more and more manfest. This result is in a large measure the outcome of progressive methods of imparting information, by which even young scholars are enabled to see that the difficult intervals formerly represented only by the use of

chromatic signs really exist in the diatonic major scale. Familiarity with all the intervals of the natural scale, both usual and unusual, is taught to be the basis upon which the most irregular passages, even when absolutely expressed, can be read and sung; and to aid the instructor in making clear to the minds of the various grades of scholars this ground work of all advanced music, the committee have placed in the schools a series of comprehensive Modulating Charts. Even before their introduction, the scholars had attained excellent proficiency in the example of modulation, exercises which were unknown in our schools until attempted by Prof. Marshall about one year ago.

Upon the whole, the past year can be recorded as one in which unusual musical progress has been made, and we look for a still greater ratio of accomplishment during the next year, under the present excellent methods of instruction."

In conclusion, we renew the wish so often made in former reports, that more frequent visits be made to all our schools and especially to those departments in which each one has some special interest. A better knowledge of the condition of our school buildings, their ventilation and sanitary arrangements, such as would be obtained from personal observation, would have prevented in several cases, much anxiety and uncalled for (and perhaps almost unjust,) criticism during the past year, while a personal acquaintance with teachers and their methods always results in the best interests of pupils, teachers and parents. We would suggest that visitors could perhaps see our High School with much profit to all concerned, the public rhetoricals given by Mr. Fisher on Fridays offering a fine opportunity for encouraging that

school. The exercises in music, particularly those under the immediate supervision of Prof. Marshall, would probably show as tangible results as can be seen in any special study, while we believe the good work in this department surely merits all the encouragement which frequent visits give.

Approved by the School Committee.

WILLIAM A. WINN,
Chairman.

SELECTMEN'S REPORT.

The Annual Report of the Selectmen of the town, for the year ending Dec. 31, 1887, is herewith respectfully presented:

Highways.

Amount appropriated by the town,		$10,500 00
"	" for sidewalks,	600 00
"	" for North Union St.,	200 00
"	" November, 1887,	1,500 00
"	received for watering streets, concreting, gravel, street scrapings, etc.,	1,914 23
		$14,714 23
Expended as per Treasurer's detailed report,		14,402 97
Balance unexpended,		$311 26

Total number of loads of gravel and stone placed upon streets, not including that used upon streets being constructed where gravel was attainable without carting from a distance, and distributed as follows:

Arlington avenue,	4521 loads.
Appleton street,	192 "
Academy "	30 "
Appleton court,	4 "
Bow street,	78 "
Broadway,	138 "
Claremont avenue,	4 "
Forest street,	148 "
Florence avenue,	10 "
Hillside "	10 "
Lake street,	16 "
Lowell "	27 "
Maple "	5 "
Mystic "	683 "
Mt. Vernon "	2 "
Montague "	48 "
North Union "	392 "
Park avenue,	382 "
Pleasant street,	969 "
Pleasant-street place,	4 "
Summer street,	164 "
Spring street,	4 "
Schouler court,	4 "
Tufts street,	24 "
Vine "	13 "
Warren "	71 "
Westminster avenue,	188 "
Wollaston "	16 "
Winter street,	78 "
Total,	8225 loads.

Arlington Avenue.

At the March meeting, the town voted to order up the horse railroad tracks and locate them in the middle of the street, which has been done from the terminus of the road to a point nearly opposite Linwood street. Probably few of our citizens were aware at that time of the extent and expense of the work laid out. A great portion of the old road-bed of the horse railroad was a deep, sandy loam, which had to be removed and filled in with crushed stone and gravel, and although it has been a costly piece of work, we think it a great improvement to the town, and we have a road that will need very little repairs for some years to come. In spending so much time and money on this, we had to neglect some work that was needed in other parts of the town, and call for more money at the November town meeting. The embankment near the "old brick schoolhouse" has been removed, thereby widening the street and improving it for public travel. General repairs have been made along the avenue, from the Lexington to the Cambridge lines.

We desire to call the attention of the citizens to the fact, that no estimate of the expense of repairing the avenue after the removal of the horse-railroad track was included in the general appropriation for highways. The amount expended by the town thus far for this work has been $3716.10. There is still a small portion of the work unfinished, which should receive attention early in the spring.

Acton Street.

A large portion of this street has been built, together with sidewalks, the past season, at a cost of $342.75. It will require about one hundred dollars to blast the ledge and complete the street.

Appleton Street.

Some repairs have been made on this street, including the grading of a sidewalk between Park avenue and Vine street. A concrete gutter has been laid from Acton street to the main avenue. Some repairs are needed on the old portion of this street.

Broadway.

Some method should be adopted to dispose of the surface water in the hollow near the residence of Mr. Puffer.

Forest Street.

Repairs have been made nearly the entire length, and the street is in very good condition.

Highland Avenue.

Will need attention the coming season.

Hillside Avenue.

A section of gutter has been paved with stone. Other sections should be treated in the same manner.

Henderson Street.

Water grates have been placed in the hollow, taking the surface water into a drain pipe running to Alewife brook. Some blue gravel is needed in the centre of the street to crown it up.

Lake Street.

Some portions of this street need to be repicked and

rolled, and some of the more flat portions need to be crowned up with stone and gravel.

Mystic Street.

Sections near the residence of Mr. Stowe and Fowle's mill have been repaired the past season by crowning with stone and gravel. The street is in very good condition except the hill near Winchester line, which needs attention as soon as possible. Much heavy teaming goes over this street, and it is in a very poor condition; and as there is no good gravel in that locality, suitable repairs should be made principally with crushed stone.

Montague Street.

This street, recently accepted by the town, has been placed in fair condition with material obtained on the street.

North Union Street.

The appropriation of $200 made by the town has been expended, and a decided improvement has been made in the street.

Pleasant Street.

In accordance with the recommendation made in report of last year, that portion of the street between the residence of Dr. Hodgdon and the main avenue, has been reduced to grade and crowned with stone and gravel. That portion of the street from the residence of C. O. Gage, Esq., to Belmont line should be rebuilt in the same manner as soon as practicable.

Park Avenue.

A portion of this street has been regravelled, and sidewalks repaired. The concrete gutters have been repaired and skimcoated. Other portions of the hill will require gravel the coming season.

Westminster Avenue.

Has been repaired with gravel, and is in good condition. Railings have been put up on the westerly side, and the bank wall near the residence of H. E. Lewis has been relaid.

Watering Streets.

The streets have been watered in the same manner as heretofore, by the teams of the highway department, the abutters subscribing a portion of the expense.

Sign Boards.

Several have been repaired and repainted, and some new ones put up. Some method should be adopted to detect and punish persons who maliciously deface and destroy so many signs each year.

Stone Crusher.

The building has been shingled on one side, and some other repairs made.

A larger amount of stone has been crushed and used the past season than for any one year in the last ten, consequently we have but few stone on hand; and, in order to meet the requirements of the ensuing season, some will have to be purchased.

Teams and Tools.

We have five good horses. One having died, it will be necessary to purchase one to take its place early in the season. A new two horse cart has been added, and one single cart will be required. The tools have been kept in their usual condition.

Almshouse.

Until this year the Superintendent of Streets has had charge of the Almshouse. But, considering the amount of work and supervision needed on the highways, we concluded to separate the two departments this year, and appointed Mr. Darwin A. Proctor Superintendent of the Almshouse. The house and its surroundings appear to be well managed, and the inmates well cared for. So far, we are well satisfied with the result of the experiment.

The buildings should be painted next year and some small repairs will be needed.

Amount appropriated by the town,	$1,700 00
" received for board, and products sold,	541 25
Expended for supplies, repairs, etc.,	2,367 27

Whole number of inmates for the year,	11
Present number,	9
Died,	2
Number of tramps fed and lodged,	267

Outside Poor.

Amount appropriated by the town,	$2,000 00
From income of Poor Widows' Fund,	50 00
	$2,050 00

Expended,	$2,047 44
Balance unexpended,	2 56

Street Lamps.

The contract with the Wheeler Reflector Co. was renewed on same terms as last year.

The Arlington Gaslight Co. furnish gas for 90 lamps, and the Wheeler Reflector Co. light 144 lamps.

The lamps are under the charge of Mr J. H. Fermoyle.

Coal.

As usual, letters were issued requesting bids for supplying the town with coal.

Mr. Warren A. Peirce was awarded the contract. he being the lowest bidder; price, $5.15 per ton, and $5.80 for Lehigh.

Cemeteries.

At the annual meeting in March the Selectmen were appointed Committee on Cemeteries, and make the following report:

Town appropriation,	$500 00
Unexpended balance, Dec. 31, 1886,	174 07
Income from Robbins Fund,	202 00
	$876 07
Expenditures,	698 66
Unexpended balance,	$177 41

The committee have removed a number of trees from the Old and Mt. Pleasant cemetery, and would suggest that no trees be planted near the lots as they soon discolor the monuments, and render them unsightly.

We are pleased to notice the interest generally taken, of late years, by owners of lots, to keep them in good order. But there are some exceptions. A few lots seem to receive no attention whatever by the owners. In some cases we have spent a little time on lots owned by persons who have left the town for parts unknown; but there should be no excuse for parties living in our town or neighborhood, neglecting their lots so as to mar the good appearance of the cemetery.

Mr. John H. Hartwell has had charge and has kept the grounds in good order.

Town House.

Quite extensive repairs have been made on the building. The roof was in a very bad, if not dangerous condition. It has been well braced and bolted, the cupola repaired and coppered underneath, and is now probably as strong as when first built. The inside has been painted, the ceiling and walls tinted, the rostrum remodelled, and stairs made to a waiting-room below. We have endeavored to do the work thoroughly, as far as the funds we had would admit of, thus leaving some things undone which we would liked to have finished this year. A new floor should be laid in the hall, the cells in the Lock-up re-arranged, and some other small repairs are needed. To put the outside walls in good order would be an expensive job, and we have left that for future consideration by the town. An appropriation of $650 was made at the November town meeting for new seats in the hall. We have contracted with the Harwood Manufacturing

Co. of Boston for 360 chairs at a cost of $1.40 apiece, making a total of $504.

Licenses.

In accordance with Chapter 431 of the Acts of the Legislature for 1887, we have issued two sixth class licenses.

Police.

This department has been vigilant and efficient in guarding the citizens' interests, and we feel we may safely say the year has been a noted one for good order and good government.

Details of this department will be found in the following report.

To the Honorable Board of Selectmen:

GENTLEMEN—I respectfully submit to you the annual Report of this department for the year ending December 31, 1887:

Whole number of arrests during the year, 105. Males, 103; females, 2.

Larceny,	5	Non-support of wife,	1
Trespass,	1	Assaults,	9
Breaking and Entering,	1	Violating town by-laws,	1
Drunkenness,	61	Violating liquor law,	8
Bastardy,	1	Disturbing the peace,	11
Vagrant,	1	Removing human body without permit,	1
Insane,	1		
Tramp,	1		
Lewdness,	1		105
Cruelty to animals,	1		

Of those arrested for drunkenness, at least one-half of them came direct from Boston. One, arrested for disturbance, was taken from the railroad train. While the number arrested for drunkenness is more this year than last, the number arrested for assaults and disturbing the peace is much less.

Three arrests were made here for officers of other towns. Twenty-four warrants have been sworn out to search for liquors, on seventeen of which nothing was found; two were prosecuted, where evidence was strong, of violation of liquor laws, but they were discharged. Six have been convicted for violation of liquor law, and two of them are now in common jail.

Soon after the first of the year Michael J. O'Brien, on account of illness, was obliged to give up work, and Special Officer Daniel M. Hooley took his place until May 1st, when he was appointed a regular officer. He, with officers Barry and Austin, deserve credit for the arrest of Henry Murray, who broke and entered the post-office, Nov. 15.

Five lost children have been cared for and returned to their homes.

267 tramps have been sent to the Almshouse for lodging; males 257, females 10, and 29 have been lodged at the station.

EUGENE MEAD,
Chief of Police.

Fire Department.

The Chief Engineer's and Treasurer's Reports will furnish the details of this department.

Respectfully submitted.

JAMES A. BAILEY,
GEORGE D. TUFTS,
GEORGE D. MOORE,
Selectmen of Arlington.

TREASURER'S REPORT.

B. DELMONT LOCKE, *ex-officio*,
} *Trustees of Pratt Fund.*

ARLINGTON, Dec. 31, 1887.

REPORT

OF THE

TRUSTEES OF THE ROBBINS FUND.

The Trustees of the Robbins Fund make the following "report of their doings" during the past year:

The fund of $5000 is deposited in the Arlington Five Cents Savings Bank. The interest on the same from Jan. 1, 1887, to Jan 1, 1888, has been paid to the Town Treasurer, to be expended under the direction of the Cemetery Committee.

Respectfully submitted.

WILLIAM G. PECK,
HENRY SWAN,
R. L. HODGDON,
B. DELMONT LOCKE, *ex-officio*,

Trustees of Robbins Fund

ARLINGTON, Dec. 31, 1887.

REPORT OF WATER COMMISSIONERS.

The Water Commissioners beg leave to submit the following Report for the year 1887:

It will be seen upon reference to the Treasurer's report of the receipts and expenditures that the receipts for water rates have increased over the year 1886, $672.61, and in two years there has been a gain of $1,657.73. This is a gratifying result, for it will also be seen that the running expenses have not increased but on the other hand are $356.90 less than last year.

In accordance with the vote of the town, we have laid main pipes in places where we have found there would be a proper return in water rates for the necessary outlay.

In Grove street we have laid 180 feet of 4-inch iron pipe, at a cost of $129.10. The appropriation made by the town for this pipe was $150, and there is therefore a balance unexpended of $20.90.

In Wellington street we have laid 513 feet of 4-inch iron pipe, at a cost including one fire hydrant of $393.90.

This is a new street extending out of Pleasant street through land of Dr. Hodgdon, accepted by vote of the town, at the November meeting; one full plumbed house has already been built on this street, and others are in contemplation. A good revenue to the town is assured.

Have laid at John Kelley's, north side avenue, 550 feet $1\frac{1}{4}$ inch cement-lined iron pipe, at a cost of $99.97—a good investment.

Have laid in Cottage avenue, leading out of Henderson street, 460 feet of $1\frac{1}{4}$-inch cement-lined iron pipe, at a cost of $81.50. Income large.

Laid in Russell court 333 feet of two-inch cement-lined iron-pipe, at a cost of $94.98.

It was found necessary in this case to make the outlay, because of the incapacity of the inch pipe in the Court, it having become too old and rusted to furnish takers on the line what water was needed.

Have laid 270 feet 4-inch iron-pipe on Jason street which completes the whole length of the street, at a cost of $314,-71. This amount was considerably augmented by condition of the street; being obliged in order to dig a proper trench to lay the pipe, to do a large amount of blasting. Building has progressed to such an extent on this street that though expensive to lay the pipe, a good income is certain.

New Services.

32 new services have been added during the year at a cost of $370.08, an average of 11.56\frac{1}{2}$ each.

Kenison Suit.

By last year's report it will be seen that a judgment was rendered against the town in this suit for $500, and that an appeal was taken to the Supreme Court. A decision has been rendered sustaining the judgment of the lower court, amounting with cost to $891.74, which we have paid. This payment together with the amount paid last year on account

of said suit $325.89, foots up as a total payment, $1217.63.

Flint and King Suits.

The suits brought against the town known as the Flint and King suits, for damages by flowage of land in Lexington, have not come to trial. After an investigation of these cases, and advice of counsel, together with the certainty of a large expense, attending a court trial, we have deemed it for the best interest of the town to favor a settlement of these cases. A settlement has been agreed upon; the conditions of which are such that no claim hereafter will be valid.

It will be noticed that the amount appropriated by the town to make up the deficiency of income for the payment of interest on the Water Scrip was $7000, which is a reduction of $3000 since 1885 in favor of the town.

The Commissioners estimate that $6000 will be all that will be required for this purpose for the year 1888.

This shows conclusively that there is going on from year to year a reduction of the drain upon the town treasury regarding its indebtedness on account of the water works. We see no reason why this should not continue and that soon the works will be found to be self-sustaining. There are several applications for extending new pipe the coming year, amount already nearing that laid this year.

Repairs this year have not required very much of an outlay, though something on hydrants and gates have been expended. We believe they are in good condition, we have had about the usual amount of leaks and breaks, during the year. Whenever occurring they have been promptly repaired.

The project of renting the room under the Town Hall as a

place to deposit stock, tools, do work, etc., continues to receive our approbation.

Mr. Thomas Roden has been continued in charge of the work and has given good satisfaction.

It is recommended that the town grants an appropriation for the purpose of extending main pipes, and placing new hydrants where in the judgment of the board it shall be for the interest of the the town to do so.

The Commissioners still hold to many views expressed in last year's report as to the present condition and future requirements of the water works. Nothing of special note has occurred regarding the works during the past year.

It is necessary that rules be adopted governing the use of the water. The board trusts that the citizens will strictly conform to them. They are adopted by the town, and the Commissioners are expected to enforce them whatever they may be.

For detailed statement we refer you to the Treasurer's report.

Uses for which water is supplied, as reported by the Registrar:

B. DELMONT LOCKE, *Treasurer.*

Arlington, Dec. 31, 1887.

Extracts from Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely :

DWELLING HOUSES.

Occupied by one family, for the first faucet,	$6 00
For each additional faucet, to be used by the same family,	2 00
Where a house is occupied by more than one family, one faucet only being used for all, for each family,	4 00
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional water-closet,	3 00
For hopper water-closets,	8 00
Where bath-tubs or water-closets are used by more than one family, for each family,	4 00
Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both. *Provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than	25 00

BOARDING HOUSES.

For the first faucet,	10 00

Each additional faucet,	$2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

STORES, OCCUPIED AS OFFICE, SHOP, OR SIMILAR PURPOSE.

First faucet,	$6 to $20 00
For each additional faucet,	2 50
For water-closet or urinal,	6 00

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water,	$6 to $25 00

HOTELS.

For each bed for boarders and lodgers,	3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

PUBLIC BATHS.

For one tub in public bath-house,	10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water-closet,	3 00

STABLES.

Private Stables.	For the first horse,	5 00
"	For each additional horse,	3 00

Private Stables.	For one cow,	$2 00
"	For each additional cow,	1 00
Livery, Club and Boarding Stables.	For each horse,	3 00
Car and Omnibus Stables.	For each horse,	2 00
Truck and Cart Stables.	For each horse,	2 00
Provided,	that in no case shall any stable be charged less than	5 00

The rates for stables include water for washing carriages without hose; when hose is used, $3.00 additional.

HOSE.

For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets, and watering gardens (and the use of the same shall be limited to two hours per day), not less than	$3 00

STEAM BOILERS.

For each boiler in use not over twelve hours a day, for each horse-power,	6 00

BUILDING PURPOSES.

For each cask of lime or cement,	6 cents

ORNAMENTAL FOUNTAINS.

Ordinarily used three hours a day for a period of not more than four months a year:

For a jet of 1-16 of an inch,	$3 00
" " 1-8 "	5 00
" " 1-4 "	8 00

To be cut off at discretion of the Superintendent.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners, and the rates fixed in the foregoing tariff may be varied by the Water Commissioners, whenever in particular cases in their judgment the interests of the town shall require.

AUDITOR'S REPORT.

The undersigned hereby certifies that he has audited the books and accounts of B. DELMONT LOCKE, as Treasurer and Collector of the Town of Arlington, also as Treasurer for the Arlington Water Works, for the year 1887, and finds the same correct, with vouchers for all payments, and the balances of cash as stated by him.

DAVID P. GREEN,
Auditor.

ARLINGTON, Jan. 23, 1888.

ANNUAL REPORT

OF THE

CHIEF ENGINEER OF THE ARLINGTON FIRE DEPARTMENT.

To the Board of Selectmen of Arlington:

GENTLEMEN—In accordance with custom and the rules of the town, I respectfully submit my Annual Report for the year ending Dec. 31, 1887:

FIRES.

The department has been called out twelve times, but has had only three serious fires to contend with, as follows:

Oct. 25. S. A. Fowle's drug mill. Insurance on building and contents, $8500. Loss, $1600.

Nov. 12. Unfinished house of Mr. C. Allen on Jason street. No insurance. Loss, $1900. Cause unknown.

Nov. 12. House of Mr. Wm. Nightingale, on Jason street. Insurance, $3000. Loss, $2600.

The other fires have been small, and with no great loss.

BUILDINGS.

The buildings and apparatus are in good repair. Land has been leased for five years, and and a house has been built on the same at Henderson street. This company has been called to one fire.

The Hook and Ladder Company has labored under a great disadvantage since it has had no regular horse to use since August.

Stalls should be fitted up in the houses for the horses. The horses should be worked on the highways. I think this would be a step towards improvement.

I would recommend that a horse be purchased for the Hook and Ladder Co., to be kept as near the house as possible. I would also recommend that a telephone box be placed near the Hose-house on Henderson street.

APPROPRIATION.

For the coming year I would recommend an appropriation of $2500 to meet the expenses.

PERSONAL RECOGNITION.

In closing, I desire to express my thanks to your Board, to my assistants, and the members of the Department.

Respectfully submitted.

CHAS. GOTT,
Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

The Town Treasurer's Report, and the Librarian's Statement given herewith, cover the ordinary points of interest in the affairs of the Public Library during the past year.

The completion of the new hand Catalogue, consolidating the old Catalogue of 1876, the Catalogue-Supplement of 1881, and the numerous printed lists which have accumulated in the past six or seven years, has been unavoidably delayed; it is now well under way, however, and we hope to see the enlarged and perfected work pass through the printer's hands during the coming season.

This delay accounts for the considerable balance in our favor which appears in the Treasurer's accounts; the excess of appropriation having been carefully economized, to be used in 1888 for the purpose for which it was originally designed.

The completed Card Catalogue is daily proving its very great usefulness to the Librarian and her assistants, and to students looking up particular subjects. Although it has not yet been moved into the Reading-Room, it is open to the inspection of all applicants.

J. T. TROWBRIDGE,

For the Trustees.

Dec. 31, 1887.

LIZZIE J. NEWTON,
Librarian.

ARLINGTON, Dec. 31, 1887.

SCHOOL COMMITTEE'S REPORT.

To the Town of Arlington:

In compliance with the statutes of the Commonwealth and in conformity with established custom, the School Committee respectfully submit their Report for the year 1887.

On reviewing the work done during the past year, it might seem at first sight that from the nature of things there was little new or striking to call to the attention of the town. Our graded system has long passed the experimental stage. Most of our teachers have been with us long enough to gain that knowledge of the peculiar needs of their several grades which comes only from experience. Their faithfulness and efficiency are well known. Such changes and improvements in methods as have been introduced from time to time and described in former reports have become a part of the regular work, and cease to call for special mention. In short, the general condition of the schools continues satisfactory, and is so far an established fact, that there are very few points which would seem to need explanation.

A more careful survey however of the path traversed shows that in several important respects the year just ended, has been a marked one. More than one question of importance has come before your Committee, has been considered with care and decided as in their judgment was right. Of

these decisions, the one which has perhaps excited the most wide-spread interest has been the division of the Cutter district and it seems worth while to set forth the facts relating to this matter in some detail,—not only from its interest to many of our citizens but from its bearing upon other matters—especially the work of the Prudential Committee to be alluded to further on.

The Cutter district has for a great many years included the whole western end of our town from the Lexington boundary to a line shifting from time to time, but generally not far from Highland avenue or Grove street. The Cutter school-house, containing four rooms, is near the eastern end of the district. When it—or rather its predecessor—was built, the location seems to have been quite convenient, being as nearly as possible the central point of the school population, but as the population increased towards the other end of the district, especially with the rapid growth of the Heights, considerable inconvenience ensued. Additional rooms were hired for a time, and finally in 1877 a new school-house of four rooms was built at the Heights and known as the Locke School. No division of the district was made nor did the number of scholars warrant the establishment of four new schools, the two rooms on the first floor only, being occupied at the outset. However, the number of pupils soon increased so that another room was required and for several years preceding last summer, three rooms were occupied, and the scholars distributed as follows:—two rooms in the Cutter School were assigned to the four upper grammar grades—two grades to a room; two rooms in the Locke School to the fifth and sixth grammar grades; while the scholars in the three primary grades living in the western end of the district attended one room in the Locke School, and those living at the eastern end found accommodations in the two remaining rooms in the Cutter School.

Naturally enough, this arrangement, although in the judgment of the Committee the best that could then be made, was not entirely satisfactory. A scholar in any grammar grade was likely to be compelled to pass by the school-house nearest his home to seek an education at the other end of the district, while groups obliged to pass each other going to and from school, were sometimes apt to engage in a sort of border warfare to the serious vexation and disturbance of the neighborhood. The dissatisfaction with this arrangement constantly increased, and finally became so great that, as mentioned in our last report, the Committee again considered the matter in response to frequent requests from parents, and Miss Pierce, the senior teacher in the building, was given complete control over all the schools in the Locke school-house in matters of discipline; a change which again seemed to be the best we could make at the time. Then the difficulties were brought before our last annual town meeting and discussed at some length, till finally the whole matter was sent back to the School Committee, where it belonged.

The Committee hardly needed this stimulus, the subject having already been so many times considered and examined by them with care.

However, a sub-committee of three was promptly appointed, who worked patiently from first to last for a satisfactory solution of the difficulty which they at last found. The rapid growth of school population had now made the establishment of a fourth school in the Locke building justifiable. Therefore they were able to report a plan which was adopted by the Committee, and went into effect in last September.

The old Cutter district was divided by a line just below Forest street into two distinct grammar districts—the Cutter and the Locke. In each district are four schools, the nine grammar and primary grades existing under our system being distributed among them, by putting two classes in each

room, except the upper, where there are three. Each district is under the supervision of the principal of its school, and, in fact, they are entirely independent, with two exceptions. First the master of the Cutter School may be called upon if necessary to aid in the enforcement of discipline in the Locke School, and, secondly all scholars in the first grade attend the Cutter School during the present year—at the request of the parents who wished that their children, who had already been under Mr. Soule's instruction for a year, should so continue.

The plan thus established has worked well—so far as the Committee can judge, and has much pleased the citizens of that section. A special word of deserved praise is due to the teachers who have heartily worked for the success of the new system, although in almost every case their duties have been made more difficult, since each teacher has been obliged, in whole or in part, to teach a new set of subjects to a new school.

The difficulties are settled in this way for the present. One serious disadvantage, necessarily introduced, has been the break in our graded system caused by putting two classes in one room and especially by putting three classes in the principal's room.

It will be remembered that formerly the primary teacher in the Locke School had three classes under her care. The difficulty may appear to have been simply transferred to a teacher in charge of older pupils. But we believe that the principal of a grammar school can handle the three highest grades, the classes being small in numbers, with much less difficulty than the primary teacher can manage the three lowest grades, the classes being large enough to over-crowd the school-room.

It may be well to bear in mind however, that clearly where scholars of so many grades have to be taught by one

teacher the time which can be given to each class is necessarily abridged and parts of the work must be hurried over.

It seems to be the conclusion reached by nearly everyone who has carefully looked over the whole subject in all its bearings that as the school population increases and outstrips the present accommodations the final remedy may be the building of a new school-house near the Foot of the Rocks which may contain the four or five highest grades from both districts, each class to be under one teacher, and the principal to supervise the whole district, while the present buildings will serve to accommodate the lower grades.

Although the need of such a building may seem not urgent at present, no harm can be done by bearing the matter in mind, and considering at any rate the selection of a proper site before it is too late.

A far more pressing need exists at the other end of the town, where the two rooms in the Crosby school-house have served to accommodate all the primary scholars from that district. The rapid and continuing growth of that part of the town has caused these rooms to become greatly crowded of late years. The subjoined figures will tell the story of the increase in these schools more clearly than words. The whole number of scholars in the Crosby Schools in September, 1880, was 75; in 1881,—77; in 1882,—77; in 1883,—83; in 1884,—79; in 1885,—104; in 1886,—84; and finally in September last,—97.

It will be observed that the climax was reached two years ago, in 1885, when these two rooms furnished accommodations for 104 scholars.

Turning now to the school report for that year, we find that the Committee called attention to the situation at some length, the statement closing with these words: "It seems none too soon for the town to provide for the inevitable by erecting at once on the old grounds a substantial school building, with at least four large rooms."

At the present time we think a third school should be established at once, and a fourth in the near future. Therefore we again advise that a four-room building be erected as soon as may be.

As predicted in last year's report the Prudential Committee found no great alterations or extensive repairs to make in properly caring for the school buildings and grounds. We believe in the policy of having everything that is done, done thoroughly and properly once and for all, and this statement applies to the alterations and repairs made this year, as well as to those made heretofore. As fully explained in former reports such a plan leaves little to be done from year to year beyond attending to the usual general repairs, and it keeps our school property in a generally satisfactory condition.

The Cutter school-house, with its out-buildings and fences, received one good coating of paint, and the shingling of the roof, begun last year, was completed. Twenty new seats and desks of an approved pattern were put in Miss Brady's room in place of old ones which were out of repair and too small for the grades occupying the room under the new plan. In fact, all the remaining seats and desks are out of repair and too small for the grades, being without ink-wells and without proper shelf-room for text-books. They should be replaced by larger and more modern seats and desks.

In the Locke school-house, the new plan necessitated of course the rearrangement of seats, desks, etc., in most of the rooms, and the purchase of considerable new school furniture, since the fourth and only remaining empty room was to be fitted for occupancy. The school furniture, seats, desks, etc., already in the building were transferred to the three rooms to be occupied by the lower grades, and properly arranged.

Miss Pierce wished to retain her old room, and so it was fitted up with seats, desks, etc., suitable for the three high-

est grammar grades,—only 24 desks being supplied for the present; enough, it is thought, to meet all probable demands. A new teacher's desk was purchased for this room, large and well adapted to all the wants and requirements of the principal of such a school.

It was found, soon after opening the fourth room, that the heating capacity of the two furnaces, which were expected to warm the whole building, would probably be taxed to the utmost. On some previous occasions it had become necessary to push these furnaces very hard. With the object of using all means at our disposal to aid in keeping the house warm, at the close of the year, two portable partitions were added in the lower hall just inside each entrance door, making in effect a good storm door at each end of the building. Bearing in mind the difficulties we have had heretofore in keeping this house supplied with good, healthy and palatable drinking water, it may be well to mention the fact that the cistern in the basement which supplies this school-house, was pumped dry during the summer vacation, and thoroughy cleansed. This insures for several months, at least, a supply of as pure water as could be desired, viz: —filtered rain water from a clean reservoir.

The Prudential Committee would call attention here to some alterations and improvements which we believe it is imperative should be made at once, and would ask that the proper appropriation of money be specially made for carrying these changes into effect.

At the Cutter school-house new floors of properly seasoned wood should be laid in both rooms in the second story; the wood-work and all the school furniture should be carefully cleaned, shellacced and varnished; in short, these rooms should be put in thoroughly good repair.

Even since the Cutter building was erected, the janitor has been obliged to wade through water to his furnaces, for

from one to three weeks during the annual spring thaws and freshets. On several occasions the water has risen high enough to put the furnace fires out.

The necessity of trying to get rid of such a difficulty must be obvious to all. It seems hardly necessary to mention the troubles and dangers resulting; among which are the damp cellar with consequent dangers and risks for so many children in the four rooms above; the annoyance to the janitor, not to speak in stronger terms; and the fact that certain exposed parts of the furnaces rust out and have to be replaced much more frequently than in any other of our school-houses. It is thought that a trench can be dug and a drain-pipe laid to take away all this water from directly beneath the furnaces. From the nature of the soil, the presence of ledges of hard rock, etc., the difficulties are insurmountable in the way of shutting the water entirely out of the basement at the outset.

When this drain-pipe is laid, advantage should be taken of the opportunity for laying a water pipe for a second supply of water,—one pipe to supply each story. For at present, there is so little pressure in the water pipes at this point, that no water can be had in the upper story while a single faucet is turned on in the lower.

It is thought that an appropriation of $650 will enable us to make these improvements.

It may be a surprise to many to know that the heating apparatus in the Russell school-house is inadequate for its purpose during our coldest winter weather. Such is the fact, however, which has become very evident now that all the twelve rooms are occupied.

The radiators in the building are sufficient and furnish enough radiating surface at all points, but the furnaces and boilers are not large enough to supply the steam required to fill them at the critical moment, even when pushed to their

utmost by skilled hands. The steam for heating the building has been supplied by two boilers, one of which only is used during the early fall and late in the spring months.

We would recommend that one of the boilers now in use be taken out, leaving the second in position, and that a tubular boiler be put in the place of the one removed,—a boiler large enough to furnish all the steam that can, by any possibility, be required during the very coldest weather, and with some considerable still in reserve. The economy of such a plan must be obvious to all; for then only a single furnace and boiler would be needed at any and all times. The small one would serve as at present, early and late in the season, while the new tubular boiler alone would supply steam enough during the winter season.

Some $650 will be required to make the desired change.

Turning to the work of the schools, we report that it has been properly carried on and that they are now in a condition quite creditable and satisfactory. The same teachers remain in charge, the only change in the number consisting in the addition of Miss Mary E. Rogers who was appointed as teacher of the new school in the Locke building. Miss Rogers is a teacher of experience and her work here already convinces us of her excellent qualifications for the position.

Miss Simmons has returned to her duties at the High School to the great satisfaction of all connected with it. During her year's absence her place was supplied by Miss May C. Hardy and it is a source of satisfaction to the Committee that we were able to find one of our own graduates capable of filling a position, in some respects of peculiar difficulty, with so much intelligence and success.

The High School has had a prosperous year. The building although never designed for the purpose and with some incurable defects has, nevertheless, within the last few years been so altered as to be much less unfit than formerly and

the rooms have been made attractive by the addition of valuable pictures, etc., procured largely by the efforts of the scholars under Mr. Fisher's direction.

The course of study has been modified from time to time as experience directed, and so as to make it conform to the requirements for admission to college, and, as it now stands, is printed with this report, together with the list of text-books now in use. This is done in response to frequent requests from parents and from others outside our own town for our printed course of study. We believe it will be seen to be an attractive and useful course, and one well adapted to modern needs.

To facilitate the work in the scientific branches, a considerable quantity of apparatus in physics and astromony has been procured at an expense astonishingly small compared with its educational value. Special mention should be made of Yaggy's Physiological Chart, which has recently been obtained.

The mention of Yaggy's Chart suggests a topic in regard to which inquiries have often been made, viz. the teaching of physiology in our schools with especial reference to the temperance question. The legal requirement is (St. 1885, ch. 322): "Physiology and hygiene, which in both divisions of the subject, shall include special instruction as to the effects of alcoholic drinks, stimulants and narcotics on the human system, shall be taught as a regular branch of study to all pupils in all schools supported wholly or in part by public money," except certain special schools. The Committee believe that the law is observed, not simply to the letter but in spirit as well, in all our schools, although as in all other studies the amount and character of instruction must vary with the age and capacity of the pupils.

In the grammar and primary schools there is little that calls for special comment. On the establishment of the Locke district Miss Pierce was made principal, with the same authority in matters of study and discipline as is given to the grammar masters in the other districts. Miss Scanlan was also given the same powers in the Crosby district. By such division of authority the proper supervision of schools is best secured, the schools in each district having a responsible head, while each school is under the further supervision of a sub-committee of this Board and all under the control of the Chairman. The question of the appointment of a Superintendent of Schools which has frequently been before this and former Committees again arose this year and was referred to a sub-committee who after mature deliberation

were unable to recommend the appointment of such an officer, believing that under the above described system, our schools are not suffering from lack of proper oversight.

The attendance of pupils has as a general thing been good. Parents evidently appreciate the advantages freely offered by our schools and willingly co-operate with the Committee in seeing that children attend school regularly and punctually. Such cases of truancy as have arisen have been promptly and vigorously taken in hand by the truant officers and satisfactorily and quickly settled, without further legal proceedings. It is a noticeable fact that these cases almost without exception have occurred in the Russell district.

The town has been remarkably healthy during the year 1887, as far as those contagious diseases are concerned which affect school attendance. While severe epidemics of contagious diseases, — notably of scarlet fever, — have appeared in Boston and in several of the smaller cities and towns about us,—some of such severity as to make the temporary closing of school necessary, the situation with us has at no time been grave enough to lead us to think for a moment of the advisability of closing any of our schools. In fact the question has never come before us at all in any form. And yet, under the circumstances described, it was to be expected that exaggerated reports should circulate of the existence of large numbers of cases of scarlet fever in our schools, and, on more than one occasion, of our decision to close some school.

We are fortunate in being able to report so favorably, since there are good reasons for believing that the State laws and our town rules bearing on this subject have not always been carefully and promptly complied with. These laws and the rules and regulations of our Board have of course been established for the general good, and constant watchfulness and willing obedience to such rules are at all times necessary.

Bearing in mind the old adage, "In times of peace prepare for war," and feeling that such fortunate freedom from epidemics as we have lately enjoyed is very apt to be followed by carelessness or at least indifference, it has seemed advisable to state here just what the statutes require and what our own special regulations provide.

The laws of the Commonwealth provide [Rev. St. 1882, Chap. 47, Sect. 9], that "The School Committee shall not allow a child who has not been duly vaccinated to be admitted to or connected with the public schools." Again they provide [St. 1884, Chap. 98], that the Selectmen or the Board of Health, and through them the School Committee shall be promptly notified of the existence of every case of contagious disease, by the householder in whose family such case exists, and also by the physician in charge. And again [St. 1885, Chap. 98], they provide as follows:

AN ACT

to prevent the spread of contagious diseases through the Public Schools.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

Chapter sixty-four of the acts of the year eighteen hundred and eighty-four is hereby amended so that it shall read as follows:—The school committees shall not allow any pupil to attend the public schools while any member of the household to which such pupil belongs is sick of small-pox, diphtheria, or scarlet fever, or during a period of two weeks after the death, recovery or removal of such sick person; and any pupil coming from such household shall be required to present to the teacher of the school the pupil desires to attend a certificate from the attending physician or Board of

Health, of the facts necessary to entitle him to admission, in accordance with the above regulation.

The rules of our Board read as follows:

1. No pupil shall be admitted into any school without a certificate from a physician that he or she has been vaccinated.

2. No teacher or scholar shall be allowed to attend school from any house in which small-pox, varioloid, scarlet fever, or diphtheria exists.

3. No teacher or scholar shall be permitted to return to school from any house in which small-pox, varioloid, scarlet fever, or diphtheria has existed, without a written statement from a physician that such length of time has elapsed from the commencement of the last case in such house as to make the return safe, in his judgment.

4. No teacher or scholar shall be allowed to attend school who is affected with measles or whooping cough.

5. Teachers shall have authority to exclude, temporarily, from school any scholar who may be affected with other diseases or eruptions of doubtful character; but all such cases shall be at once reported to the sub-committee having charge of the school.

It is hoped that all our town's-people will acquaint themselves with these rules and bear them in mind at all times; and that parents will, if necessary, err on the safe side, rather than run any risk in doubtful cases, until the doubt is settled. In such cases, if all will work together for the public good, we can reasonably expect to report just as favorably a year hence.

Mr. W. E. Wood reports for the sub-committee on Music as follows:

"Musical instruction has received especial attention in all the grades, both from Prof. L. B. Marshall and from the teachers. The new Holt and Tuft's text-books, which were introduced last year, and which have been supplemented during this year by an additional grade,—' The Introductory

Third Reader,'—have afforded abundant material for hard work, and it is gratifying to report that the interest of the scholars seems to have been stimulated by the vigorous harmony of the exercises and songs, which has caused them to develop, even among the younger classes, a comprehension of scientific musical chords and progressions, which once would have been thought to be entirely beyond their power to appreciate.

No year has ever produced better educational results in music in our schools than the one just closed. While the casual listener might say that the concerted singing of the classes is now no better than one year ago, the musically-versed can discern in their work a mastering of difficulties in intervals, in suspensions, in relation of keys, in discordant harmonies, and in broken time, which evinces faithful and intelligent application, and which is of more real benefit to the pupils than scores of pretty songs, rote-learned, could be.

Self-reliance on the part of the scholars has noticeably increased; and it seems fair to predict that a continuation of present methods of musical instruction will result in surprising accomplishments, in sight-reading and correct intonating, and will elevate the musical taste of our school-children to a standard of appreciation which was not possible to be obtained in former days except by expensive private tuition."

In conclusion we would commend our schools to your favorable consideration; and would ask that by more frequent visits to the schools while in session, and by an appropriation of money for school purposes, liberal as heretofore and commensurate with the grand object aimed at, you may show that our schools have your hearty support and your Committee your entire confidence.

Approved by the School Committee.

WILLIAM A. WINN,
Chairman.

REPORT OF THE COMMITTEE

ON THE

SOLDIERS' MONUMENT.

To the Town of Arlington:

The committee appointed by the town March 10, 1885, under Article 31 of the warrant, "for the building of a monument, in memory and in honor, of the patriotism of those citizens of the town, who lost their lives in military service in the War of the Rebellion," hereby report, that they have attended to the duty assigned them, erecting the Monument standing at the junction of Arlington avenue and Broadway.

The design and working plans were drawn by the eminent architects Messrs. Van Brunt & Howe of Boston; the builders were the "Mitchell Granite Works" of Quincy. The height of the Monument is forty-two feet; the foundation is of granite, nine feet deep, laid in cement; the base or podium of Quincy granite; the structure above the podium of Barre, Vermont, granite, with the exception of the

four monolithic panels of Westerly, R. I., red granite, upon which are engraved the names and brief records of thirty-three of the soldiers of this town, who sacrificed their lives, that the Nation might live.

The Monument bears, upon the pedestal, in raised letters, the following inscriptions:

On the front or westerly panel.

IN GRATEFUL REMEMBRANCE OF THE SOLDIERS OF ARLINGTON WHO GAVE THEIR LIVES TO THEIR COUNTRY IN THE WAR FOR THE DEFENCE OF THE UNION, 1861–1865.

On the southerly panel.

MANASSAS TO APPOMATTOX.

On the easterly panel.

"THAT THE GOVERNMENT OF THE PEOPLE, BY THE PEOPLE AND FOR THE PEOPLE, SHALL NOT PERISH FROM THE EARTH." —*Lincoln.*

On the northerly panel.

ERECTED 1886.

Encircling the entablature, is Webster's Sentiment,— "LIBERTY AND UNION, NOW AND FOREVER, ONE AND INSEPARABLE."

The inscriptions borne upon the monolithic panels of the shaft are as follows:

On the Front or Westerly Panel.

40th Reg. N. Y. Inft., Arlington Co.

ALBERT S. INGALS, Major,

Died May 3, '62,
Port Royal, S. C.

5th Reg. Mass. Cavalry.

JOHN DOUGHTY,
Died April 4, '64,
Readville, Mass.

HENRY L. BRISON,
Died April 30, '64,
Readville, Mass.

As early as 1865, the closing year of the war, the "Ladies' Soldiers' Aid Society" of this town donated five hundred dollars towards the erection of a monument to perpetuate the memory of our fallen soldiers. This money was placed in the hands of Mr. John Field, who acted as treasurer of the fund.

On Oct. 21, of the same year, a public meeting of citizens was held in the town hall, to adopt measures for carrying forward the work towards which the ladies had so liberally contributed.

Addresses were made by John Field, William E. Parmenter, John Schouler, Joseph S. Potter, Rev. Wm. E. Gibbs and others, earnestly commending the object, and a committee of fifteen gentlemen was chosen to procure the erection of a suitable monument.

John Field, Samuel Butterfield, James C. Converse, George H. Gray, John Schouler, John P. Wyman, Timothy Eaton, William E. Parmenter, Benjamin Poland, Addison Hill, Addison Gage, Samuel S. Davis, Joseph S. Potter, Josiah Crosby and Cyrus H. Cutter, constituted said committee. Subsequently at a meeting of the committee Albert Winn was chosen in place of Mr. Converse. John Field was elected chairman, and George Y. Wellington clerk of the meeting and committee.

Mr. Wellington kept a full record of this meeting, and of the transactions of the committee, which record is now in the possession of the town.

The committee went actively to work to procure voluntary subscriptions from citizens, with a view of asking the town to make an appropriation of such additional sums as might be required to complete the structure.

They received designs of monuments from different architects and decided upon one of granite, forty feet in height; but learning that the cost of building at that time, would be

largely in excess of their expectations, finally concluded to defer the erection to a later period. Subscriptions to the amount of about twelve hundred dollars had been promised the committee, one hundred and one dollars only of which had been collected; but, on account of the postponement of the work, no further collections were made. The sums paid were as follows: by James C. Converse $50.00; by William J. Niles $25.00; by J. Winslow Peirce $5.00; by Jesse Bacon $5.00; Stephen Swan, $5.00; by Stephen Symmes $4.00; by Dudley H. Tufts $3.00; by Edmund G. Eastman $1.00; by Howard W. Hill $3.00; a total of $101.00. To this sum was added by Joseph S. Potter $22.50, and by Francis A. Harris $65.00, each amount being the net proceeds of entertainments gotten up with a view of contributing to the monument fund, making in all $188.50. This money also was placed in the hands of Mr. Field, who deposited the same, less $7.38 expense account, and the $500.00 received from the "Ladies Soldiers' Aid Society," with $6.25 interest added, in the Savings Bank in the following manner:

Jan. 13, 1866,	$130.00
March 2, 1867,	506.25
July 6, "	51.12
A total of	$687.37

which constituted what was called the "Soldiers' Monument Fund."

The account above stated appears in a memorandum made by Mr. John Field, in a book now in the possession of his son and executor Mr. Wm. E. Field.

At a town meeting held April 5, 1869, under Article 21 of the warrant, "To see if the town will take any action or make an appropriation for a monument, etc., etc.," upon motion of William E. Parmenter, it was voted that the whole subject be left to a committee of three, to be appointed by

the moderator. John Field, Benjamin Poland and Samuel G. Damon were appointed said committee.

This committee reported at the town meeting held Nov. 2, of the same year, in favor of building a monument and in said report gave an account of the fund held in the Savings Bank for this object, and advised an appropriation by the town, of a sum not to exceed four thousand dollars for the purpose. On motion of John Osborn, four thousand dollars was appropriated. Samuel G. Damon, John Field, Benjamin Poland, William E. Parmenter, Francis Gould, Samuel Butterfield, Joseph S. Potter and Cyrus H. Cutter, were appointed a committee to carry out the vote of the town.

This committee entered upon its work and in addition to the town appropriation and the "Monument Fund," received the pledge of contributions from citizens of about two thousand dollars; but no part of these subscriptions were collected, because it became evident to the committee, that a satisfactory site whereon to place the monument, could not then be secured and the building thereof was again postponed. The appropriation of four thousand dollars not being used, reverted to the town treasury; but the committee, by its chairman, reported at each subsequent annual town meeting and was allowed further time.

The necessary steps for placing the "Soldiers' Monument Fund" legally in the possession of the town were taken by William G. Peck, and at the town meeting held March 5, 1883, under Article 25 of the warrant, the town accepted the Fund, still remaining in the Savings Bank, which then, with accumulated interest, amounting to $1665.62 to be held in trust by the town, as the "Soldiers' Memorial Fund," "for the erection of a monument, or providing other suitable memorial in honor of the patriotism of those citizens of said town who lost their lives in military service in the War of the Rebellion."

At the town meeting held March 10, 1885, under Article 31 of the warrant, upon the recommendation contained in the report of the Chairman of the Monument Committee, the town appropriated two thousand five hundred dollars, with, and in addition to the "Soldiers' Memorial Fund," then amounting to about eighteen hundred dollars, for the purpose of building a monument and appointed the present committee to erect the same.

This committee found some difficulty in selecting a location for the Memorial generally satisfactory to the citizens of the town, but after considerable delay, the site at the junction of Arlington avenue and Broadway was fixed upon, provided a sufficient sum of money could be raised by private subscription to purchase the grounds, including the buildings thereon, and to pay for the proposed changes in the design of the structure.

Through the generosity of citizens $7689.00 was subscribed and paid for this purpose, with the understanding that any amount left after completing the monument, was to be deposited with the town and held in trust, as a fund, the income thereof to be used for the care and protection of the Memorial.

The contributions were given with such a spirit of liberality pervading the entire community, as almost to preclude the mention of individual names, yet it may be proper to refer to the large donations received from John P. Squire, Francis S. Frost and Apollos J. Tillson; and to add, that the payment of eight hundred dollars by Mr. Squire, for the buildings upon the ground, was far in excess of their value for removal, and was regarded largely as an addition to his former contribution.

In obtaining subscriptions the committee was much indebted to the assistance rendered by Mr. William E. Wood;

more than six thousand dollars of the amount subscribed was made upon a paper circulated by him.

The plot of ground upon which the monument stands, was purchased from Frederick E. Fowle, and conveyed by deed, dated August 4, 1886, recorded with Middlesex South Dist. deeds, libro 1760, folio 443. The sum paid for the land and buildings, was four thousand five hundred dollars. Mr. Fowle conveyed the property to Samuel G. Damon, William E. Parmenter and William G. Peck, in trust for the purposes set forth in the deed. After the building had been sold to Mr. Squire, and by him removed, and the monument was in considerable part erected, said Damon, Parmenter and Peck conveyed the land, in conformity to the trust, to the town, by deed, dated October 15, 1886; recorded with said Middlesex deeds, libro 1779, folio 536, "said premises to be forever held as the site of the Soldiers' Monument."

At the town meeting held November 2, 1886, under Article 6 of the warrant, the town voted to accept the conveyance of the land to be held for the purpose therein designated.

At the town meeting held March 15, 1887, under Article 30 of the warrant, the town appropriated twelve hundred dollars "to enclose the site of the monument with suitable curbstones, to grade, grass, plant and otherwise decorate the grounds, to place curbstones along the outer line of the sidewalks adjoining the lot, and concrete the sidewalks."

On the 17th of June, 1887, the monument was dedicated under the auspices of Francis Gould Post 36, Grand Army of the Republic and a committee of citizens of the town. The day was fine; the monument, the speakers' stand, the public buildings and many of the private residences in the town were suitably decorated for the occasion. The procession was under the direction of John H. Hardy, Chief Marshal, James A. Marden, Chief of Staff with several aids. In the

procession were Baldwin's Cadet Band, 25 pieces and numerous Drum, Fife and Bugle corps; the Somerville Light Infantry, Co. M., 8th Mass. V. M.; Arlington Fire Department, Charles Gott, Chief Engineer; Company of boys with a small fire engine; Francis Gould Post 36, G. A. R.; Mozart Reg. Association, 40th New York Vols., being the regiment in which 35 of our citizens enlisted and served; Grand Army Republic Posts 30, 56, 57, and 186, of Cambridge; Post 119, Lexington; Post 180, Concord; Post 66, Medford; Post 29, Waltham; Post 62, Newton; Post 81, Watertown; carriages conveying Town Officers, Committee, Orator, Poet, and Invited Guests.

The procession halted at the monument, formed in front of the speakers' stand, and the citizens gathered around.

William E. Parmenter, Chairman of the committee of arrangements and President of the day, welcomed the assembly and introduced the several speakers. The chairman of the monument committee in a brief address surrendered the monument to the town; James A. Bailey, chairman of the Selectmen accepted the monument in behalf of the town, and requested Post 36, Major Bacon, Commander, to proceed with its dedication. The dedication was conducted in conformity with the full ritual of the G. A. R., after which, our townsman, John T. Trowbridge, delivered a poem written by him for the occasion. His Honor, Lieut. Gov. J. Q. A. Brackett, also a resident of the town, delivered the oration. The dinner was provided by William Tufts, caterer, in a large tent in a field southwest of and near the monument; nearly a thousand Comrades of the G. A. R. and invited guests partook of the dinner.

The expense of the dedication amounted to more than $1000.00, and was met by voluntary contributions of our citizens.

A full report of the dedication exercises, including oration

and poem, was published in the Arlington *Advocate*, of June 17th.

Receipts for Monument.

The appropriation made by the town for the monument was :	$2,500 00
The "Soldiers' Memorial fund"	1,940 73
Contributed by citizens	7,689 00
Interest upon deposits of contributions in Savings Bank	133 77
Total	$12,263 50

Expenditures.

Paid	Van Brunt and Howe, Architects,	$400 00
	Evans and Tombs for models,	130 00

Jesse Bacon, for stone,	5 00	
	$787 39	
Balance unexpended,	412 61	
		$1,200 00

It was the purpose of the committee to place a suitable fence between the monument lot and the estate adjoining, owned by Mr. Fowle, and to plant shrubbery upon the grounds, at an estimated cost of one hundred dollars; but

before the grounds were prepared for this work the season was too far advanced to do it.

There remains now in the hands of the committee the unexpended balance from contributions, $1012.02. There is an unexpended balance of the town appropriation of March 15, 1887, $412.61, making together $1424.63.

The committee recommend the acceptance of the subscribers' fund as tendered; the appropriation of the unexpended balance, $412.61, and a new appropriation of $675.37. These sums aggregate $2100. Of this amount $100 will be required for the building of the fence and adorning the grounds. The committee then further recommend that the amount remaining ($2000), shall be established as a permanent fund for the preservation and care of the monument and grounds, to be styled the Soldiers' Monument Fund, and to be placed in the hands of trustees, to be chosen by the town.

The committee append hereto the report of Wm. G. Peck, their treasurer.

SELECTMEN'S REPORT.

Herewith is presented the Annual Report of the Selectmen for the year ending Dec. 31, 1888.

Highways.

Amount appropriated by the town,	$ 12,500 00
" " for sidewalks,	600 00
" " for Arlington Avenue drainage,	700 00
Received for labor, stone, gravel, etc.,	1,170 03
	$14,970 03
Expended,	14,768 45
Balance unexpended,	$201 58

The total number of loads of stone and gravel placed upon streets, not including patching small places, is 6644, and has been distributed as follows:

Arlington avenue,	1744 loads.
Appleton street,	68 "
Broadway,	436 "
Bacon street,	40 "
Brattle "	8 "
Carried forward,	2296 loads.

Brought forward,	2296 loads.
Central street,	50 "
Chestnut "	16 "
Dudley "	56 "
Decatur "	16 "
Eastern avenue,	356 "
Florence "	48 "
Grove street,	50 "
Hillside avenue,	67 "
Lowell street,	132 "
Lake "	128 "
Mystic "	1376 "
Oakland avenue,	12 "
Oak street,	144 "
Pleasant "	1006 "
Park avenue,	528 "
River street,	20 "
Spring "	119 "
Summer "	32 "
Warren "	8 "
Water "	90 "
Wollaston avenue,	15 "
Sand used on icy sidewalks,	79 "
Total,	6644 loads.

The past season, with its many heavy storms, has caused a great deal of extra work for the Highway department, the work of one day frequently being damaged or washed away the next. And some expensive jobs have been done that could not be avoided, necessitating a call for more money at the last town meeting.

In August, Mr. G. W. Austin, who had served the town faithfully for the past nine years as superintendent of streets,

resigned on account of ill health, and Mr. S. E. Kimball was appointed to fill the vacancy, who having had experience as a superintendent of streets in this town, we feel that the work of this department will be carried on in a satisfactory manner.

Arlington Avenue.

That portion of the street alongside the horse-railroad tracks, left unfinished last year, has been crowned with stone and gravel, making a good road as far as the tracks are laid in the middle of the street. It would be a great improvement to have the rails located in the centre of the street to the Cambridge line, but knowing it would be a very expensive piece of work, we would not recommend it at present. The avenue has been kept in order by repairs wherever needed, and is in fair shape its whole length. Catch-basins have been put in to take the water from Mt. Vernon street, and a 15-inch drain-pipe laid, which relieves the street of a large amount of water that has been a source of trouble for many years. Something should be done to take the water from the avenue in the neighborhood of Jason street, Academy street, and the lane leading to the stone crusher. In a freshet the Main street is frequently flooded, causing annoyance to travellers and damage to the street.

Broadway

Has been repaired and put in good order nearly the entire length. One great source of trouble has been the surface water, which comes from the Somerville side of the bridge over Alewife brook and runs across on the Arlington side. We have endeavored to make an arrangement with the city

of Somerville, so that the trouble may be avoided in the future. Early in the spring of this year a large portion of the wall leading to the bridge caved in, carrying the sidewalk with it. Not having the tools for such a job, we gave the work to a contractor, and it is now in good condition to last for years.

Eastern Avenue.

Considerable labor was needed on this street. As it has a very steep grade, it is liable to get badly washed in a heavy rain. It has been well repaired with gravel taken from the immediate neighborhood.

Highland Avenue

Has been put in good order by opening the gutters, and crowning the road-bed with gravel, greatly improving the street.

Park Avenue.

When this street was built, the culvert across it which carries the water to the ponds below, was not made large enough to take the water in a freshet, and considerable damage was done to the street and to the railroad Last September we were notified by the attorney of the Boston and Lowell R. R., that they would hold the town responsible for damage if this was not attended to. A new culvert has been built alongside the old one, and as it has been well proved in a flood this fall, we anticipate no trouble in the future. Other portions of the street have been repaired as needed.

Pleasant Street

Has been graded and macadamized from the Belmont line

to near the residence of E. C. Turner, Esq. A short piece remains to be done next year, and the street will then be in good order from Arlington avenue to Belmont.

Mystic Street

Has been gravelled in various places, especially near the Winchester line, where the road was in very poor condition and was a constant cause of complaint. With a little labor on this street another year, it can be put in good order.

Watering Streets.

The streets have been watered as usual by the teams of the highway and fire department, the abutters paying a portion of the expense.

Sign Boards.

A number of new ones have been put up, and some old ones repaired and painted.

Stone Crusher.

After viewing the methods used in some of our neighboring towns for crushing stone, we concluded that we were behind the times in this matter, and that it would be economy for the town to have some labor-saving machinery in place of so much hand work. We have commenced work on a building to contain bins and screens to separate the crushed stone into two sizes and remove the dust, and an elevator will be put in to carry the stone from the jaws of the crusher to the bins above. Carts can then be driven under the bins and quickly loaded, saving a great deal of time and labor. We think this an improvement that will

pay for itself in a short time. Considerable stone has been purchased the past year, and probably more will have to be another year.

Teams and Tools.

There are seven horses, all in good working condition. A new two-horse cart will be needed the coming year. The tools have been kept in their usual condition.

Almshouse.

This department is still under the charge of Mr. Darwin roctor. Everything about the premises and inside the house seems to be well cared for, and is good evidence of the interest taken in their work by Mr. Proctor and wife. The buildings have all been painted outside, and some painting, plastering and papering done inside and are all in good repair.

Amount appropriated by the town,		$2,200 00
" received for board and products sold,		497 94
		$2,697 94
Expended for supplies, repairs, etc.,		2,357 93
Balance unexpended,		$340 01
Whole number of inmates for the year,	9	
Present number,	9	
Number of tramps fed and lodged,	325	

Outside Poor.

Amount appropriated by the town	$2,000 00
From other sources, see Treasurer's report,	364 18
	2,364 18
Expended,	1,920 62
Balance unexpended,	$443 56

Street Lights.

Believing that the lighting of streets in the future will be generally done by electricity, a contract was made with the Somerville Electric Light Company to furnish eight arc and two hundred and twenty incandescent lights. A few oil lamps at a distance from the main lines are still in use, but lighted by the above company.

In making such an alteration as this, there is sure to be more or less friction in starting, but on the whole the town seems satisfied with the changes. Fifteen new lights have been added and more are wanted for another year.

Coal.

Letters were issued requesting bids for supplying the town with coal and the contract was awarded to Mr. Warren A. Peirce, the lowest bidder. The prices were $5.50 per ton for common anthracite, $5.88 per ton for H. B. Lehigh, and $4.63 per ton for Cumberland.

Cemeteries.

Considerable outlay has been made on Mt. Pleasant cemetery for concreting gutters, which the committee deemed advisable to protect the avenues from washouts during heavy rains.

The town tomb should be repaired next year and the hearse house shingled. We would recommend that the old hearse be sold, but the house is needed for the storage of tools, etc. Your committee would also recommend that all money received for the sale of lots be kept as a fund for use in the cemeteries and not turned into the general account.

A number of trees have been removed and many more

could be gradually taken out with benefit to the grounds. Mr. John H. Hartwell has had charge of the grounds and they have been kept in good order.

Town House.

Something should be done to the outside walls of the building the coming year. Beside its bad appearance, it is getting to be somewhat dangerous, as pieces of mastic occasionally become loose and fall, making it unpleasant for persons on the sidewalk. The only way to make thorough work of it seems to be to cut all the old mastic off and paint the walls. The Lock-up has been re-arranged and new cells put in, making it secure and comfortable for prisoners, and convenient for the officers in charge.

Licenses.

In accordance with Chapter 431 of the Acts of the Legislature for 1887, we have issued one sixth class license.

Police.

This department, consisting of a chief and three patrolmen, remains the same as last year. Details will be found in the following report.

To the Honorable Board of Selectmen:

GENTLEMEN—I have the honor to present my Annual Report of the Police Department for the year ending Dec. 31, 1888.

Whole number of arrests, 104. Males 100; females 4.

Causes of Arrest.

Assault,	8	Fishing with seine,	4
Assault on officers,	2	Keeping unlicensed dogs,	2
Breaking and entering,	6	Obtaining board by fraud,	2
Cruelty to animals,	1	Vagrant,	1
Drunkenness,	56	Violating liquor law,	6
Disturbing the public peace,	13	Wilful trespass,	1
Dipsomania,	2		

Whole number of lodgers,		373
Males,	359	
Females,	14	
Adults,	337	
Minors,	36	

Of these 325 were sent to the Almshouse for lodging and 48 were lodged at the station.

We have had three cases of breaking and entering, and one house entered by a "sneak-thief." In only two of these cases was property of much value taken. In one case, that of F. O. Squire, the most of the property was recovered. For this break, six were indicted before the Grand Jury, but for want of sufficient evidence to convict, four of them were allowed to go on their own recognizance, the other two had each just received a twenty years' sentence for other crimes, so they were not put on trial.

When we consider our proximity to a large city, the many breaks that have occurred in the cities and towns around us; and the smallness of our police force, it seems to me we have been fortunate in having so small a loss of property.

A determined effort has been made to suppress the illegal sale of intoxicating liquors. During the year, we have procured search warrants and searched eighteen places, but on

only four of them was any liquor found. Five persons have been convicted for violation of liquor law.

The difficulties attending the enforcement of the liquor law are such as never appear in any other criminal cases. It is very difficult to obtain evidence in these cases. Officers are often convinced in their own minds that illegal sales of liquor have been made, but the same evidence that convinces them, does not always satisfy a court or jury.

At all defective places found in the streets and sidewalks, lanterns have been placed, and the same have been reported to the Superintendent of Streets. Five stray teams have been put up.

Respectfully submitted.

EUGENE MEAD,

Chief of Police.

Mystic Sewer.

During the past year the Boston Water Board have erected, at an expense of nearly $10,000, a system of tanks, vats, etc, for the purpose of purifying the sewage matter coming from Woburn and Winchester. We have visited them several times during the past season and, judging from our investigations, should say that everything that science and chemistry could do, has been done to accomplish this end. The effluent, which runs from the vats into the lower Mystic pond, does not, in our judgment, contain any thing that could cause an offensive odor, or impair the health and comfort of those residing in the near vicinity. We would recommend any one interested in the matter to visit the works, and can assure them a cordial welcome by

the Superintendent and an explanation of the *modus operandi* cheerfully given.

Fire Department.

The Chief Engineer's and Treasurer's Reports will furnish the details of this department.

Respectfully submitted.

JAMES A. BAILEY,
GEORGE D. TUFTS,
GEORGE D. MOORE,
} *Selectmen of Arlington.*

ARLINGTON, Dec. 31, 1888.

REPORT

OF THE

TRUSTEES OF THE ROBBINS FUND.

The Trustees of the Robbins Fund submit the following Report for the year ending Dec. 31, 1888:

The fund of $5000 is deposited in the Arlington Five Cents Savings Bank. The interest on the same for the past year, amounting to $202.00, has been paid to the Town Treasurer, to be expended under the direction of the Cemetery Committee.

Respectfully submitted.

WILLIAM G. PECK,
HENRY SWAN,
RICHARD L. HODGDON,
B. DELMONT LOCKE, *ex-officio*,

Trustees of Robbins Fund

ARLINGTON, Dec. 31, 1888.

REPORT OF THE

TRUSTEES OF THE SOLDIERS' MONUMENT FUND.

The Trustees of the "Soldiers' Monument Fund" submit the following Report:

At the town meeting held March 5, 1888, action was taken upon the following articles in the warrant:

ARTICLE TWENTY-FIRST. To see if the town will make an appropriation to establish a permanent fund for the care and maintenance of the Soldiers' Monument and grounds; also for the erection of a fence and the planting of shrubs on the grounds; and to determine in what manner the same shall be expended.

ARTICLE TWENTY-SECOND. To see if the town will accept the sum of ten hundred and twelve and $\frac{2}{100}$ dollars, being the balance remaining unexpended in the hands of the Soldiers' Monument Committee, as part of a permanent fund to be held in trust by the town, the income of which shall, as needed, be expended for the care and management of the monument and grounds.

On motion of William E. Parmenter, it was voted, That the town accepts the sum of ten hundred and twelve and $\frac{2}{100}$ dollars, being the balance of subscriptions remaining in the hands of the Soldiers' Monument Committee, and by them tendered, to be held as part of a permanent fund to be held in trust by the town for the care and management of the monument and grounds. The town appropriates the unexpended balance of the appropriation made March 15, 1887, for the curbing, grading, etc., of the grounds, namely, four hundred and twelve and $\frac{61}{100}$ dollars, to constitute a part of said fund; and further appropriates the sum of six hundred and seventy-five and $\frac{37}{100}$ dollars, to be added to the foregoing sums, thus making in all twenty-one hundred dollars. Of said sum one hundred dollars shall be used under the direction of the Monument Committee, for the building of a fence and the adorning of the grounds; the remaining sum of two thousand dollars shall be established as a permanent fund, to be styled the "Soldiers' Monument Fund" to be placed in the hands of the Trustees of the Robbins Fund for management and investment, who shall report yearly at the annual meeting of the town in March, the income of said fund to be applied, as from time to time may be needed, to the care and management of the monument and grounds.

The appropriation made by the town, amounting to one thousand and eighty-seven and $\frac{98}{100}$ dollars, together with the sum of ten hundred and twelve and $\frac{2}{100}$ dollars, before mentioned, is deposited in the Arlington Five Cents Savings Bank, and one hundred dollars has been drawn from said sum and paid to the Town Treasurer, to be used under the direction of the Monument Committee. The interest accrued to this date amounts to seventy and $\frac{71}{100}$ dollars, making the

total amount of the Soldiers' Monument Fund, on Dec. 31, 1888, two thousand and seventy and $\frac{71}{100}$ dollars, which is deposited in the Arlington Five Cents Savings Bank.

Respectfully submitted.

WILLIAM G. PECK,
HENRY SWAN,
RICHARD L. HODGDON,
B. DELMONT LOCKE, *ex-officio*,
} *Trustees of the Soldiers' Monument Fund.*

ARLINGTON, Dec. 31, 1888.

REPORT OF WATER COMMISSIONERS.

The Water Commissioners respectfully ask leave to submit the following Report for the year 1888:

The water works continue to show favorable progress as to its financial result. The Treasurer's account of the receipts and expenditures, as can be seen, show that the receipts for water rates have increased this year over those of last year the sum of $572.93; this with a balance unexpended of $1186.08 we think carries with it a very good exhibit.

The source from which the increase comes too is substantial, mostly domestic.

The running expenses this year have increased over those of last the sum of $343. This has been brought about by causes some of which were unavoidable; for instance, the very unusual freezing up of the water pipes last winter which necessitated the expenditure of quite a sum of money, also considerable time and expense was incurred by improvements about the reservoir, cutting brush and cleaning up along the border of reservoir and banks of the overflow brook, a thorough cleaning out of the inlet from the

reservoir along the way up to the tunnel and beyond; this last was much needed, but now leaves the condition of the water-way to the reservoir all right. An improved condition of the water has been noticeable, attributable, we think, somewhat to the above. More particularly under the head of repairs and changes which might receive especial notice, comes the taking up from out of the middle of the sidewalk in Bacon street, the fire hydrant and moving it into Mill street, thereby relieving the danger of some one sometime getting injured from coming in contact with it in the sidewalk; and the place in Mill street, to which it has been moved, is quite as serviceable for fire purposes.

We found it necessary to put in a new service for the Messrs. Wood on the avenue, the old pipe having become so rusted and filled up that their supply of water was nearly cut off. Piping anew gives them plenty of water.

Many other lesser matters in the line of repairs, on hydrants, gates, breaks and leaks, has received attention and occasioned quite an outlay, which can be looked for with quite a degree of certainty as the works grow in age and until much of the original is replaced with new.

We have deemed it expedient to lay main pipes in places in accordance with a vote of the town as follows:

In Grove street 306 feet of 4-inch iron pipe has been laid at a cost, including a fire hydrant set, of $262.97, this added to 180 feet last year gives a total of 486 feet running from Main street.

Cleveland Street.

702 feet 4-inch iron pipe has been laid in this street, hydrant set, both costing $506.35.

This is a new street leading from the avenue near Winter street. Considerably graded, edgestones set, etc. Upon this street have been built three new houses, one of them a double one, others now in progress. Water rates at present received amount to $49—showing a good per cent. on the outlay.

Wyman Street.

A new street out of the avenue opposite the house of John P. Wyman and through to Broadway. In this street has been laid 405 feet 4-inch iron pipe, a fire hydrant set, at a cost of $325.42. Four new houses have been built upon this street and rates for water which are being received are satisfactory.

New Services.

31 new services have been added during the year at a cost of $388.50, an average of $10.50 each, showing that the cost per service is $1.06½ less this year than last.

Flint and King Suits.

The above suits have been disposed of in accordance with the settlement which we referred to agreed upon in our last year's report. All claims by these parties have been adjusted and the rights of the town fully protected by the execution of proper instruments. In connection with these suits we make mention of another suit for damages against the town brought by Thomas Cosgrove of Lexington for flowage to his land. The reasons we gave last year in favor

of a settlement of the Flint and King cases applied to this case. It has accordingly been adjusted and there is no other suit against the town arising in connection with its water supply.

The commissioners estimate that the sum of $5000 will be required to make up the deficiency of income for the payment of interest on the water scrip for the year 1889, being $1000 less than the appropriation last year for this purpose. It is recommended that the town grants an appropriation for the purpose of extending main pipes, and placing new hydrants where in the judgment of the board it shall be for the interest of the town to do so.

It is necessary that rules be adopted governing the use of the water. The board trusts that the citizens will strictly conform to them. They are established by the town and the commissioners are expected to enforce them whatever they are.

Mr. Thomas Roden who has been in charge of the work the past year has as before proved himself proficient in work of this nature.

For detailed statement we refer you to the Treasurer's report.

B. DELMONT LOCKE, *Treasurer.*

ARLINGTON, Dec. 31, 1888.

Extracts from Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely:

DWELLING HOUSES.

Occupied by one family, for the first faucet,	$6 00
For each additional faucet, to be used by the same family,	2 00
Where a house is occupied by more than one family, one faucet only being used for all, for each family,	4 00
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional water-closet,	3 00
For hopper water-closets,	8 00
Where bath-tubs or water-closets are used by more than one family, for each family,	4 00
Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both. *Provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than	25 00

BOARDING HOUSES.

For the first faucet,	10 00

Each additional faucet,	$2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

STORES, OCCUPIED AS OFFICE, SHOP, OR SIMILAR PURPOSE.

First faucet,	$6 to $20 00
For each additional faucet,	2 50
For water-closet or urinal,	6 00

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water,	$6 to $25 00

HOTELS.

For each bed for boarders and lodgers,	3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

PUBLIC BATHS.

For one tub in public bath-house,	10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water-closet,	3 00

STABLES.

Private Stables.	For the first horse,	$5 00
"	For each additional horse,	3 00
"	For one cow,	2 00
"	For each additional cow,	1 00
Livery, Club and Boarding Stables.	For each horse,	3 00
Car and Omnibus Stables.	For each horse,	2 00
Truck and Cart Stables.	For each horse,	2 00
Provided, that in no case shall any stable be charged less than		5 00

The rates for stables including water for washing carriages without hose; when hose is used, $3.00 additional.

HOSE.

For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets, and watering gardens (and the use of the same shall be limited to two hours per day), not less than	3 00

STEAM BOILERS.

For each boiler in use not over twelve hours a day, for each horse-power,	6 00

BUILDING PURPOSES.

For each cask of lime or cement,	6 cents

ORNAMENTAL FOUNTAINS.

Ordinarily used three hours a day for a period of not more than four months a year:

For a jet of 1-16 of an inch,	$3 00
" " 1-8 "	5 00
" " 1-4 "	8 00

To be cut off at discretion of the Superintendent.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners, and the rates fixed in the foregoing tariff may be varied by the Water Commissioners, whenever in particular cases in their judgment the interests of the town shall require.

AUDITOR'S REPORT.

The undersigned hereby certifies that he has audited the books and accounts of B. DELMONT LOCKE, as Treasurer and Collector of the Town of Arlington, also as Treasurer for the Arlington Water Works, for the year 1888, and finds the same correct, with vouchers for all payments, and the balances of cash as stated by him.

CLARENCE T. PARSONS,

Auditor.

ARLINGTON, Jan. 24, 1889.

ANNUAL REPORT

OF THE

CHIEF ENGINEER OF THE ARLINGTON

FIRE DEPARTMENT.

To the Selectmen of Arlington:

GENTLEMEN— I herewith submit my tenth Annual Report of the Fire Department for the past year, also offering suggestions for the ensuing year.

FIRES AND ALARMS.

The Department has answered thirteen alarms, one of these out of town (West Medford), and one false. Value of buildings damaged by fire, $29,600; value of stock and furniture, $11,000; insurance on buildings, $19,796; insur-

ance paid on buildings and contents, $7690. The citizens may certainly congratulate themselves on the small loss by fire during the past year, while other cities and towns in our vicinity have suffered severely.

BUILDINGS.

The buildings are in good condition. Horses have been placed in the Penn and Highland Houses. The Highway Department furnishes a horse for the Highland House, and this department pays $100 per year for the use of same. The two horses in the Penn House are owned by the Fire Department, one having been purchased this year, which we know is a vast improvement on the old method, and which we think is a step in the right direction toward having an efficient Fire Department.

HOSE.

The hose of the Department is in better condition than ever before. Hose has been purchased each year as the appropriation would admit, without calling upon the town for any extra appropriation. We have now in the Department 3600 feet of good hose, 500 feet of which have been purchased this year.

FIRE ALARM.

I would call your attention to our very imperfect system of fire alarm, and think some step ought to be taken for improvement.

If we continue to trust to telephone service for fire alarm, I am afraid we shall some day get sadly "left," and I think

the time has arrived when this town ought to adopt a perfect fire alarm telegraph system. I have made inquiries of towns and cities in our vicinity which have adopted a fire alarm service, and all are unanimous in recommending the "Gamewell Fire Alarm Telegraph system." This system would cost the town about $2500, and would benefit the citizens of the outskirts, as well as those in the centre.

APPROPRIATION.

I would recommend an appropriation, to meet the expenses for the ensuing year, of $2800.

PERSONAL RECOGNITION.

In closing I wish to express my thanks to your honorable Board, to my engineers for their assistance, the members of the Department in responding to the calls, and for obeying orders.

Respectfully submitted,

CHAS. GOTT,

Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

To the Town of Arlington:

In presenting their report for 1888, the Trustees of the Public Library have to state a continuance of the popularity which the Library has so long enjoyed. As appears from the annexed statement of the Librarian more than two hundred additional persons have this year begun to use the Library, while there is no appreciable falling off among former patrons except in cases of removal from town.

In some towns it is customary to fix a limit of age below which persons cannot take out books. Here this has not been done. Children of the same age differ so much in mental capacity and tastes that to fix any arbitrary standard would exclude some children who could use the Library to advantage, while admitting others who could not. When very young children apply, it is usually not hard to decide, by consulting parents or teachers, whether the privilege should be granted.

A good many people who are not permanent residents now visit or board in Arlington for some weeks or months at a time—especially in the summer. There is no reason why such persons should not enjoy the advantages of the Library—and in fact it is worth while

to adopt any reasonable means to help to make the town an attractive place for strangers to stay in. Accordingly, any temporary resident is allowed to use the Library as freely as a citizen; the only condition being that he shall secure the town against loss by furnishing a guaranty from some responsible citizen, or if that is inconvenient by depositing a small sum of money to be returned to him when he ceases to use the Library.

In order to accommodate the people at the Heights a weekly delivery of books was established there several years ago and has been kept up during the greater part of each year. This department has lately been placed under the charge of Miss Lucy C. Bailey. It has proved itself a convenience to many people in that neighborhood and might well be used by more. Cards with the catalogue numbers of books desired may be left at the railway station at any time before noon of Thursday of each week, and the books will be ready for delivery at the same place on the same evening.

It seems that something of the same sort might well be established at the eastern end of the town, in case there should be any general demand for it, and proper facilities could be secured.

In the selection of new books the Trustees have followed their established policy of getting those likely to be of some permanent value. They have frequently been aided by suggestions from the public and would be glad to receive more of such assistance. Any user of the Library who wishes to have a book bought can obtain at the desk a blank form of application. As soon as the book is placed in the Library —and it generally is procured unless there is some special reason to the contrary on account of its expense, technical character, etc.—the person recommending it is notified and is given the first chance to read it.

The reading-room has become an almost necessary part of the Library. In it are kept not merely current magazines and papers but complete or partial sets of several leading periodicals as well as a large number of books of reference. As all these may be read or consulted freely by any one who comes in, without any formality, the reading-room serves a purpose of its own, which the Library without it could not serve.

The principal feature of the year's work inside the Library has been the preparation of a new printed catalogue. The last catalogue of the whole Library appeared in 1876. In 1881 a supplement was issued, containing the books procured during the preceding five years. Since then there has been no consolidated supplement, and no guide to the additions made of late years except a number of short separate lists. The new catalogue has been prepared under the direction of the Librarian and was completed at the end of the year. Its preparation involved an unexpected amount of work, as so many inaccuracies were discovered in the catalogue of 1876—arising mainly from the fact that it was based on earlier lists which were prepared by several persons and without suitable oversight—that the work had practically to be done fron the beginning. The card catalogue was of the greatest assistance and proved its usefulness in this as in so many other ways.

The new catalogue was issued in January, 1889, and is what is technically known as an author-and-title dictionary catalogue,—that is, each book appears in its proper alphabetical place under its title and under the name of its author. Such a list serves in most cases every purpose. To insert every book under its subject heading also would entail a great increase in the size and expense of the catalogue without compensating advantages, as those investigating a subject usually wish to examine several if not all of the books that the Library has in regard to it—an investigation which has

of course to be made at the Library, where the card catalogue is at hand. The Librarian has spared neither labor nor care to make the catalogue accurate and convenient, and it is believed the typographical arrangement and execution will also be found entirely satisfactory.

Towards the end of 1888 a contract for a year was made with the Somerville Electric Light Co. to supply the Library with their light. The wires and fixtures were inserted by the Company without expense to the town and the cost of this method of illumination will be no greater than that of gas. A much brighter light is obtained for the same money, and we think that people generally will find the change an improvement.

Such are the principal matters to which the Trustees desire to call the attention of the town, feeling sure that an institution that gives so much pleasure and benefit to so many of our people will not lack the generous support of the community.

JAMES P. PARMENTER,

For the Trustees.

JANUARY, 1889.

ELIZABETH J. NEWTON,

Librarian.

ARLINGTON, Dec. 31, 1888.

School Committee's Report.

To the Town of Arlington:

The School Committee submit their Annual Report.

Looking at the work done during the past year by teachers and scholars, comparing the results attained with those of previous years and with what we see in the schools of neighboring towns, and basing our judgment not merely upon such a survey but also on the many favorable comments as to the condition of our schools which have come to us unsought from persons exceptionally well qualified to form opinions on educational subjects, your committee feel fully justified in reporting that the close of the year 1888 leaves all our schools at the level of the high standards of former years, and that the new year opens with bright prospects for a continuance of this success.

The present school board can claim no very large share of credit for this prosperous condition. Our duty is mainly to see that the work moves on properly in the path which experience has shown to be safe and reliable; that such additions and improvements in ways and methods are made as are called for by the advance of the science of education. In this work we have received the indispensable aid of our faithful corps of teachers who keep abreast of the times and are always ready and eager to suggest improvements which

your board are glad to examine and generally to adopt. We all feel however that the general lines of our graded system have been so carefully laid out that alterations should mainly be confined to minor points, — at any rate until the growth of population or greatly altered views of educational policy make more revolutionary changes evidently necessary.

The credit of what has been done in our town for popular education is justly due not to us, but to the school boards of former years, who, aided by the advice of some of the leading educators in the Commonwealth, carefully planned and effected the great change from the old district and mixed schools to our present system of graded schools, and to the able and devoted teachers present and past who have worked not for their own individual reputation so much as for the general good of all the schools.

The town has been fortunate in its ability to retain teachers for considerable lengths of time and to avoid the serious consequences which always result from frequent changes. Whenever vacancies occur we believe it to be the wiser plan to take time and care enough to choose persons who have not only training and experience, but also those natural qualities which go to make up the enthusiastic and successful teacher, and so to prevent any deterioration in the quality of the schools.

Of such changes there have been few during the year. At the end of the spring term, Miss Elisa A. Sargent resigned, to take a position at the West. Miss Sargent was a teacher of unusual energy and exerted a decided influence in preventing undue laxity in study and behavior among the scholars. Her place was filled in the fall by the appointment of Miss Marguerite J. Steele. We have also been

unfortunate in losing the services of the Misses Blake who have taught in our schools for some years to the great satisfaction of parents and committee. The severe and lingering sickness of an aged parent caused the resignation of both these ladies, and their positions were not filled during the year, — as it seemed better not to appoint permanent successors until later. The teachers of the parallel grades with the help of a substitute have been able to carry along the work so far, but it will probably be necessary in the early part of 1889 to fill the vacancies. Miss Anna H. Rood, a graduate of our High School and of the Salem Normal School, has acted as substitute teacher and has given good promise of success in her profession.

For several years it has been in contemplation to appoint a general assistant in the Russell School. It is often desirable that the master should be able to leave his room during school hours to investigate or attend to cases where delay would be subversive of discipline and furthermore that he should be able to supervise in some measure the instruction in the various rooms, in order to secure a closer relation between one teacher's work and another's, and a more harmonious and systematic working together than would otherwise be obtained. It is no less important that the other teachers should be relieved at times when there is an unusual pressure of work and that a competent substitute should be ready in case of the necessary absence of a regular teacher. To accomplish these ends, it was decided in November to appoint Miss Ada E. Flanders, the teacher of the first division of the fifth class, to the position of general assistant. Although this change has gone into operation too recently for us to make any definite report, we believe that it is already proving itself to be desirable.

The division of the western part of the town, made last year, has continued to give satisfaction to the people in both the Cutter and the Locke districts. The same competent teachers have been in charge, and we hope that we shall be able to retain their services for a long time to come. Miss DeBlois, who has long taught the Cutter Primary School and has gained the attachment and regard of so many parents and children, has been obliged to be out of school on account of illness during the latter part of the year. Her place has been well filled by Miss Rose M. Brady.

The Crosby School, we are glad to say, has experienced no change of teachers. The eastern section of the town continues to grow, and there is a steadily approaching necessity for larger school accommodations.

The High School continues in a prosperous condition under the charge of Mr. Fisher with Miss Newton and Miss Simmons as assistants. The interest and enthusiasm shown by the scholars in this school are very noticeable. We wish that more of our towns-people would learn from personal observation into what a pleasant place an unattractive building has been transformed, and what good work is being done there. With 70 scholars already in this school and the prospect of still larger numbers in the near future, we believe the time has come when the need of larger and more convenient quarters should receive more than the passing allusion, which it has been almost customary to make in late reports. Before the need becomes so pressing as to compel immediate and perhaps hasty action, the question should receive serious consideration and perhaps be put into the hands of a special committee with plenty of time to act with care and deliberation before reporting to the town.

While the subjects to be taught in our schools are in the main fixed by law, the extent to which each is to be pursued and the relative amount of time to be given it are left to the judgment of committees and teachers. We are making efforts to simplify work in all subjects so as to lay stress upon the more important parts, and to improve methods whenever practicable. The branches of penmanship, drawing, and music call for special mention here. Even with the utmost care in dividing the time at our disposal among the different subjects, according to their importance, it will sometimes happen that the marked improvements observed in one department have really been made by unintentionally taking time belonging to another branch, which necessarily, in its turn, at once falls below the standard. Thus it has come about, gradually and almost imperceptibly, that in some grades penmanship has not received its full share of time and attention; till visitors have made the criticism, and perhaps with some justice, that in certain rooms there could be seen too many styles of penmanship,— some pupils having acquired styles peculiar to themselves, while the closest scrutiny failed to give evidence of a system which could be traced with the proper advancement, from each grade to the next above. Under arrangements now being perfected, we believe that penmanship will soon receive in every grade, the time and attention which its importance demands, under a system in which the improvement in each room is clearly the legitimate fruit of the work done in the next and lower grades.

Drawing has for some time failed to receive the attention that the law designed. This neglect has arisen partly from the claims of other studies and partly from the difficulty of

teaching this subject to any useful extent in a necessarily limited time. The sub-committee on this branch are now trying, with the advice of our own teachers and outside specialists, to arrange and introduce a course that shall give pupils the benefits properly belonging to the study, without unduly infringing on the time required by other branches.

The sub-committee on music, Messrs. Rawson and Ceiley, report their entire satisfaction with the results obtained by Mr. Marshall, and their conviction that our schools stand among the first in the State in regard to musical instruction. They say also,— "The most gratifying results have attended the teaching of vocal music during the past year. A degree of proficiency has been attained which is very satisfactory to both committee and musical instructor. The intelligence displayed by the pupils in reading music at sight is remarkable. The placing of music upon an educational basis and applying the same principles to its presentation that underlie the teaching of all subjects has proved to be of great value to the pupils. What they accomplish is done by their own efforts under the instruction and guidance of the special and regular teachers. They are trained to think, and so are able to solve all the problems in music as they do in their other studies. An exhibition of their skill in this direction was given last May, when several tests in one, two, three, four, and five-part music, which had been prepared by a gentleman eminent as a musical writer, were most successfully sung by pupils from the different classes. These tests were based upon work actually studied by the different grades and were therefore a fair showing as to their musical ability."

The attendance and discipline have been generally good. In the statement annexed to this report will be found the whole number of scholars and the average attendance for each school. In reckoning the whole number, scholars are counted who have been members for any part of the term. Hence the number of members at any particular time is often less than the whole number for the term, and consequently the average attendance is really better than it seems to be at the first glance and more nearly equal to the number of scholars than the figures show. This is especially the case in the lower primary schools, where children are sometimes kept out of school during the greater part of a term in the inclement seasons of the year, and then sent for a few weeks only.

Sickness of course has had its effect of diminishing more or less the average attendance; but the remarkable freedom from epidemics of contagious diseases, which our town has enjoyed of late years has continued up to the time of writing this report, the returns which have been made in compliance with our public statutes being generally of single and isolated cases. The figures for the year 1888 show at a glance how fortunate our public schools have been, in a town of 5000 or nearly 5000 inhabitants, and make a record of which we may well be proud, and to the continuance of which all should lend a willing hand, when they find themselves specially concerned, by promptly complying with our rules and the public statutes as given in last year's report,—rules and statutes which, as there stated, were all established for the general good. From January 1, to December 31, 1888, inclusive, your Board of Health, and through them your School Committee, were notified of the appearance of

twenty cases only of contagious diseases, and of these twenty cases, nine only were cases specially affecting the school attendance under the statute of 1885,— these nine cases being all reported during the forty weeks of our school year. Let us hope that this may prove to be an average annual record.

A cause diminishing the number of pupils in the latter part of the year was the establishment, in September, of a school connected with the parish of St. Malachy. As this school received children of different ages, it did not operate to deplete any one school especially, but drew a small number from each room. Accordingly the effect of this withdrawal of scholars was merely to diminish the number in each room somewhat, but not to such an extent as to cause the discontinuance or change of grading of any school.

During the year various alterations and repairs have been made on the school buildings for the purpose of keeping the property of the town in good condition, or for the more important purpose of preserving the health of the scholars. Questions of the ventilation and proper sanitary arrangements of large public buildings and especially of school-houses have come of late years to be regarded of the first importance. Epidemics of contagious diseases have frequently been traced to buildings apparently properly constructed, until sanitary experts have been puzzled and forced to reconstruct their theories of proper ventilation and drainage. School-houses, built fifteen or twenty years ago in accordance with the views then prevalent, often need thorough overhauling. Realizing this state of affairs, the sanitary committee have felt the importance of their work, and although no epidemic or even a single case of sickness

of serious character has ever been traced to one of our public school buildings, they heartily welcomed the statute of 1888, which placed the sanitary arrangements of school-houses under the control of the State Inspector of Factories and Public Buildings. Since the passage of the act they have gladly availed themselves of the assistance and advice of Mr. J. T. White of our town, one of the State Inspectors, in making needed changes. Of such changes the following are the most important. In the Russell School, as a temporary expedient, a new door was put in to cut off communication between the basement and the floors above. In the Cutter and Locke Schools metallic ventilators were introduced as the existing appliances were by no means efficient. All these improvements are working well. In the High and Crosby Schools no immediate alterations were thought to be necessary.

Besides the usual repairs needed to replace parts, or keep the buildings in good condition the following improvements were made by the Prudential Committee. In the Russell School has been placed a new boiler, which has proved in every way satisfactory. Its cost, including much new piping, was less than our estimate. The chimneys were relaid from the roof up, having become loose and unsafe, and the roof received some needed repairs. A conspicuous if not important change was the restoration of the eagle, with freshened plumage, to the perch from which he had been absent fourteen years. In the Cutter School new floors were laid in both stories, and the rooms and school furniture were put in good condition. The conductors from the roof were so altered as to carry away the rain-water from the building so that it might not escape into the basement, and

a new pipe was laid to supply water to the second story. Nearly all the foregoing alterations were recommended in our last report. The chimney of the Locke School was relaid and the roof repaired. A few new seats and desks were placed in Miss Pierce's room. At the High School the doors leading to the second story were made to swing outward in compliance with the request of the State Inspector. Miss Simmons' room was supplied with seats and desks of an improved pattern like those in the large room.

The principal work to be done upon any school building during the coming year is, so far as the Committee can now see, the improvement of the sanitary conditions of the Russell School.

Although probably not seriously dangerous to health, the water-closets in the basement are the source of great annoyance to teachers and scholars, at time. Whether a remedy can be found by alterations within the building, or whether the only practicable and safe solution may not rather be to remove the water-closets outside altogether and place them in a building by themselves, is a problem to which the Sanitary and Prudential Committees are giving their best attention. In order to meet the latter alternative, the town will be asked to authorize the Selectmen to buy a strip of land suitable for the purpose, adjoining the school grounds. In this, as well as in other sanitary questions, your Committee will be guided by the advice of the State Inspector and ready at all times to carry out his requirements. It may also be necessary to take further measures to secure a dry basement in the Cutter School.

Soon after the beginning of the fall term, the State Board of Education, through its agent, Prof. George A. Walton, requested that a Teachers' Institute be held here, for the

benefit of the teachers of our schools and those of some of the neighboring towns. Such a gathering seeming for many reasons highly desirable, proper arrangements were made and the Institute was held in the High School building, November 21. There were present about seventy-five school officers and teachers, — all who could be comfortably accommodated, — from Arlington, Belmont, Bedford, Billerica, Concord, Lexington and Watertown, and the session was a very interesting and useful one. The addresses were all practical and to the point; the hearers were in close relation with the speaker; the gathering was so small that anyone felt at liberty to ask questions freely, and there was a noticeable attention and interest on the part of all.

The contrast was marked between this Institute and the Teachers' Conventions which it was once customary to hold, when large numbers were gathered in large halls, with the inevitable result of turning the addresses into a series of lectures which it was difficult for many of the audience to hear or follow, and of reducing to almost nothing the feeling of responsibility of any individual for the success of the meeting.

We are convinced that a small meeting like that held here last fall is of far greater value than the large ones of former years, and that those schools must take the foremost rank whose teachers can attend such gatherings whenever possible.

With these statements and suggestions we commend to you our public schools, confident that the town appreciates the great work they are doing for her children.

Approved by the School Committee.

WILLIAM A. WINN,

Chairman.

ARLINGTON, Dec. 31, 1888.
